

10 utilities on Chrome you should not ignore

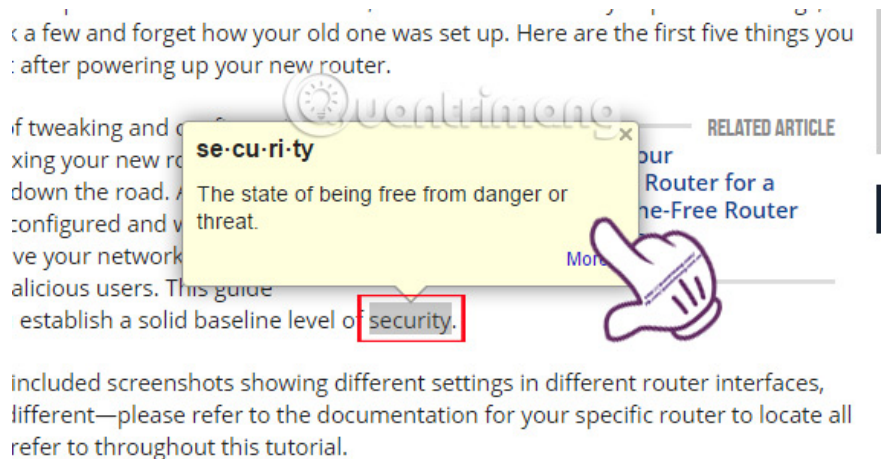

Google Chrome is currently the most popular browser for many users. Besides the pre-installed utilities on the browser will also help users experience many attractive features.

Along with web browsers, Google Chrome is currently used by most people. In addition, the rich utilities installed on the browser also make Google Chrome "more favorable" to users. These utilities are completely free, the installation process is fast, supporting users with different tasks or other attractive features. However, among hundreds of thousands of utilities on Chrome, what are the utilities to use? Please read the following article of Network Administrator to search for useful utilities on Chrome.

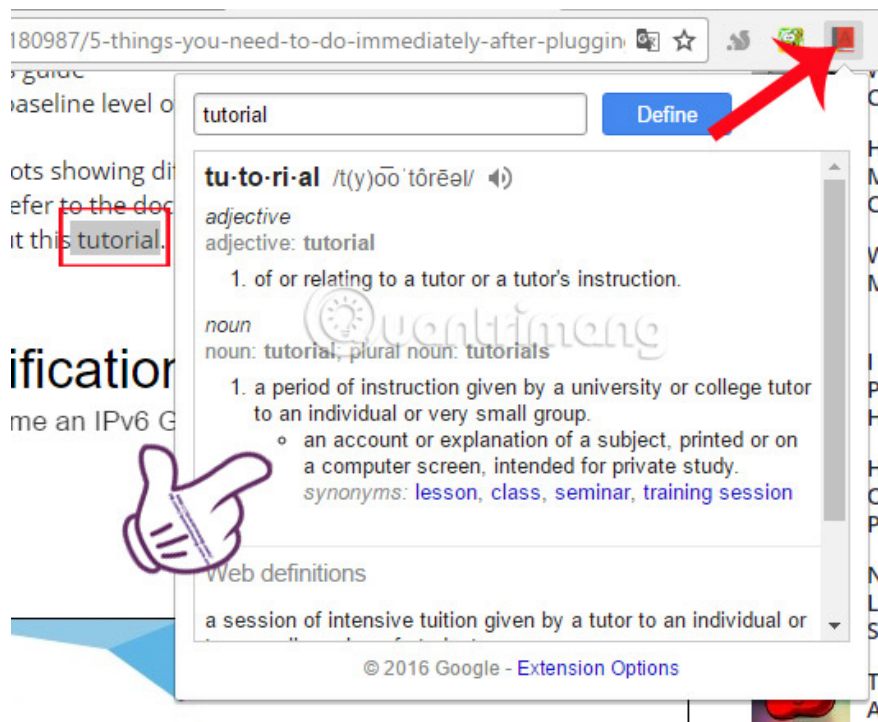

1. Google Dictionary gadget:

1. Download the Google Dictionary utility

Although there is automatic translation on Google Chrome, however, if you use the Google Dictionary utility, it will be much more useful, especially for those who regularly and like to read English documents and articles.

