

1 million, 1 billion, 1 ten thousand, how many are behind and how to read?

If you are experiencing this situation, no worries, the following article of Network Administrator will help you answer these questions.

Surely many of us sometimes encounter big numbers with many 0's behind that would be very embarrassed not to know how to read or write properly. It is embarrassing to bring this issue to ask others, because this is an extremely elementary knowledge.

If you are experiencing this situation, no worries, the following article of Network Administrator will help you answer these questions.

1 billion = 1,000,000,000 There are 9 numbers 0 and 1 number 1

1 million = 1,000,000 has all 6 numbers

So 100 million = 100,000,000 have all 8 0s, many people often confuse 9 numbers.

10,000 lakh = 10,000 has all 4 zeros

1,234,567,890,000 = One thousand two hundred and thirty four billion, five hundred and sixty seven million eight hundred and ninety thousand.

The above are a few examples that we take out so that readers can easily figure out numbers and how to read. If you have questions or larger numbers that don't know how to read or write, please comment at the end of the article, we will answer for you. In calculating the work when the mind is very stressful, it is easy to be mistaken for one time or some cause of big loss so you have to be careful in recording and reading these numbers.

Hope this article will be useful for you.
