## Evaluation criteria

## **How does the testing process take place?**

Experts spent 126 hours experimenting with popular sports headphones as well as receiving the most positive reviews on the market. To achieve the most thorough and fair results possible, the 'candidates' have been tested in a variety of situations in practice, from outdoor jogging activities to indoor sports training. In addition, the most important features when using these headsets are also outlined here for you to consider carefully before deciding to buy.

## **What are we waiting for in sports headphones?**

**Comfort level:** Your day's sports activities can take place from a few minutes to even a few hours for athletes, so make sure you feel comfortable and fit. Long-winding and high-intensity motion is one of the top aspects that we need to consider on a sports headset model.

**Water resistance:** This is also an important factor on a sports headset. If you are a lover of jogging, outdoor cycling, you may need a water-proof headset enough to 'stand firm' under sudden rain. Or simply a product that can withstand perspiration when you exercise with intense intensity on hot days.

**Price:** Like any other technology product, everyone will have a certain budget for their favorite headset, however, it is important to choose a product that is worth it. So make sure you know what features are important to your needs.

## **List of the best 2019 sports earphones according to each criterion**

**The best sports headphones in overall: SENSO Bluetooth Headphones - priced at 28 USD**

SENSO Bluetooth is one of the No. 1 selling headsets on Amazon with over 20,000 reviews from users, and the overall rating is 4.2 out of 5 stars. This is due to the good price, long battery life (8 hours), Bluetooth 4.1 CSR technology and IPX-7 waterproof standard. SENSO Bluetooth is a product that contains all the essentials on a sports headset as we mentioned in the first part, so it is understandable that this product is popular.

More specifically, while costing less than \$ 30, SENSO Bluetooth is still equipped with state-of-the-art audio technologies for rich, full sound quality with deep, down-deep bass and treble sound. Clearly, not to the point of excellence but 'enough to use'. The lithium polymer battery of the product can be fully charged in less than 1.5 hours and allows up to 240 hours of standby time. With Bluetooth 4.1 wireless technology, you can connect your mobile devices to this headset at a distance of more than 9m. Another plus on the product is the CVC 6.0 noise canceling feature, which allows you to enjoy your own music space without having to 'grimace' by the annoying noises around. Must confirm SENSO Bluetooth is a too good device in the price segment.

**The second best sports headset in overall: Bose SoundSport Wireless - price of 200 USD**

A sports headset that wants to be the best has to offer maximum comfort for wearers as well as proper styling, and the Bose SoundSport Wireless has both elements. First, in terms of comfort, Bose provides you with a wide selection of tips (earplugs) of all sizes, from small, medium to large. These earplugs are manufactured by StayHear, plus soft silicon fixed housing on the ear ring. This provides the flexibility to use and comfort for a long time, as well as to ensure safety and fit when you exercise with high intensity.

If you are a fan of subjects like running or cycling, it is especially important to be safe. You must be aware of your surroundings when running or cycling on the road while still enjoying the music, SoundSport has a feature that allows you to filter the sound around to ensure this.

Speaking a little bit about the sound quality, the Bose SoundSport headset delivers booming bass, deep, compact bass, which will help create a sense of excitement during training. Also, with a six-hour battery life, halfway out of battery life is almost impossible.

**Sport headphones for the most comfortable wearing: Jaybird X3 - price of 84 USD**

Do you have strict requirements for comfort, but don't want to sacrifice sound quality? Jaybird X3 is the best choice you are looking for. Although classified as a sports headset, thanks to the waterproof nano coating and the ability to fit, the Jaybird X3 comfort makes them perfect for everyday use. In addition, with up to eight hours of battery life, your listening experience will always be guaranteed in any situation.

The soft, fixed housing housing on the ear flap is quite advanced, making this headset a practical option if you have a need for movement and continuous movement. In the box of the product, you will also receive a series of earplugs of all sizes, making sure to fit any earpiece. In terms of sound quality, the Jaybird X3 is equipped with a 6mm dynamic driver for crisp, strong, compact bass. And mid, treble is just enough, not too excellent. But if Jaybird X3's default sound quality doesn't suit your taste, Jaybird's MySound app can be downloaded, to customize the equalizer to your liking.

**Sport headphones for the second most comfortable feeling: Bose SoundSport Pulse - price of 199 USD**

Do not let users confused with Bose SoundSport Wireless, the Bose SoundSport Pulse is added a completely new feature to help distinguish your brother, that is the built-in heart rate sensor. With this feature, the Bose SoundSport Pulse headphones are able to provide users with detailed information about heart rate as well as some other health factors during the workout. Just connecting to a smartphone app, Bose SoundSport Pulse owners can see their heart rate parameters in real time. For professional athletes, this will help them understand the ability to allocate energy and maintain speed at the right time.

However, heart rate monitoring is not the only highlight of Bose SoundSport Pulse. When you move, run or jump during exercise, the product can still ensure excellent fit. With a reasonable ear-hook design, premium earplugs, multiple sizes and light weight, there is no need to discuss more about the comfort that Bose SoundSport Pulse offers. In addition, noise filtering capability is also a plus point to this product. If you are listening to music with an incoming call, the built-in microphone will allow you to answer the call immediately. Along with mic, the integrated remote control chip will also double the range, adjust volume or pause / play music. Finally, in terms of battery life, Bose SoundSport Pulse provides five hours of continuous use with each charge, not so impressive.

1. If you do not want to affect your hearing, keep these in mind when using headphones

**Best cheap sports headphones: Latitude Wireless AUKEY - price of 30 USD**

Aukey Latitude, a rustic product with a simple design, has won a lot of positive reviews when it comes to sound quality, rich features and especially reasonable price. Enjoy pure wireless audio with aptX technology, along with EQ installation to enhance your personal listening experience are the outstanding features you can find on this product.