When we proceed to install the browser, the dictionary feature is automatically activated and you just need to open some English website to experience it. When we want **to look up the definition of a word**, we just need to **double click the left mouse button from that word**. In addition, you can also highlight the word you want to check, then **click on the icon of the Google Dictionary utility** on the interface, so you can better understand the word and pronunciation.

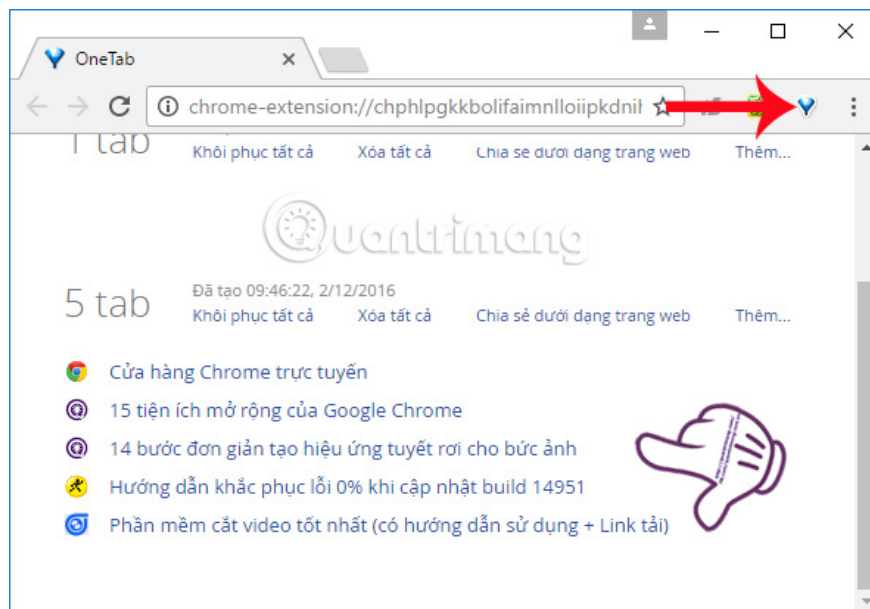

2. Utility Tab Wrangler / One Tab:

1. Download the Tab Wrangler utility
2. Download the One Tab widget

These two utilities will help users to save memory when opening multiple tabs on the browser, as well as reduce the lag and disorder when opening multiple tabs.

When we open multiple tabs on the browser, just click on **the icon of the OneTab utility**, for example, those tab windows will be saved to a list. And when you want to access the site, just open that list. It will be easy to manage when we need to do a lot of work on different websites.

