Here are some of the most popular and suitable Firefox add-ons for graphic designers or related jobs, especially for web designers, testers, and editors. fix and detect information, errors that occur on the browser have a huge impact on their results or products. In the article below, TipsMake.com will list 10 most popular add-on applications for Firefox that web designers need and should have.

1. Firebug :

This is an indispensable tool for many users as well as working, the application allows you to detect errors, edit HTML and Javascript code directly on any web page:

2. IE Tab:

Internet Explorer Tab - a great support application to check if the created website works well on Microsoft's IE platform, so checking and reviewing the generated errors will be simple and concise. more. With just a simple operation, the user will see the results in IE or return to work.

3. Pixel Perfect :

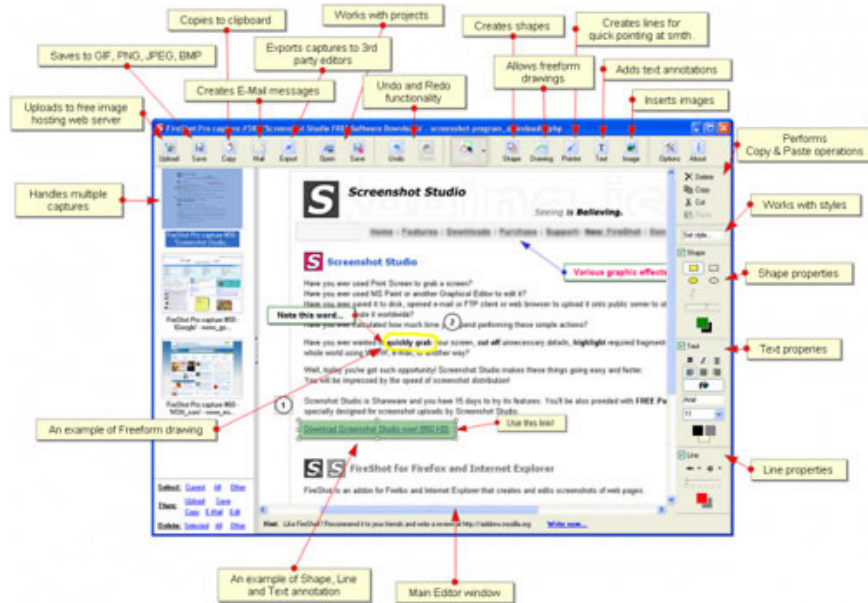

This add-on allows designers to create a 'overlay' layer on top of the HTML page, in fact this is an extension for Firefox / Firebug and has good compatibility with most other applications.

4. Web Developer :

With this add-on that supports this Web Developer, users can add a toolbar or menu bar, along with many other web development tools, or customize each different web application.

5. Fireshot :

This tool helps users take screenshots on the website interface, in part or in full. Unlike other support add-ons, Fireshot also has a built-in custom tool, through which you can insert annotated content, illustrations .

6. Aardvark:

Often, designers will conduct 'cleanup' of the excess on their website by finding and removing elements that are not really necessary. And Aardvark is an essential tool to do this.

7. Firecookie :

Essentially, a Firebug extension is used to view and manage cookies in the browser, and users can set the specifications to suit their needs.

8. YSlow :

Used to analyze websites and report on the current status of the situation, there are times when the website is unusually slow, based on Yahoo's standard rules.

9. Grabber Palette :

Indispensable for designers using *Photoshop, Paint Shop Pro, GIMP, Flash, Fireworks or Paint.NET* , apply

Palette Grabber to create color palettes in their programs.

10. GridFox :

Similar to PixelPerfect, but GridFox is used to apply on a wider model, with any website. Easy to customize, through which the designer can easily create the 'networks' used to design.
