

10 interesting features on Internet Explorer 10

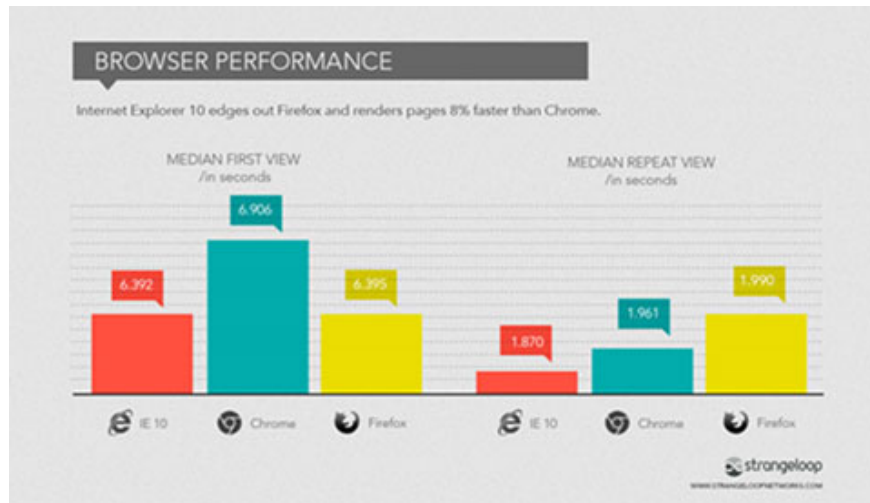

Known for its fast, flexible, fully touch-enabled capabilities, Internet Explorer 10 is the browser recommended for users whether business or personal. Below, we will introduce some interesting features of Internet Explorer 10.

Known for its fast, flexible, fully touch-enabled capabilities, Internet Explorer 10 is the browser recommended for users whether business or personal. Below, we will introduce some interesting features of Internet Explorer 10.

1. Fast and flexible

Internet Explorer 10 is the fastest browser available today. The study of the two New Relic and Strangeloop Networks laboratories has shown the speed of IE10's breakthrough in the following table:

