1. Avast Free Antivirus

Platform: Windows XP or higher, all versions of Mac OS X.

This is one of the oldest antivirus programs and promises many prospects with really tight security even on the free version. Built-in anti-spam Anti-Spam, easy-to-use interface and real-time protection, especially for mobile devices such as USB flash drives. When performing different scans, Avast on-demand scanning is voted the fastest in free antivirus solutions.

2. AVG Anti-Virus Free Edition

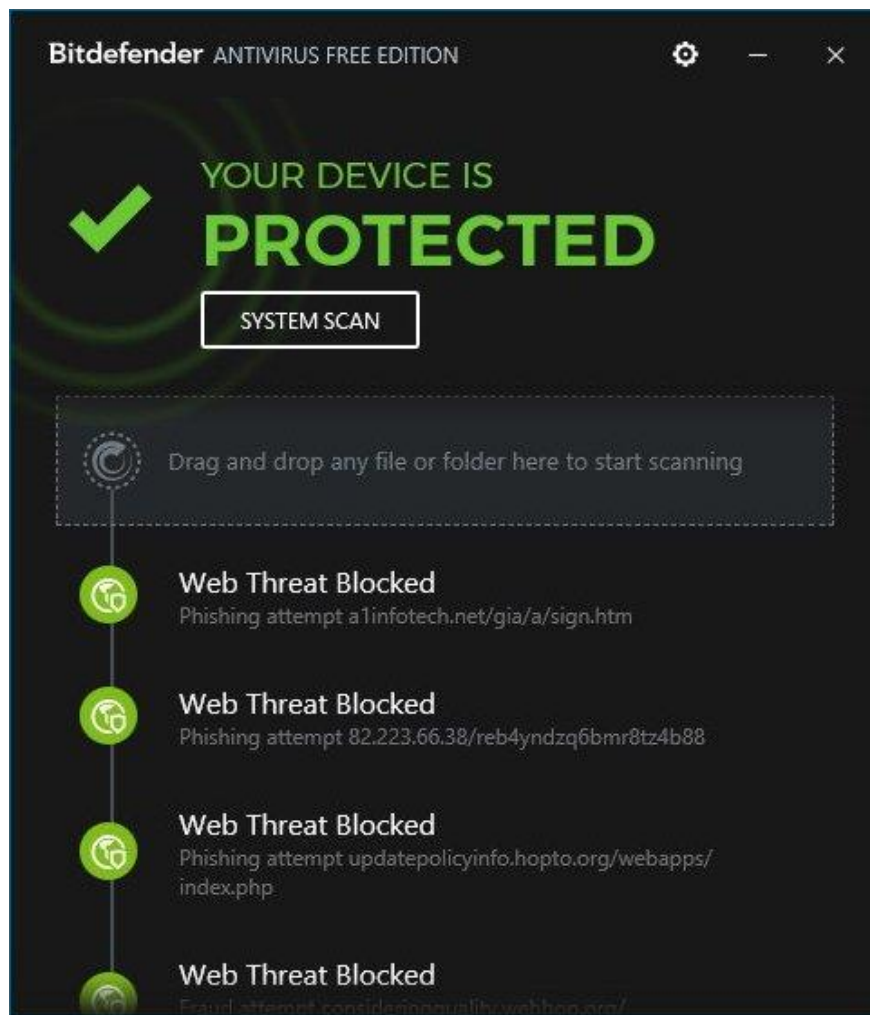

Platform: Windows XP or higher, Mac OSX Mountain Lion or later versions.

This is considered the most commonly used antivirus software today. In fact, the term ' **free antivirus** ' has long been associated with the **AVG** brand. With millions of users around the world AVG has been trying hard to integrate the most advanced and completely free protection measures. Powerful real-time protection makes AVG the first choice when compared to other security solutions.

The software is updated automatically every day to ensure your system has the ability to withstand the latest threats detected. Especially not slow down the processing speed of the computer.

