

10 laptops are expensive every 5/2009

Netbooks continue to dominate the Asian computer market in May. It seems, users have tightened their wallet to overcome the global economic storm.

Netbooks continue to dominate the Asian computer market in May. It seems, users have tightened their wallet to overcome the global economic storm .

1. Compaq Presario CQ40 (Core 2 Duo P7350 processor 2.0GHz; 2GB RAM)

From the 6th position of last month, Compaq Presario CQ40 has become the most sought-after laptop in the last 30 days.

It has a 14.1-inch screen, has a sleek outer shell with silver and black tones, feels elegant, and is also resistant to scratches. CQ40 is equipped with the new generation Core 2 Duo P7350 CPU, the graphics card is upgraded to GMA 4500 instead of GMA 3100 as before. Compaq Presario CQ40 is also equipped with 2GB Ram memory with the ability to upgrade up to 4GB. Hard disk capacity is also expanded to 120GB and 160GB.

In addition, the device also supports connections, such as Wi-Fi, LAN Gigabit connection, 56K Modem, webcam, microphone, dual-layer DVD RW drive, memory card reader slot, .

Price of 729 USD (excluding VAT).

2. Acer Extensa 4630Z (Pentium Dual-Core T4200 Processor 2.0GHz, 2GB RAM)

'Running Vietnam' from the 9th position in April, Acer 's average laptop has been pleased with the position of the second best selling laptop in the Asian computer market. The latest consumer-friendly laptop of Acer is still equipped with a powerful processor Core Duo T4200 2.0GHz, 2GB RAM, DVD burner and HDMI port. The special thing is that this laptop still has an Nvidia GeForce 9300M GS processor that can meet the demand for game crushers. It also supports Bluetooth connectivity, USB port, Wi-Fi connection and integrated webcam.

The Acer Extensa 4630G 14.1-inch screen, measures 331 x 248 x 41.1 mm, weighs 2.4 kg.

3. Lenovo IdeaPad Y450 (2.2GHz Core 2 Duo T6600 Processor, 2GB RAM)

The chassis design is plated with carbon fiber. The luxurious black glossy cover is suitable for both men and women, the decorative pattern of the hexagon on the surface. An orange, youthful contour surrounds the body.

The Lenovo Y450 uses the latest and best Intel Intel Centrino2 Processors technology platform, up to 8GB of DDR3 RAM; DDR3 800 / 1066MHz DRAM, user NVIDIA GeForce GT 1XX series graphics cards can handle work, play games and graphics effectively. Battery life of up to 4.5 hours or 3.5 hours when using a separate graphics mode, is an energy saving and environmental protection solution (Epeat Gold Award-2009).

4. Acer Aspire 4930G (Core 2 Duo P8600 Processor 2.4GHz, 4GB RAM)

Designed in Gemstone style, Acer entertainment laptop owns Core 2 Duo processor, integrated Nvidia GeForce 9300M GS graphics card. However, the Aspire 4930G with a 14.1-inch screen is slightly heavier (2.5kg) compared to the same model.

5. Acer Aspire One AOD250 (Intel Atom N280 Processor 1.66GHz, 1GB RAM)

One of the most affordable 10.1-inch screen netbooks on the market, the Aspire AOD250 is both fragile and pretty. It is equipped with Intel Atom N280 processor clocked at 1.66GHz, 1GB RAM.

6. Sony Vaio VGN-CS23G (Pentium Dual-Core T4200 Processor 2.0GHz, 2GB RAM)

This cheap VAIO line of Sony is aimed at ordinary users and students. Appeared with 8 impressive colors (red, black, brown, pink, white, black gray, beige and purple), Vaio CS is still equipped with powerful entertainment features.

7. Acer Aspire 4736G (Core 2 Duo P8600 Processor 2.4GHz, 3GB RAM)

Also designed in entertainment style Gemstone, 14.1-inch laptop has a high-resolution screen - 1,366 x 768 pixels and is equipped with Nvidia GeForce G105M graphics card.

8. HP Pavilion dv4 (Core 2 Duo P8400 Processor 2.26GHz, 3GB RAM)

The modern design and touch-sensitive controls are very convenient, the Pavilion dv4 runs Windows Vista 64-bit operating system, 4GB RAM and is equipped with HDMI, eSATA port and a remote controller.

Unfortunately, the battery life is poor, the glossy screen and the touchpad are a bit hard to use. There's no FireWire port, Bluetooth, or Draft N Wi-Fi.

9. Toshiba Satellite L310 (1.73GHz Pentium Dual-Core T2370 Processor, 1GB RAM)

Satellite L310-A405 is equipped with Intel Penryn Core 2 Duo T8100 processor (2x2.1GHz, 3MB L2 Cache) and uses 120GB hard drive, standard memory of 1GB DDR2 (allowing users to upgrade to 4GB).

It comes with a 1.3 megapixel webcam, DVD-RW Super-Multi Double-layer optical drive and has a full range of common connectors such as dual-sided USB port, IEEE port, VGA, modem and reader 5-in-1 card, Wi-Fi connection.

10. Lenovo IdeaPad S10 (Intel Atom N270 Processor 1.6GHz, 1GB RAM)

Lenovo IdeaPad S10 has a plastic case with three color options: black, white and pink. The S10 has a wide screen, a spacious keyboard and is equipped with an ExpressCard / 34 slot.

The S10 features a one-key recovery system (One-Key Recovery) that is very familiar to Lenovo's large laptops. With this feature, users can restore the system with a simple operation of pressing the Rescue key above the keyboard, next to the Wi-Fi on / off button. Even in the case of a major operating system error, this feature can still help users restore the factory default settings.

Lenovo IdeaPad S10 configuration includes 1.6 GHz Intel Atom processor, 1 GB RAM, can easily upgrade to 1.5 GB, 160 GB SATA hard drive. The performance of the device is quite stable, if you do not open too many applications at the same time. The biggest omission of S10 is the battery life, which only works for 2 hours and 10 minutes if the Wi-Fi connection is turned on.