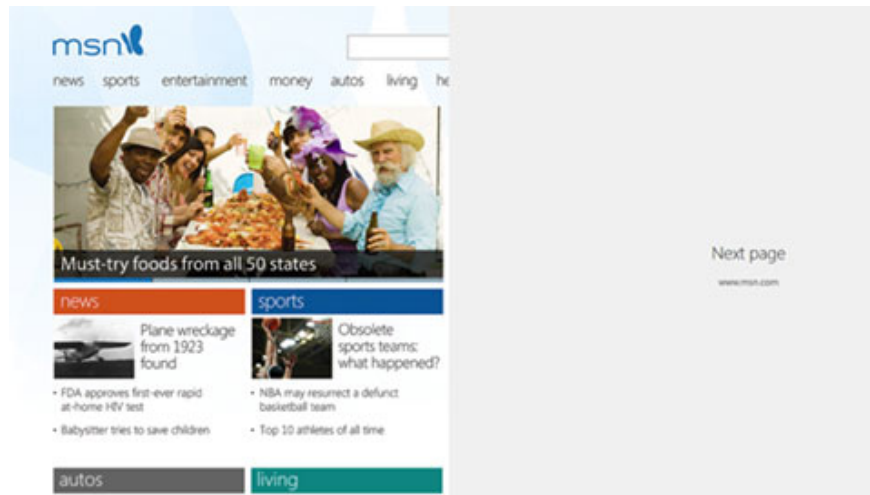

2. Full screen

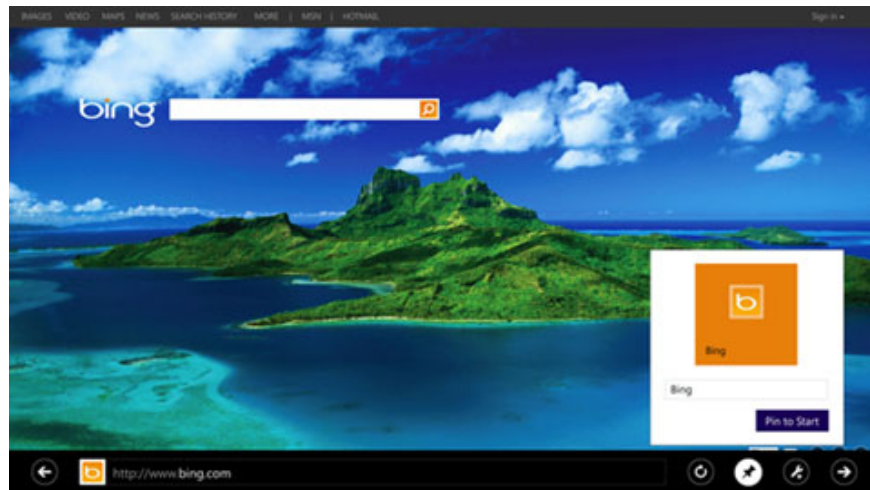

IE10 gives users a real experience of the web world. The control bar only appears when the user actually needs control. At times when only a website is needed, this control disappears in "silence".

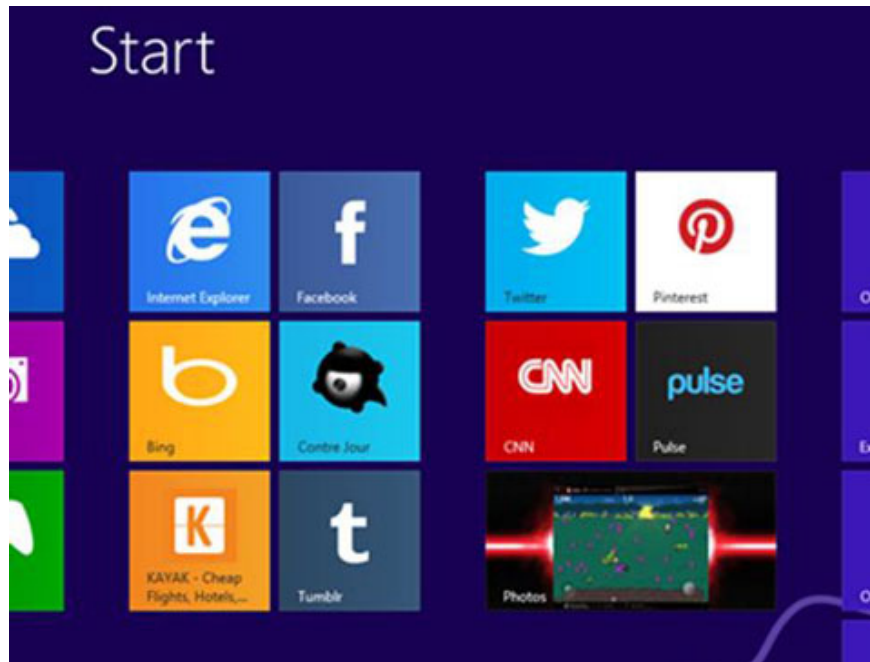

3. Flip Ahead

With Flip Ahead, IE10 creates a different 'Next'. Just swipe lightly, the user can go to the next page, or see the next post, next picture thanks to 'Flip Ahead'. Try Bing or YouTube searching on IE10 to experience Flip Ahead (IE settings) and swipe your hand forward or backward to experience the results.