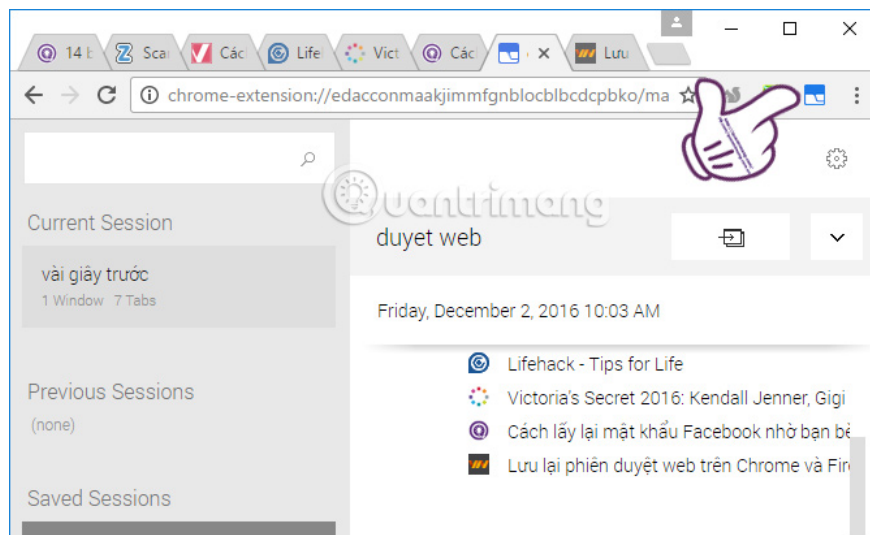

In addition, if your computer suffers from stuttering or lag when accessing the site in Chrome browser, you can use tricks to speed up Chrome browser or use Great Suspender to prevent RAM in Chrome browser. .

3. Session Buddy utility:

1. Download the Session Buddy utility

Like OneTab, Session Buddy will also group tabs into a list for us to manage. No need to use the traditional bookmark feature, users just need to **click the Session Buddy icon** to save their browsing session.

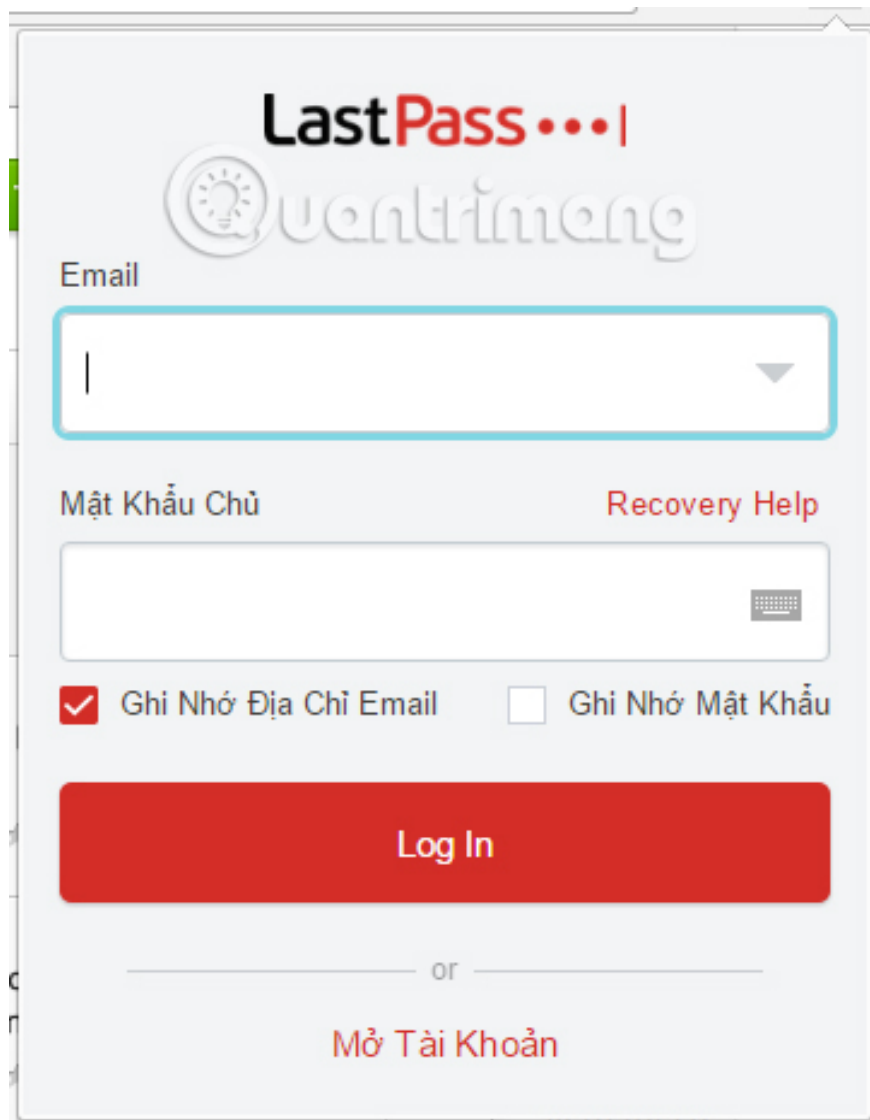

4. LastPass utility:

1. Download the LastPass utility

If you often have to log in to online services and need to remember your password, LastPass account will help us do that.

