1. Top hottest mobile game in early 2019
2. Mobile games are the most influential in the history of phone development
3. 10 lightweight mobile games but extreme gameplay

## 1. Fortnite Battle Royale

1. Download Fortnite Battle Royale for Android
2. Download Fortnite Battle Royale for iOS

Fortnite has dominated the video game industry and has become a phenomenon since it was released two years ago. Now that it is near the tenth season (the seasons last about two months), the popularity of Battle Royale is still stronger than ever thanks to regular updates of content. These updates may include changing important maps, unique game modes, skins related to different cultures and new icons, weapons and other items.

Although the ninth season has just ended, the game rules remain unchanged, you are released to an island with the sole goal of having a fever. You need to use construction materials, offensive weapons, vehicles, items to be the only survivor in 99 other players.

If you haven't played this game before, there is Playground mode, you can play, build and shoot on the island without worrying about being killed. This is basically a practice mode. Besides, you can also switch to other game modes such as competition created by players. Some game modes like:

1. **Solo** : You are against 99 other players.
2. **Duos** : You and your friend fight 49 other teams.
3. **Squads** : You and three other players fight against a group of 4 players.

## 2. Asphalt 9: Legends

1. Download Asphalt 9: Legends for Android
2. Download Asphalt 9: Legends for iOS

Asphalt 9: Legends is the latest in the series of mobile racing games. First released in 2014, you started on a fast-paced world racing game with many different locations. Players not only compete with other riders but also avoid the police.

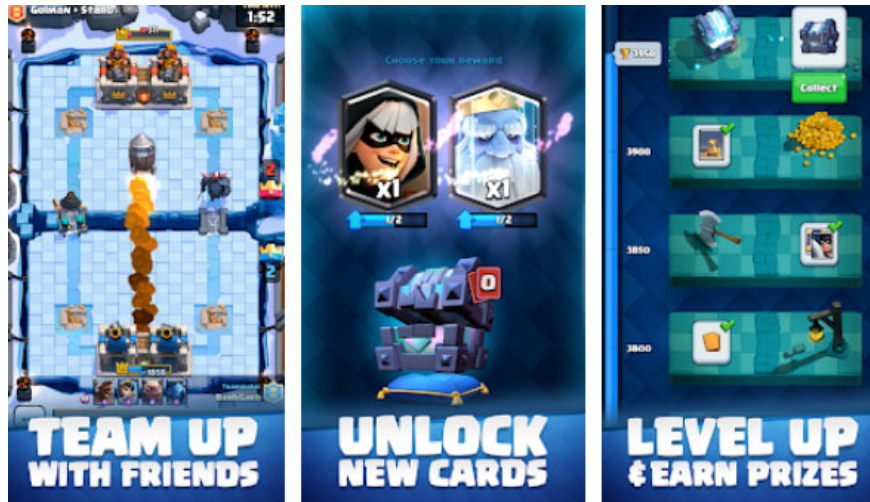

However, this is not a traditional racing game, it has seemingly unlimited strengthening abilities, you can jump, flip, turn the car in a destructive environment, which makes it attractive. much more. The latest version of the game includes all that but much more and more subtle. It has easier-to-use controls, improved images and exotic, completely new racing cars.

The default controls are simple. You do not have to control or accelerate (it is done automatically), you just need to focus on corners, jump over obstacles, choose different routes and try to win.

Although this game is free, there is a constant message that prompts you to pay to unlock the car. However, you will not have to meet any ads in the game. You can watch the promotional video if you want more money, this is completely voluntary.