4. Pinning

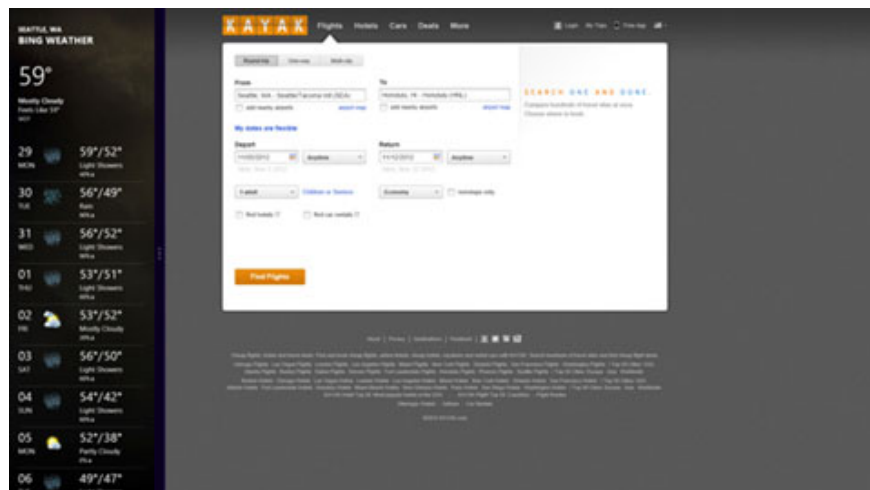

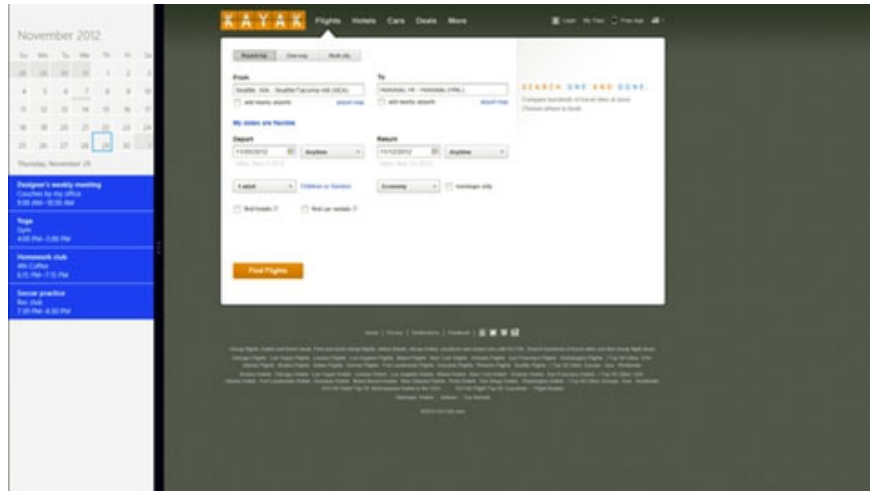

IE10 helps users to attach favorite pages to the Start screen as an application. Just select the 'Pin to Start' button to create a 'dynamic square' on the big screen. Try with Facebook, Twitter, or CNN or any page you like to see IE10 bring updates to your site vividly.

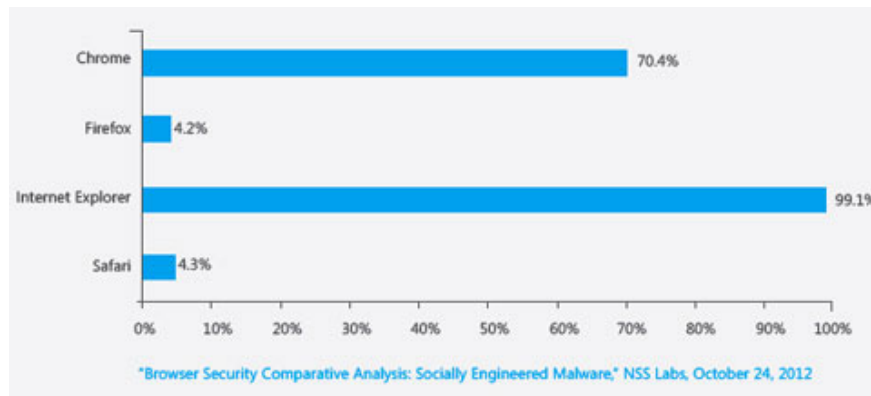

5. Snapping - Hanging 2 screens on the same window

IE10 makes it easy to "multitask" when users install an IE10 screen on one side of the screen and other applications such as Mail, Xbox Music or Microsoft Office - open parallel on the other side of the screen. This is a typical example of a browser working in sync with every other application on the Windows operating system platform, especially Windows 8.