3. BitDefender Antivirus Free Edition

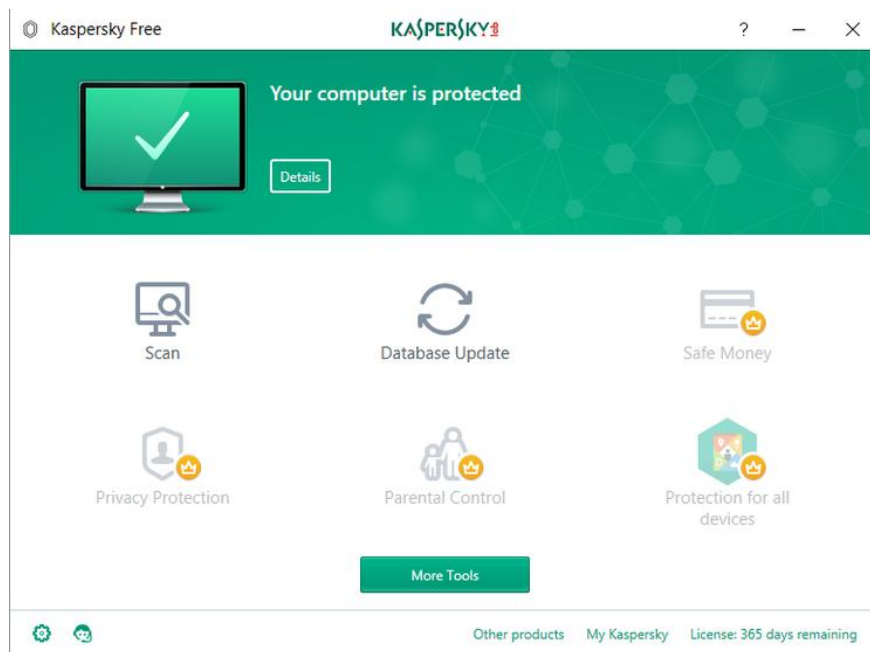

Platform: Windows XP or higher, Android 2.3 or higher.

BitDefender Free Antivirus is also one of the most effective free antivirus software today. The software provides real-time protection, detects and blocks Windows-based applications trying to access the Internet, scanning Rootkits and scanning HTTP .

BitDefender Free Antivirus is considered one of the most effective antivirus software on Windows.

4. Kaspersky Free

Kaspersky Free gives you the ability to protect against viruses, leading malware as well as detect threats quickly. Kaspersky Free has a real-time protection feature, the option to scan the entire system as well as customize, evaluate websites and block malicious URLs that users are navigating to. It receives excellent test scores in anti-phishing.

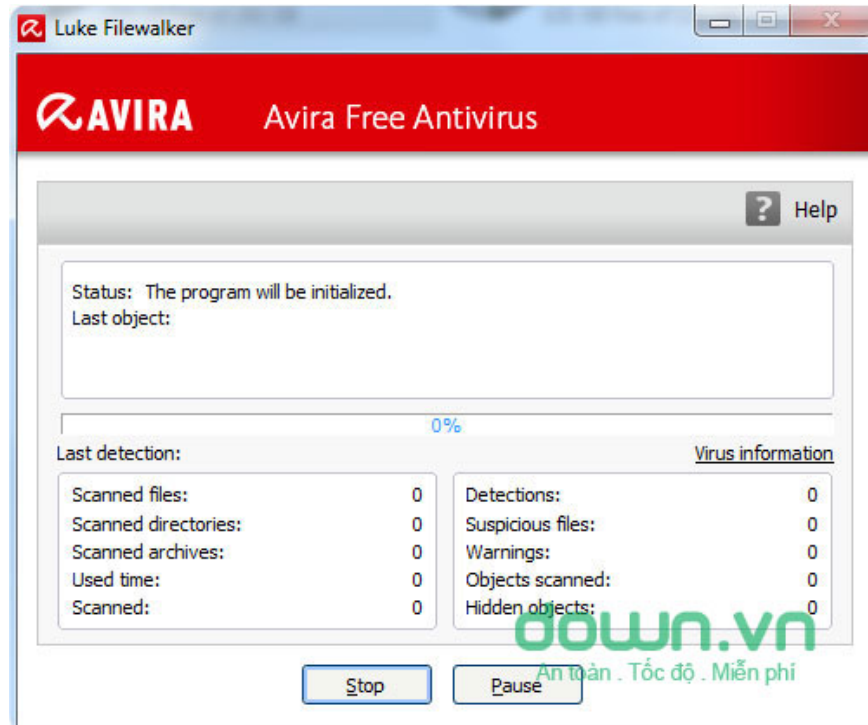

5. Sophos Home

Like Kaspersky Free, Sophos Home does not recognize behavior-based viruses but is based on its own anti-virus technology developed by the company. Sophos Home is highly valued for its anti-fraud and malicious ads blocking. Simple, intuitive interface. Powerful remote management and monitoring. Sophos Home is available for Windows and Mac.

