

10+ best free remote control software 2020

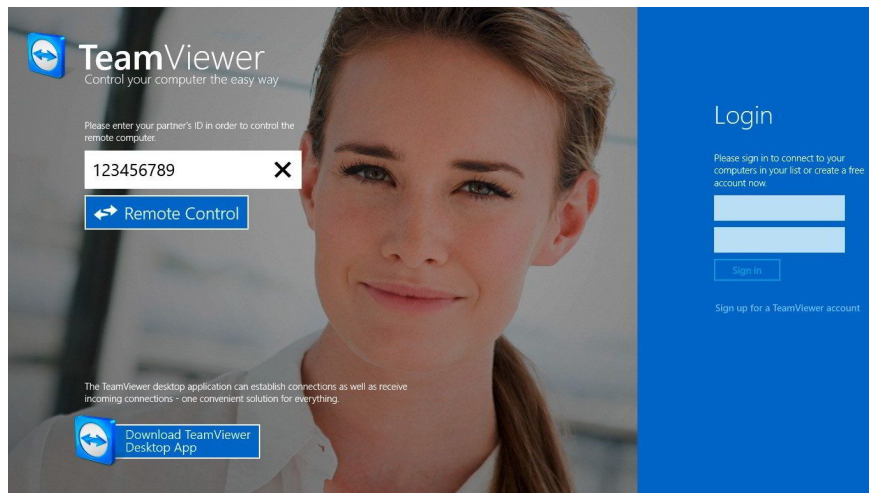

Here is a synthesis of more than 10 of the best free remote control software 2020, this remote computer connection software runs both windows / Mac OS / Linux

The section **control software remote computer** has had many years ago. Most of these tools are used by IT administrators and managers, they help IT support staff to easily access and repair computers remotely without having to go directly to the faulty computer. .

Normally we have to use a ' *main* ' computer to remotely control the rest of the computers, but with the growing popularity of smartphones and tablets, even casual users with mobile phones have Can access home or work computers while they're on the go.

Here is a list of more than 10 applications that make remote PC / laptop control useful for enterprise IT admins. It also helps to blur the lines between your devices, such as when on a business trip / traveling where we have to do something on the home / work computer, now let's use one in the software below!

1. TeamViewer

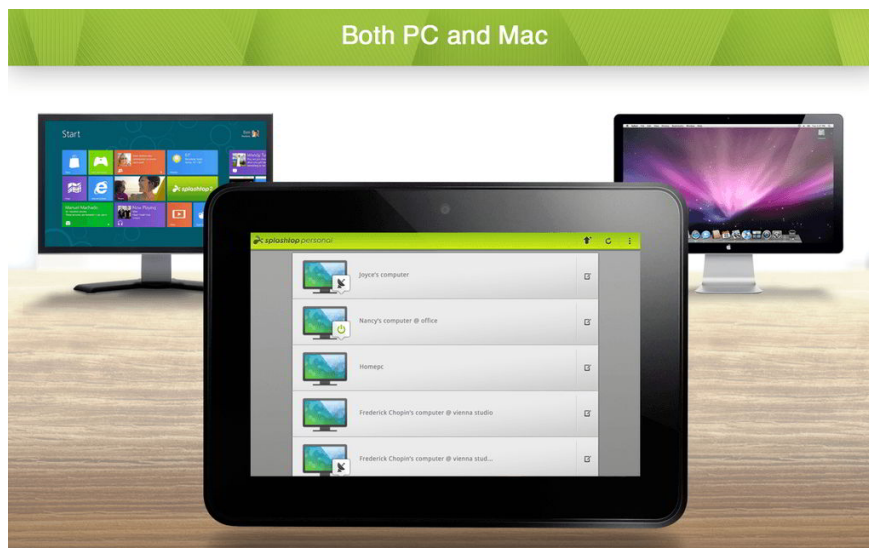

Teamviewer is considered to be the top 1 software for remote control, it can run on Linux, Windows and Mac OS.

Available in premium and free versions, TeamViewer is one of the most impressive remote control tools used for virtual meetings and sharing presentations. It has many features like providing full-time access to remote computers and servers, creating online meetings with support for up to 25 participants, etc.

In addition, setting up the connection and software installation is extremely easy and user-friendly. If you are an entrepreneur planning to hold online meetings or training, TeamViewer is always a good choice.

2. Splashtop

With over 15 million users globally, Splashtop is one of the best remote PC remote control tools available. What makes this software different is its excellent screen refresh rate, which supports the ability to stream audio / video almost instantly.

If you're working in education, there's a special edition that can make the classroom even more lively and enjoyable. Of course the software also has other special options especially for individuals and businesses.

