

10 best selfie phones in the world

Here is a list of 10 most beautiful selfie phones in the world according to DxOMark. Samsung and Huawei smartphones make up the majority of the list.

Here is a list of 10 most beautiful selfie phones in the world according to DxOMark. Samsung and Huawei smartphones make up the majority of the list.

Google Pixel 3 (92 points)

With good focusing capabilities, producing highly detailed images, the Pixel 3's selfie camera scored 92 points in DxOMark's front-facing camera measurement.

However, in many situations the selfie image from Google Pixel 3 is not smooth, human skin color is yellow or green due to reduced noise reduction. Photo: TheVerge.

iPhone 11 Pro Max (92 points)

The selfie camera of the iPhone 11 Pro Max is equipped with a wider angle lens than its predecessor and the ability to shoot 4K videos. Selfies from the iPhone 11 Pro Max are highly detailed, HDR is good, portrait mode clears the background correctly, but there is still noise if shooting in low light conditions. Huawei Mate 30 Pro (93 points)

The front camera of Mate 30 Pro is considered to be good HDR optimization, high detail, low noise. However, the skin color in the selfie from the Mate 30 Pro is sometimes unnatural.

Samsung Galaxy S10 Plus (96 points)

The selfie camera of the Galaxy S10 Plus is rated very well, for beautiful, realistic skin color, fast and accurate focusing, good noise reduction. However, when taking selfies some details can be blurred and selfies in low light conditions will also be reduced.

Samsung Galaxy S10 5G (97 points)

The selfie camera of the S10 5G produces images with true-to-life color and sharpness in all lighting and distance situations. Just like the Galaxy S10 Plus, the selfie images from the S10 5G also blur some of the details in group shots and reduce details in low light. Photo: ExpertReview.

Asus ZenFone 6 (98 points)

The selfie camera of Asus ZenFone 6 is not inferior to the main camera on many models because it uses the flip mechanism to turn the rear camera into the front camera. The selfie camera on the device is highly appreciated for its ability to focus, eliminate noise until reproduce colors. However, this camera still has weaknesses in its ability to measure metering in some inaccurate situations, if shooting with flash with red-eye phenomenon and bokeh mode difficult to light up. Photo: DigitalTrends.

Samsung Galaxy Note10 + 5G (99 points)

The selfie camera of the Galaxy Note10 + is judged to be able to remove accurate fonts, beautiful bokeh, and high detail. However, selfies from the device suffer from reduced detail and color saturation. when the light is low.

Samsung Galaxy S20 Ultra (100 points)

Galaxy S20 Ultra has a front camera with a resolution of 40 megapixels Quad-Bayer sensor for wide, accurate focus, beautiful colors, high detail and standard fonts removal. However, the image will blur some details when the group is crowded and in low light conditions for inaccurate skin color.

Huawei Nova 6 5G (100 points)

Huawei's Nova 6 5G is one of the best selfie cameras in the world. According to DxOMark, the selfie camera of the device has beautiful skin images, accurate focus, low noise. However, images are sometimes haunted with green or yellow, the white balance is unstable and the skin is less natural when shooting in low light.

Huawei P40 Pro (103 points)

Topping the list of the 10 most beautiful selfie smartphones in the world is Huawei's newly launched P40 Pro with 103. DxOMark reviews the selfie camera of the device to produce the "best-ever" photos on a smartphone. Selfies from the P40 Pro reproduce natural skin tones, bokeh portrait mode works well, the ability to focus and eliminate noise well in all lighting conditions. However, the selfie camera of the P40 Pro still has a weakness: the ability to focus is reduced in low light conditions.