6. Avira Free Antivirus Edition

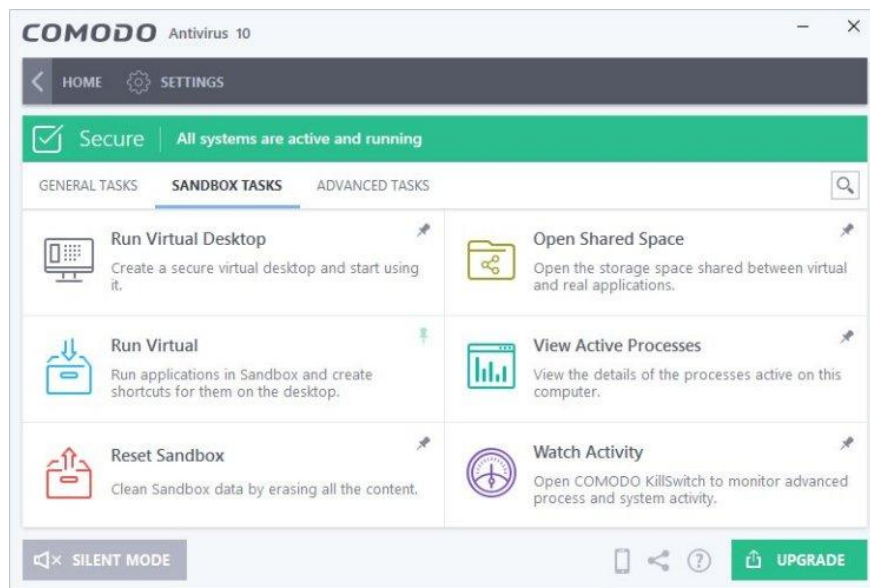

The Avira Free Edition has an impressive appearance but not the best protection solution over time. This is a very good program for basic security against viruses and worms. Scanning speed is not really fast, it takes time to detect the virus but is capable of killing all worms, trojans and spyware hidden deep in the computer.

Because Avira only has the basic antivirus module in the free version, Avira is very light, never slowing down the process of the system even when updating in the background.

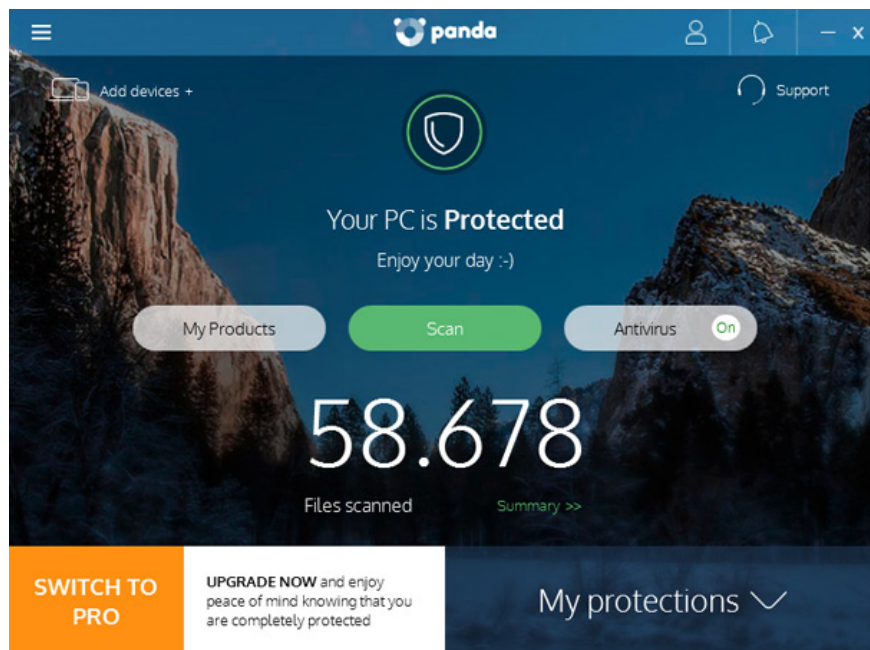

Download the latest version of the Avira Free Antivirus Edition to your device and install it.

