

10 useful tips for Google Chrome

Google Chrome is currently a very popular browser in the world thanks to its smoothness. Here are 10+ useful tips for chrome browsers.

Google Chrome is currently a very popular browser in the world thanks to the smoothness, simplicity and efficiency that it brings. If you are using this browser from Google, the following 10 tips can allow you to do many things without having to install any utility.

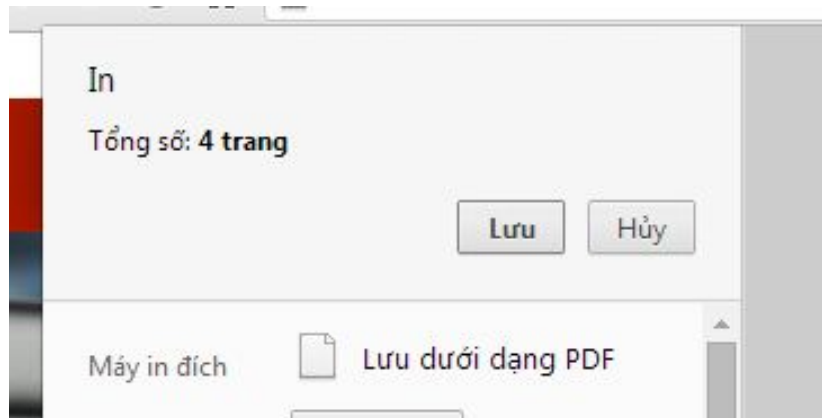

First of all, there are tips to help you **speed up the Chrome browser**. Read now: **Speed up tips for Google Chrome browser**

Here are 10 other useful tips when using the Chrome browser.

1. Save web page as PDF file

Chrome has built-in function to save webpages as a PDF file. To do so, on a webpage to save, press **Ctrl + P** (or **Cmd + P** for a Mac), then press **Save** . You can also have several options right below such as saving a specific page, paper size, alignment . before saving.

2. Assign shortcuts for Chrome apps and Extensions

Google Chrome supports a lot of shortcuts and you can also assign keys to App and Extensions themselves. First go to the Extensions page by typing in the *chrome* address bar : `// extensions /` , scroll down to the bottom, and click **Shortcuts** . Then select each application and press the shortcut key to assign.

3. Select multiple pages to delete in the web history

If you want to delete multiple pages in **History** , it will be very difficult for you. For example, if you want to delete the 20 most recent websites, you'll usually have to select each one 20 times. But that's not necessary, because you can select those 20 pages at once by selecting the first page, then pressing **Shift** and selecting the last page, all the remaining pages will be selected.

4. Install Add-ons outside the Extension

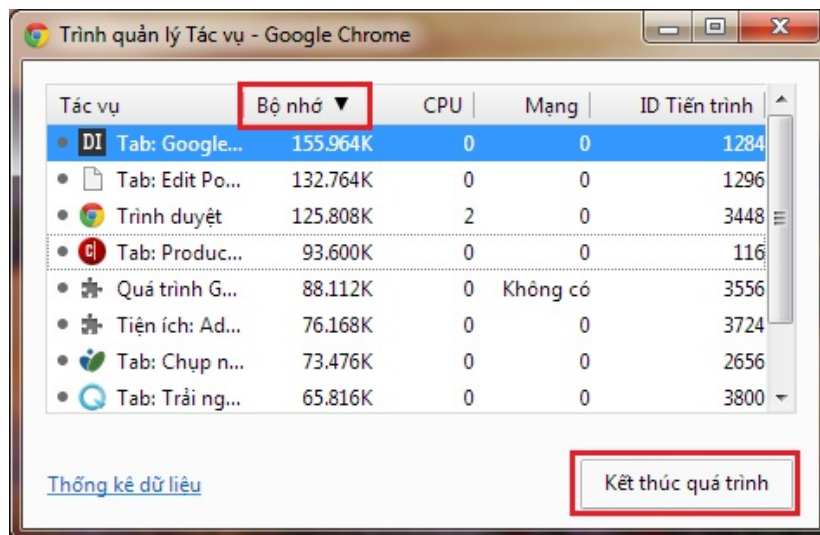

Currently, Google Chrome only allows the installation of extensions from the Google Web Store. However, you can still install gadgets from the outside by going to the **Utilities** page, selecting **Developer Mode** .

Then directly drag the **CRX** file into the Chrome window and install it normally.

5. Quick fix when Chrome is slow, freezing

After a few hours of continuous use, you may feel that Chrome runs much slower, the simplest thing is to restart it. However, this sometimes does not work, now you can go to **the Task Manager** by pressing **Shift + ESC**, sort by memory, select tasks that take up a lot of memory and click **Finish too. submission**.

6. Compose an email directly in the address bar.

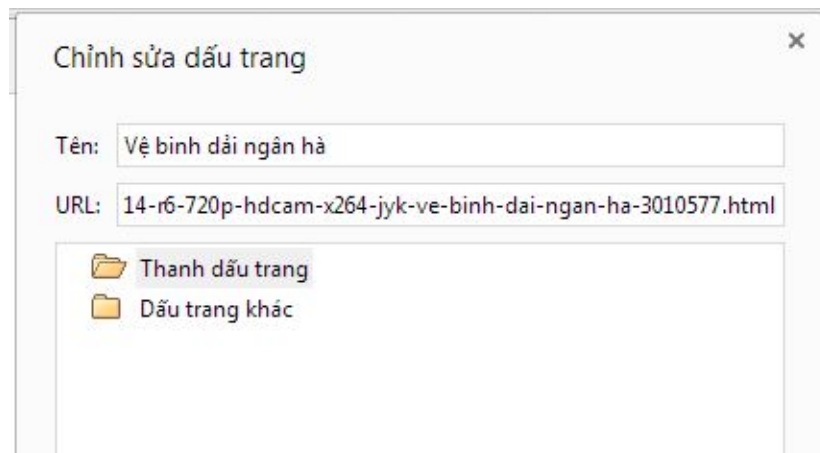

Normally when you want to compose an email, you have to go to the Gmail page. But now you can quickly compose an email and send it by entering the address bar `mailto: emailnguoinhan`, for example `mailto: phongnhansu@gmail.com`. When you do, the editor window will appear and the recipient will be filled in.

7. Open media formats, office right on Chrome.

You can completely watch videos, music, text files, PDFs . with Chrome by dragging and dropping them instead of having to open many other specialized software.

8. The bookmarks bar is more visible

If your bookmarks bar is closed and you still want to show it, just right-click on the bookmarked pages and click **edit** .

In the **Name** section, you can delete them or place them very short, then, your bookmark only one icon and bookmarks bar will have more room to show.

9. Turn off Flash to increase stability for Chrome

Many websites now support HTML5, but some still need Flash. For Chrome to work more stable, you should turn off Flash, when going to the required websites, we can turn it on immediately. First, type in the *chrome* address bar : `// settings / content` , scroll down to **Plug-in** , select **Click to play** , then click **Finish** . When you visit sites that need Flash Player, you just need to click on its icon to activate.

10. View Offline website by opening cache on Google Chrome

If you want to view a website that is offline or inaccessible, you can view it on the Google cache by typing in the Cache address bar: before that site, you will be taken to the cache of Google, if available.

Hopefully with the above tips, you will make the most of the power of this browser. Good luck.