### 3. Clash Royale

1. Download Clash Royale for Android
2. Download Clash Royale for iOS

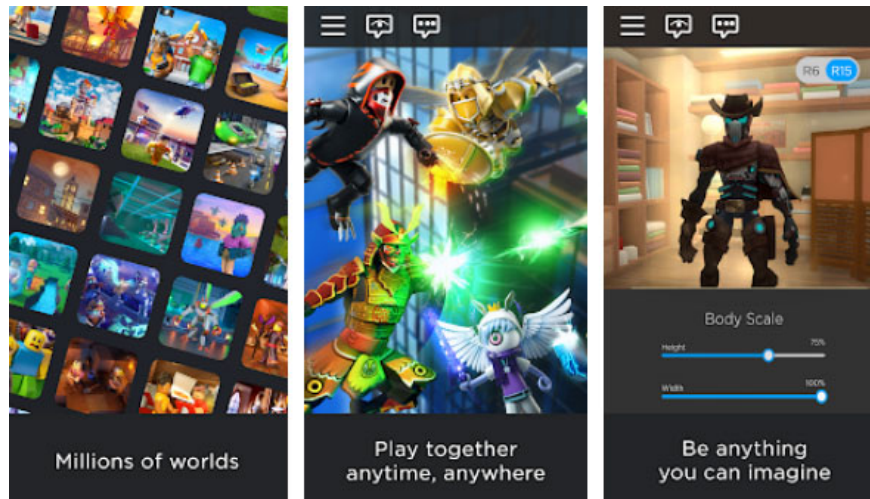

Clash Royale is a unique blend of real-time card strategy game and multiplayer online arena. In Clash Royale, you raise eight cards against the opponent and aim to destroy their towers. Any player who annihilates most towers (or central towers) within three minutes of play is declared a winner. The game is very fast, suitable for playing when there is not much time, but the rules are a bit more complicated than the original.

If you've played the tower defense game before, you'll get used to the prospect of surviving waves of enemies. However, since this is a multi-player game, you will also have to attack, which means sending your soldiers to destroy their towers. You have two lanes to send your troops down. Players can choose to attack from either side or focus on a tower, depending on the tactics of each person. When destroying an enemy's castle, you can take your army deeper into their territory.

Every time you win a battle, you will earn gold (money in the game) and a treasure chest containing cards and other items. You can use in-game currency to increase your card. For treasure chests, they all have different levels of rarity, from common to extremely rare. Clearly, the rarer treasure chests are, the better the cards. There is also a king's treasure chest that you can open if you destroy 10 or more towers in a day.

### 4. Roblox

1. Download Roblox for Android
2. Download Roblox for iOS

Roblox is a platform for creating and playing games, allowing people to create different games. Although it targets children, the online service still has more than 100 million active users every month and shows no signs of slowing down. When downloading games, create accounts, customize characters and you can do many things.

Open the app and you'll find games that other users have created, including the most popular, most rated, outstanding, recommended, top-earn, most-attractive, fighting games. , adventure and other genres. Each game shows how many current users are playing it, how many visits and current rankings (based on users' likes and dislikes). The number of games you can play is endless, so the best thing to do is quickly read the description and play.

In each game, you can interact with other users who are also playing. You can go to them and chat, exchange items, etc., depending on the game.

Many parents worry about anyone being able to communicate with their children. Therefore, Roblox has a number of security classes for all players, including actively tracking all conversations about inappropriate messages, as well as restrictions on who can communicate with those. people under thirteen years old.

## 5. Arena of Valor

1. Download the Arena of Valor for Android
2. Download the Arena of Valor for iOS

Riot and Dota 2's League of Legends are two of the most popular multiplayer online arena games (MOBA), but they do not have a mobile version, so other companies have taken advantage that. In 2016, Tencent Games released Arena of Valor, a 3D MOBA on iOS and Android.

Like most other MOBA games, Arena of Valor is not a simple game. You and your team (including five players) must find their way through the enemy's tower and defeat the opponent (five other players), by defeating both AI and man-controlled bad guys. It sounds simple, but the game is very wide and requires players to memorize matches and learn its mechanisms.

You start each round in the ground and level up by defeating the enemy and destroying the towers. The player has three lanes connecting their base to the enemy base, with two towers on one side and two towers of enemies on each side. You have to choose a lane to go down and fight.

When destroying towers or defeating enemies, you also earn money (coins, vouchers and gems), used to unlock special moves and buy things like armor and accessories. There are also chests and daily rewards you can avail to earn more money.

If you have never experienced MOBA before, Arena of Valor is a great place to start. Easy instructions, controls, and moderate levels, provide a comfortable and easy-to-grasp feel.

## 6. Old School RuneScape

1. Download Old School RuneScape for Android
2. Download RuneScape Old School for iOS

You may have heard of RuneScape but never played it because this is not an attractive game at a glance. It was released in 2011, is a fantasy multiplayer online role-playing game. Although the game has changed a lot since then, but you can still play its old version. Last year, finally MMORPG appeared on mobile devices.

To start Old School RuneScape, you need to create an account and character. You will receive a comprehensive guide from the beginning, which shows you how to cook food, chop down trees, find weapons, etc. You should not ignore instructions if you want to win the game.

Beginning, you can perform several tasks such as collecting items, cooking, creating weapons or killing dragons. You can also fight, exchange materials and chat with others. Touch the screen to move around and use swipe and pinch to move the camera.