7. Comodo Antivirus

Like Avast Free and AVG, Comodo Antivirus has a powerful and free set of features to deal with viruses and malware. It is capable of detecting behavioral viruses, equipped with virtual desktops and secure browsers (for safe browsing, avoiding being monitored in sensitive cases such as Internet banking payments). In particular, this antivirus software also has a virtual sandbox to test suspicious software, check its safety before actually installing it on your computer. The user interface is also a big plus for Comodo Antivirus, quite nice and attractive.

8. Panda Cloud Antivirus Free

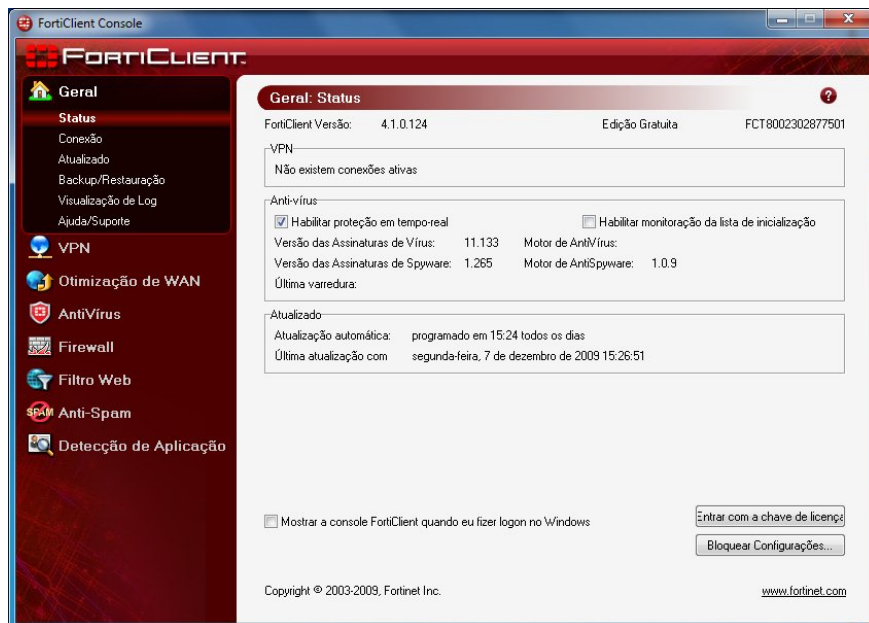

Platform: Windows XP or higher; Android 2.3 or higher.

The advantage of Panda Cloud Antivirus Free Antivirus is quite light and can run on internal cache when the network is not available. In addition, the software also provides features to protect the computer from phishing, detect and prevent rootkits.

With running as a service window at the system launcher, the program takes up very little resources and real-time protection is quite impressive, as long as you keep it up to date.

With features such as On-Demand malware scanning, On-Access Malware scanning, user computer protection from Phishing and malicious URLs, Panda Free Antivirus is rated as one of the best and safest antivirus programs for users.

