

10 most dangerous birds on the planet

Despite the gentle appearance, cute but you should not tease these dangerous birds if you do not want to pay dearly.

Some birds in the world have special abilities that can be dangerous to humans. Despite the gentle appearance, cute but you should not tease these dangerous birds if you do not want to pay dearly.

White Swan

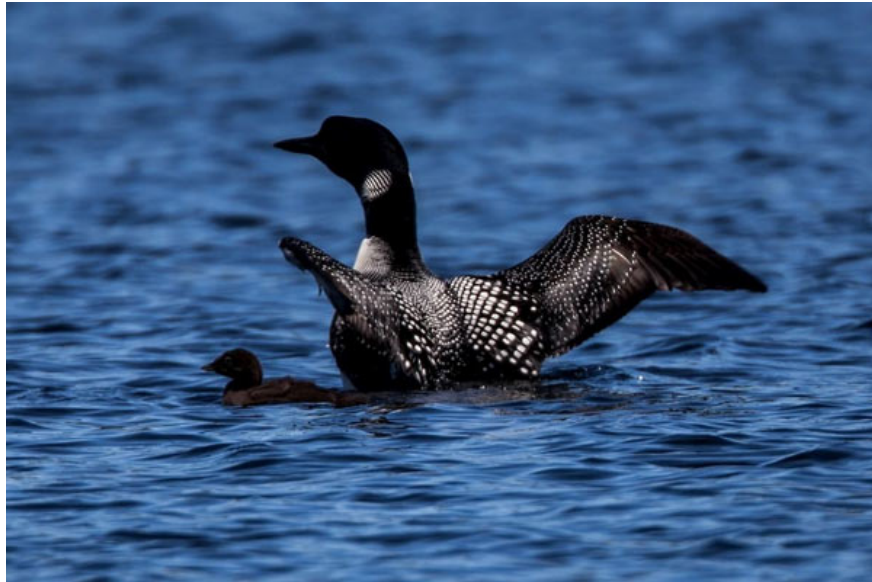

In contrast to cuteness, the white swan is very aggressive and can be dangerous. Especially during the time the white swans make their nests, if you come close, they will rush towards you with hiss and attack hard with wings.

European herring gull

These gulls have a long wingspan and a knife-like beak. They are famous for both stealing food and attacking people. If a herring gull is provoked, it will immediately call for help to other adult birds to assist, resulting in a frightening group attack. Their victims are unavoidably seriously injured.

Black-footed diving bird

The most striking feature of the black-beaked dive is its sharp spear-like beak. They are usually aimed at the opponent's head or neck when attacking so it is very dangerous.

Falcon fire tail

The tail of the fire has wide wings, a short tail and sharp claws. If invaded, they will become aggressive and attack enemies with claws.

Snow owl

Snow owls are one of the largest and most beautiful owl species in the world, with white fur and dark gray spots. The dangerous weapons of snow owls are sharp claws like knives. If threatened, the snow owl will attack enemies in the head and eyes.

Bearded vulture

This giant vulture weighs up to 7kg, and the wings of the bearded vulture 2.3-2.8m long, allowing them to glide smoothly on high mountains. They often catch prey and drop from above to marrow inside the bone and eat meat.

Striped owl owl

Striped owls are non-vocal and often hunt at night. They are very aggressive if disturbed. They attack with sharp claws and often aim at the head, resulting in serious injuries.

The evil bird is Australia

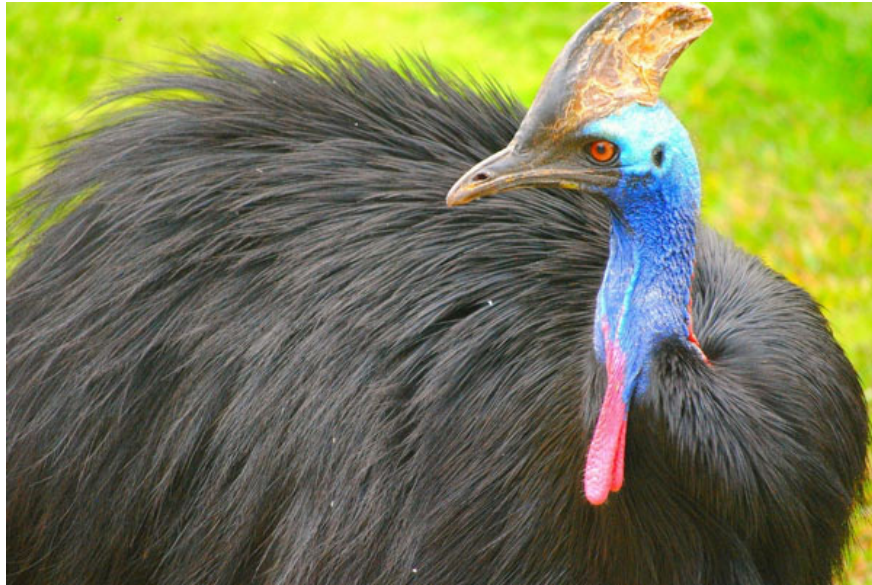

After the southern crested ostrich, this is the 2nd most dangerous bird in Australia. During the nesting period, the evil birds are becoming aggressive. They will swoop down and attack intruders, causing serious skin or eye injuries.

African ostrich

This is the fastest bird in the world with a maximum speed of nearly 70 km / h. Ostriches weigh 150kg, are over 1.8m tall and have 2 toes on each table with talons longer than 10cm. With its long and strong legs, an African ostrich can kill with a single kick.

Crested ostrich

This is considered the most dangerous bird in the world. The crested ostrich weighs 75-80kg, is 1.2 m high and is the 2nd largest bird in the world. Each of their feet have 2 toes and is equipped with knife-like claws, over 12cm long. If the crested ostrich attack, the victim may have a fracture or even death.
