According to Pham An Duong, Netbook will have a large market share, these are products for those who have used computers that want to have a mobile device, or those who have not used computers with the desire to own a price laptop. cheap. Netbooks will have a place, because it is more portable than Laptop and convenient to use features over PDA.

Participating in the Vietnam IT and Consumer Electronics Show 2008 (VCE) took place at the Friendship Cultural Palace (Hanoi) from 9 to 12 April, in addition to high-tech devices, Intel brought the computer model to Compact hand, can access wireless Internet and office handling.

The US-based manufacturer now incorporates three companies in Vietnam including FPT Elead, CMS and Dang Khoa to launch low-cost, compact computers.

Representatives of the company also said that the Atom chip line for mobile computing devices will be available in Vietnam in the third quarter of this year.

Not only Intel, at VCE 2008, Asus also brought in small design computers with strong configurations.