The headset has a separate two-part design, with a slim in-ear button and a small earhook, both of which are made of high-grade silicon material, providing good feel and sound isolation. causes discomfort when listening for a long time. AUKEY Latitude Wireless is proud to be a cheap product but still equipped with IPX4 water resistant to prevent sweat and normal operation in the rain, along with magnetic tips wrapped around the neck for convenient operation. Handsfree. The battery life on the AUKEY Latitude Wireless lasts about eight hours, which means it falls into about 120 continuous songs, and only takes 90 minutes to fully recharge. Aukey also offers a refund guarantee service within 45 days and product replacement warranty within 24 months if the product does not meet your expectations.

**The second best cheap sports headset: Anker SoundBuds Slim Wireless - \$ 26 sale price**

At a price of under \$ 30, Anker SoundBuds Slim still offers you a full range of features that are often omitted on most low-cost headsets, including wireless audio, built-in microphones and controls. intuitive remote.

Anker SoundBud Slim Wireless is primarily made of rubber to help them with water resistance at IPX4. In terms of sound quality, the product is equipped with 6mm driver to help bring out the bass quite well, the sound of mid and treble is okay but nothing special. The battery on the product will last for about seven hours continuously, very impressive in this price range, and comes with a range of alternative options for custom earplugs and fins to ensure Perfect fit with your ear mold. If you are worried that cheap earphones often have low durability? It can be assured because Anker offers 18 months warranty for this product.

### **Best wired sports headphones: Sennheiser OCX 686G Sports - price: 150 USD**

If you really don't care about a pair of strings dangling from your headphones, Sennheiser OCX 686G is the best sports headset you should consider. The product comes from a well-known brand, effective water resistance, and good sound quality. If you are looking for deep, well-controlled bass, jingle mid and treble, this product may not be for you, but this is a sports headset and the sound will not be The factor is put on top. Anyway, Sennheiser is also one of the leading brands in audio technology, so you can expect to a certain degree of sound quality of the product.

Setting sound quality aside, the OCX 686G also provides the necessary rhyme features on a sports headset such as a remote control and built-in microphone, allowing you to pause music or receive calls just by one button. The ear plug design can be extended when placed in the ear canal, allowing for reduced background noise and ear plugs to be applied ergonomically to make sure it fits most people's ears. The oval cable, para-aramid cable helps to prevent tangles and anti-bacterial ear adapters are other pluses to mention in Sennheiser OCX 686G.

### **Sport headphones have the best battery life: Jaybird Tarah Pro - \$ 190 price**

These Tarah Pro headphones are one of the more advanced products developed from the Jaybird X sports headset line, and they offer a few more advanced features compared to the cheap X series introduced above. This is the latest flagship product of headphones manufacturers from Sweden with the price up to 160 \$. The product has an impressive battery life of up to 14h and IPX7 water resistance. Sturdy braided cable, also looks quite high-end and the headset design mechanism on a swivel joint, allows you to wear it in two ways: round the ear ring or traditional style, this helps users to relax more used roof during workout. Tarah Pro also comes with its proprietary housing ear plugs that can grip the ear and are easily changed to suit each user. Tarah Pro helps users feel secure to use during training sessions or long run sessions with up to 14 hours of continuous use after just one charge. Just two hours of charging gives you up to 14 hours of music playback (almost double the playing time of products coming from other headset brands). Moreover, the smart charging feature allows you to simply plug Tarah Pros in just five minutes and will have two hours of continuous music playback. The IPX7 water-resistant capability allows you to swim with this headset, not just when it is raining or sweating. The product is also equipped with magnets to stick together when not in use, to avoid misplacement. Turn on the Jaybird app to customize EQ and sound settings, these headsets will assist you in any normal jogging or professional practice.

**The best sports headset for the fit: Jaybird X4 Wireless - price of 129 USD**

With thousands of different options on the market, finding the best headset to run is not an easy task. But things became much simpler when Jaybird X4 was released. Jaybird X4 is a combination of comfort, fit, and features with waterproof design, custom EQ for accurate sound throughout the sound range. Comply Ultra sponge foam ear cushions, retaining fins have an innovative design to wear more comfortable, more fit for users. Jaybird X4's cable is also rated more durable and durable than its competitors in the price segment.

When you use Jaybird X4 to make a call, the headset can do quite well, the mic captures the correct voice, the listener can hear the voice clearly, helping to improve the quality of the conversation. As a jogging headset, water resistance is a prerequisite and Jaybird X4 has done very well with IPX7, making it possible to use the product regardless of the weather conditions. 8h battery life is not a big breakthrough, but it is too good to ensure daily use, and the 10-minute smart charging function for 60 minutes is also a plus for the product.

### **Sport headset most suitable for swimming: H2O Audio Waterproof Stream - price of 80 USD**

When it comes to underwater performance, there are not many products on the market that can match H2O Audio's Audio Waterproof Stream. As a water-borne device, Audio Waterproof Stream is equipped with IPX8 waterproof technology, which means the headset is 100% water resistant, sweat-free, rainwater and even can be submerged in water for more than 3m. Swimmers will be impressed by the hydrodynamic design of the product

that H2O Audio is proud to design for professional "swimmers".

In terms of sound quality, this headset provides good sound quality, the details are expressed relatively easily even in the underwater environment, and the most prominent is the powerful and powerful bass. It has a 10-hour battery life and is equipped with an mp3 player with 8GB of memory, for storage of up to 2,000 songs. Audio Waterproof Stream is also equipped with Bluetooth connectivity, but unfortunately, this feature will not work under water. However, with a connection range of more than 9m, the product will still function perfectly in terrestrial conditions such as jogging, cycling, and other sports.
