

10 laptops 'cult' in October 2009

An exciting month with the operating system is expected to finally launch Windows 7 and the 11.6-inch laptop using Intel CULV chips also came out.

An exciting month with the operating system is expected to finally launch Windows 7 and the 11.6-inch laptop using Intel CULV chips also came out. Here are 10 best-selling laptops in October 2009.

1. Acer Aspire 4736G (Core 2 Duo P8600 Processor 2.4GHz, 3GB RAM)

Design inspired by the Gemstone series of entertainment computers, Acer's 14.1-inch laptop has a high resolution of 1,366 x 768 pixels and is equipped with Nvidia GeForce G105M graphics card quite powerful, making it easy to take over handling 3D graphics, games or complex applications.

Price: from VND 12 million (depending on configuration).

2. Acer Aspire One AOD250 (Intel Atom N280 Processor 1.66GHz, 1GB RAM)

One of the most affordable 10.1-inch screen netbooks on the market, the Aspire AOD250 is both fragile and pretty. It is equipped with Intel Atom N280 processor clocked at 1.66GHz, 1GB RAM.

3. Acer Aspire 5738Z (Pentium Dual-Core T4200 Processor 2.0GHz, 3GB RAM)

The 15.6-inch screen has a high resolution with a 16: 9 aspect ratio, allowing viewers to enjoy widescreen movies without annoying black borders around. Some configurations are equipped with Blu-ray optical drive.

Price: from VND 11.3 million (depending on configuration)

4. Compaq Presario CQ40 (Core 2 Duo P7350 processor 2.0GHz; 2GB RAM)

It has a 14.1-inch screen, has a sleek outer shell with silver and black tones, feels elegant, and is also resistant to scratches. CQ40 is equipped with new generation CPU Intel Celeron M 575 and Intel Pentium Dual Core T3200, graphics card is upgraded to GMA 4500 instead of GMA 3100 as before. Compaq Presario CQ40 is also equipped with 1GB Ram memory with the ability to upgrade to 4GB. Hard disk capacity is also expanded to 120GB and 160GB.

In addition, the device also supports connections, such as Wi-Fi, LAN Gigabit connection, 56K Modem, webcam, microphone, dual-layer DVD RW drive, memory card reader slot, .

5. Dell Inspiron 14 (Core Duo T6400 Processor 2.0GHz, 2GB RAM)

Inspiron 14 is really suitable for users who don't feel dizzy, but still want to have a well-configured laptop and a compact design. The machine has different colors for many users.

6. HP ProBook 4410 (2.0GHz Core 2 Duo T5870 Processor, 2GB RAM)

With charming 'wings' in red or black colors, HP ProBook is not an expensive laptop for business people, affordable price is suitable for individual users.

The device is still equipped with some powerful features, such as fingerprint sensors, security software of HP.

7. Lenovo G430 (Pentium Dual-Core T3400 processor 2.16GHz; 1GB RAM)

Lenovo G's budget laptops are very similar in design to the famous ThinkPad computers from China.

8. LG X110 (Intel Atom Processor 1.6GHz, 1GB RAM)

LG Netbook has a beautiful design with many color options, it also has 1 3G modem. The keyboard is quite spacious and easy to use. However, poor battery life is a weakness of this netbook.

9. Toshiba Satellite L510 (Pentium Dual-Core T4200 Processor 2.0GHz, 2GB RAM)

Although affordable, Toshiba Satellite L510 is still equipped with many unique features, such as scratch-resistant paint, webcam face detection.

10. Toshiba Satellite M300 (2.1GHz Core 2 Duo T8100 Processor, 1GB RAM)

Aiming at users who have a high demand for entertainment functionality, the M300 has a 14.1-inch screen and is equipped with a LabelFlash DVD drive instead of the HD-DVD player that has been 'killed' in the battle with Blu-ray.