9. FortiClient

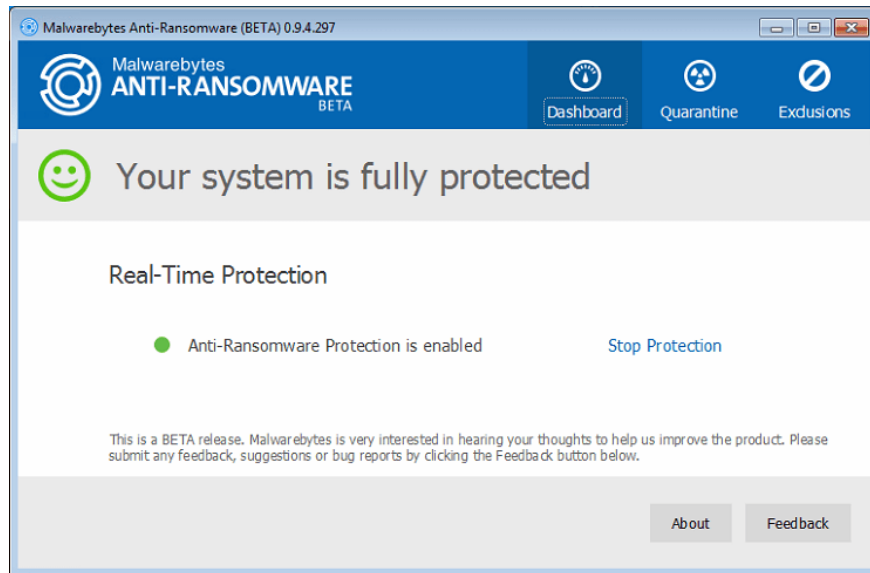

Platform: Windows XP or higher, Mac OS X Snow Leopard (10.6) or higher, iOS 5.1 or higher, Android 4.0 (ICS) or higher.

FortiClient is one of the most effective free antivirus software, and is ranked among the top antivirus applications. FortiClient provides Web, Firewall, Network and Parental Controls filters. In addition, the software also provides phishing detection solutions and integrated VPN Client.

Although FortiClient is designed to work with network devices, FortiClient 5.0 also functions as an independent antivirus program, integrating both Parental Control and VP Client.

However, network optimization seems to be effective only with FortiGate Devices and the software is also less effective in preventing malicious URLs. In addition, the functions of the VPN Client and Parental Control systems are also limited.

10. MalwareBytes

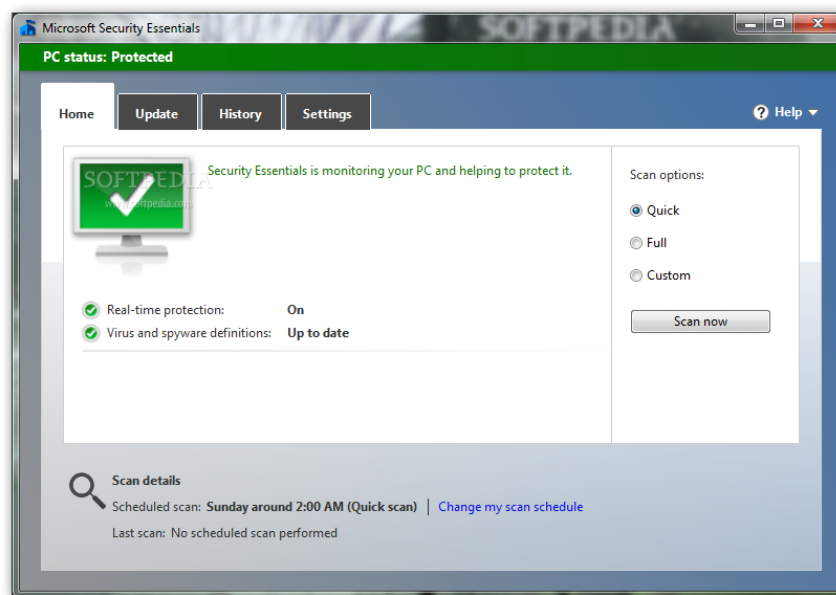

Platform: Windows XP or higher.

Malwarebytes is one of the most highly regarded antivirus software. One of the most prominent features of MalwareBytes is virus detection based on their behavior on the computer.

But Malwarebytes' biggest drawback is to ask other antivirus software to work with the software. Malwarebytes works like an additional antivirus program. In addition, the free versions lack a lot of important features compared to the Premium versions. However Malwarebytes is still one of the top antivirus software and is appreciated and chosen by many users.

Bonus: Microsoft Security Essentials

This is a Microsoft-specific antivirus program for Windows 7 operating system. However, because of the huge download volume, it was later supported for Windows Vista and Windows XP. If you're using Windows 8.1 /

10, you'll see that Windows Defender / Windows Defender Security Center is built-in, which is an upgrade of Microsoft Security Essentials.

Microsoft Security Essentials runs very quietly in the background, so you can freely use your computer as you wish without worrying about interruptions or slow computers.