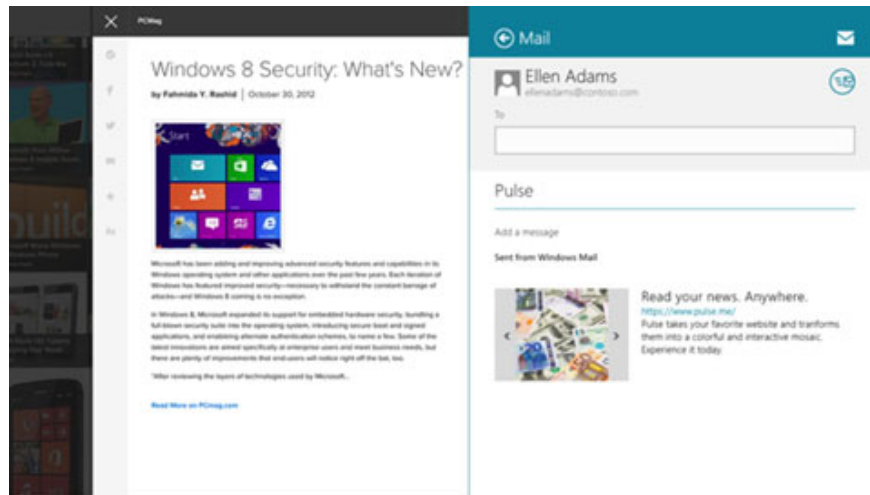

6. Safe

Internet Explorer 10 continues to top the browser team for malicious and phishing protection. Internet Explorer 10 offers improved SmartScreen Filter technology compared to older browser versions. According to a recent NSS Labs study, IE10 blocked 40% more malware than Chrome 21, 23 times more than Firefox 15 and Safari 5.

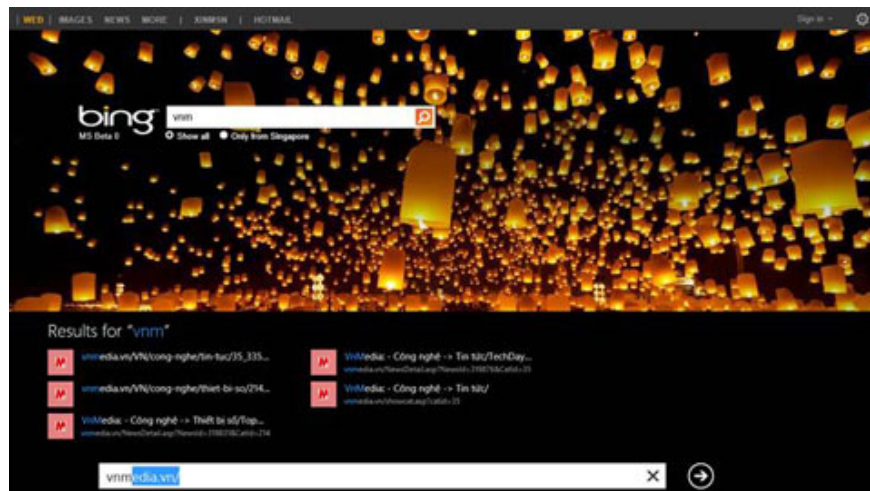

7. Only 1 touch to share

The Windows charms bar seamlessly integrates with IE10 to help users share information. Simply swipe lightly on the screen, and you can send browsing information any way you want: email, social networking .

8. Box of one Box

This technology is built on the known platform of Internet Explorer before. Bar one Box helps quickly find and locate search pages. One box helps users quickly access favorite sites, pages attached to the taskbar (battery) and pages that are accessed in Internet Explorer 10.

9. Play the game on the browser

Internet Explorer has partnered with game development companies to bring blockbuster games to play for free on the web. Typically, Contre Jour games, Atari Arcade and Cut The Rope have great experience on IE10 browser thanks to the ability to take advantage of this browser's excellent hardware. When playing on IE10 browser platform, users get the smooth and rich graphics experience like playing on the application at the user's computer.

10. Ensuring privacy

Do Not Track support is a bright feature of Internet Explorer 10. When Do Not Track feature is enabled, Internet Explorer sends Do Not Track messages to pages that users visit and these sites will be banned. collect personal information of users.

Do Not Track is easy to activate with just one click in Internet Explorer 10. Similar to previous IE versions, Internet Explorer 10 supports InPrivate Browsing and Tracking Protection to ensure the privacy of protected users.

Microsoft's IE10 browser is available on Windows 8-based computers, but Windows 7 can be installed here.