3. UltraViewer

<p>HỖ TRỢ TỪ XA THẬT ĐƠN GIẢN Điều khiển máy tính hỗ trợ khách hàng / đối tác của bạn từ xa dù ở bất kì đâu.</p>	<p>PHIÊN BẢN MỚI Khám phá tính năng và các thông tin về phiên bản mới</p>	
<p>ĐIỀU KHIỂN AN TOÀN UltraViewer được thiết kế để hỗ trợ khách hàng, đối tác từ xa. Do vậy người được điều khiển có thể quan sát những gì bạn thao tác trên màn hình và lấy lại quyền điều khiển khi họ muốn.</p>	<p>CỬA SỐ CHAT Bạn có thể vừa điều khiển vừa chat với người được điều khiển một cách rất thuận tiện. Bạn có thể bấm nút F1 để bật/tắt nhanh cửa số chat khi đang hỗ trợ.</p>	<p>HỖ TRỢ MỌI HĐH WINDOWS Window XP, Window 7, Window 8, Window 10, Window Server.</p>
<p>CHIA SẺ FILE DỄ DÀNG Bạn có thể gửi file cho đối tác và nhận file một cách dễ dàng. Tất cả đều dưới sự giám sát của người bị điều khiển.</p>	<p>NHIỀU MÁY TÍNH CÙNG LÚC Bạn có thể điều khiển nhiều máy tính cùng lúc hoặc chia sẻ màn hình của mình cho nhiều máy cùng xem.</p>	<p>KHÔNG GIỚI HẠN ĐỊA LÝ Điều khiển máy tính của người khác ở bất kì đâu.</p>

Initially, I planned to place UltraViewer first on the list, but this software only supports Windows PC control, so it doesn't seem to be 'versatile'.

However, UltraViewer is still definitely one of the best free remote control software. With its light capacity, simple software setup and fast speed, UltraViewer is worth a try.

The software also has a Portable version, meaning you can download and run it right away without installation.

4. Anydesk

Phần mềm điều khiển máy tính từ xa

Mọi nơi. Bất cứ lúc nào. **AnyDesk**

Kết nối với máy tính từ xa, có thể là từ đầu bên kia của văn phòng hoặc nửa vòng trái đất. AnyDesk đảm bảo kết nối máy tính để bàn từ xa an toàn và đáng tin cậy cho các chuyên gia CNTT cũng như các cá nhân đang di chuyển.

This remote control software has more than 300 million downloads, so no one can deny its power. AnyDesk works on all devices and operating systems including: Windows, macOS, iOS, Android, Linux, etc.

In addition, it also possesses very light capacity (*only 3MB*), the actual speed although it was limited in the free version, but I found it quite fast.

Please download the trial and if appropriate, do not hesitate to pay to support your producer! Don't worry when there is no 'extensive' wallet, the free version also covers most of the basic needs of the average user.

5. Chrome Remote Desktop

Surprise? Google Chrome also has an extension for **remote control of your computer** . It allows you to set up your computer for secure remote access.

If you own more than one device, this is a great tool for using your computer remotely, as there are virtually no interruptions during the connection process. The setup process can be a bit tricky and a bit 'tedious', but once it's done it's definitely worth the time spent installing because of the abundance of features.

6. Microsoft Remote Desktop

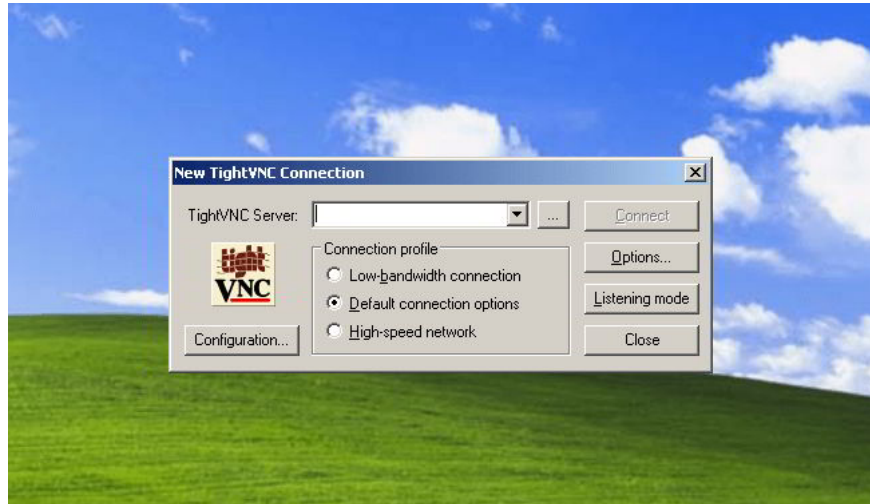

The remote computer control feature was present in Windows 7, but I know that few people use it and that Win 7 has died with very few users.

So if you are using Windows 10, please download this software for free on the Microsoft Store. The software really does not have any outstanding features but 'free', if you love simplicity, this is probably the right software for you.

7. TightVNC

VNC or Virtual Network Computing (virtual computer network) is a shared graphical desktop computer system that uses a framebuffer protocol to control a remote computer. TightVNC uses this system to provide high quality 'remote desktop monitoring' service.

Its rich support with multiple operating systems makes this tool quite popular for businesses and IT administrators. If you are looking for a free PC / Laptop remote control program this is one of the best options.