The multiplayer of the game is a bit more unique than other games on this list because it is very few. You don't compete with other people, but you can meet friends in other parts of the map, chat with them through the in-game messaging program.

## 7. FIFA Mobile 19

1. Download FIFA Mobile 19 for Android
2. Download FIFA Mobile 19 for iOS

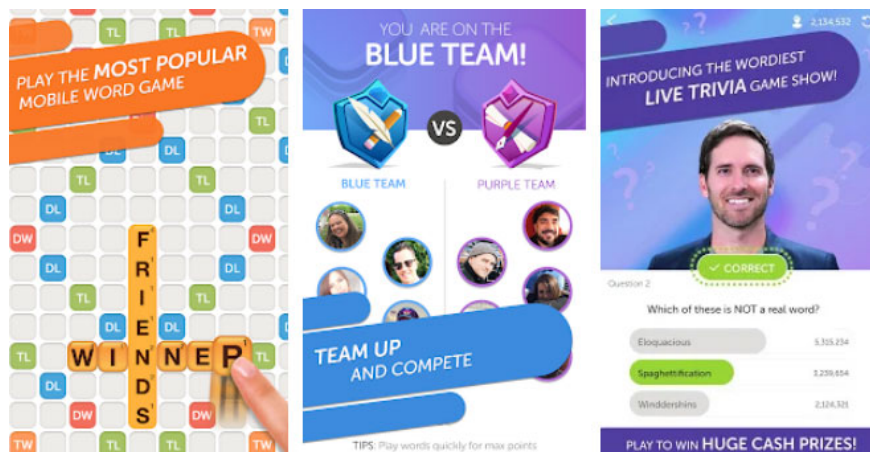

FIFA Mobile is EA's football game for smartphones. Just like other football games, you need to kick the ball in a yard but it has shorter game modes, card collecting and social interaction. The latest version offers better images, smarter AI, redesigned menus and significant gameplay changes.

The first time you open FIFA Mobile, you have to play through simple instructions to slowly unlock better players and different features. You swipe to hit the ball, touch other players to pass and press the action button to sprint, smash the ball and rob the ball, etc.

Finally, you can create your own tournament or join existing tournaments. Here you can compete for championships and prizes dedicated to tournaments.

## 8. Words with Friends 2

1. Download Words with Friends 2 for Android
2. Download Words with Friends 2 for iOS

This is a multiplayer game and it is extremely interesting. Words With Friends 2 is similar to the classic Scrabble board game. You get the letters, arrange them into words and earn points. You can play classic mode if you just play. It also has some unique and challenging aspects that can attract new players.

Game rules are very simple, you get certain letters to put on the word creation board. The next player must use any existing box on the board to create a new word. All words must connect with each other. The strategy is to place the box with the higher score in the correct position on the board, such as TW, DL, TL and TW.

## 9. Fun Run 3

1. Download Fun Run 3 for Android
2. Download Fun Run 3 for iOS

Fun Run 3 is a real-time multiplayer racing game. You can choose characters from all furry animals. Although it looks a bit childish, when you play, you will see that this is not really a game for children.

In Fun Run 3, you face three other enemies while avoiding obstacles and evading enemy attacks. The controls are easy: you can jump, slide and use any collected items. When the game starts, you can vote for the map you want to race. The map that receives the most votes will be the racing map. Each race lasts less than a minute.

## 10. 8 Ball Pool

1. Download 8 Ball Pool for Android
2. Download 8 Ball Pool for iOS

8 Ball Pool developed by Miniclip, it is a simple but addictive billiards application, with colorful user interface; Some game modes to choose from; a store where you can buy sticks, avatars and other items; and tasks you can complete to earn money in the game.

If you want to play one by one, you can easily do it with friends, family or strangers. Each time you play, you have to choose a level (or location) to play, each level has different entrance fees and prizes. If you win the match, you receive double the amount you paid. If you lose, you lose money to buy, but don't drop below the level.

The controls are quite simple: you have to use your finger to adjust the angle of the stick. Two lines will appear, one line shows the trajectory of the ball you're aiming for, and the other line is the ball line. When satisfied with your choice, pull back the power meter to the intensity of the blow; The farther you pull down, the harder the blow.

Game rules are similar to common billiards rules. Each player will have 30 seconds per turn, if the time is over, you will lose turns. There are a number of special game modes for you to choose from such as tournaments, no instructions (not traditional rules) and lucky shots (allowing you to shoot the ball on the table and win prizes).