LastPass will help us manage all passwords on any website, then save and organize them in different groups, like social networks, jobs, . When you log in to those sites then the password will be automatically filled in without us having to enter any password. However, to be able to use LastPass, users need to register and create an account.

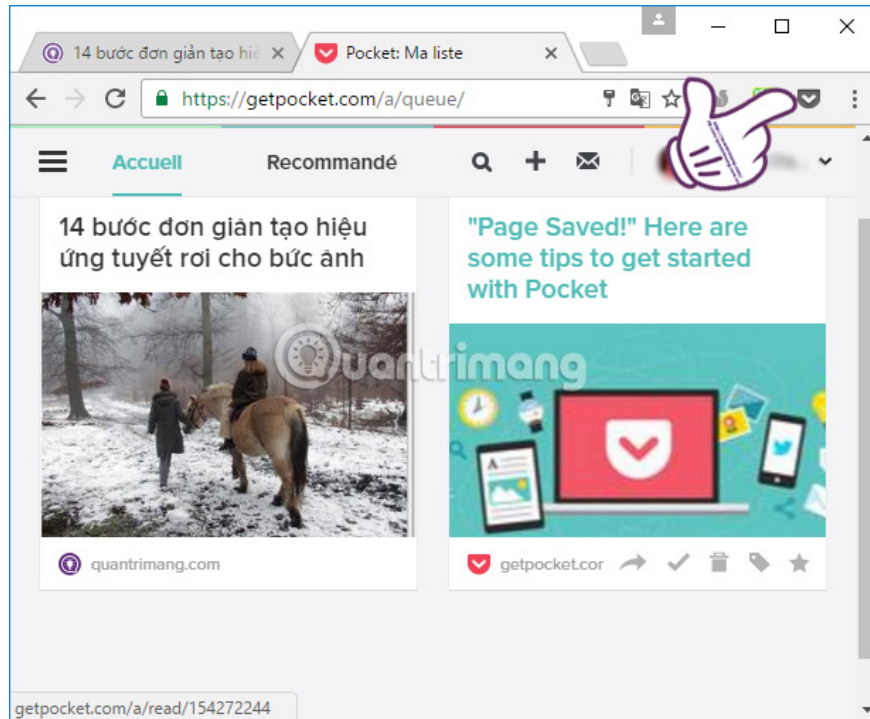

The image shows a web browser window displaying the LastPass login interface for the website 'Quantimang'. At the top, the 'LastPass' logo is visible in red and black, followed by the 'Quantimang' logo in a light grey font. Below the logos, there is an 'Email' label and a text input field with a dropdown arrow on the right. Underneath the email field is the label 'Mật Khẩu Chủ' (Main Password) and a red link for 'Recovery Help'. A password input field with a keyboard icon on the right is positioned below the password label. Two checkboxes are present: 'Ghi Nhớ Địa Chỉ Email' (checked) and 'Ghi Nhớ Mật Khẩu' (unchecked). A large red button labeled 'Log In' is centered below the checkboxes. At the bottom, there is a horizontal line with the word 'or' in the center, and a red link labeled 'Mở Tài Khoản' (Open Account) below it.

5. Save to Pocket utility:

1. Download the Save to Pocket utility

This utility will help users to save their favorite websites and can read them whenever you want. When we want to save any web page, just **click on the Save to Pocket icon** in the browser. The article will be saved on Pocket. And when you want to read the article again, just click on the article on the list of Save to Pocket. We won't need to waste time browsing the browsing history or saving to bookmarks. And to use Save to Pocket, you need to log

in through your Google account.

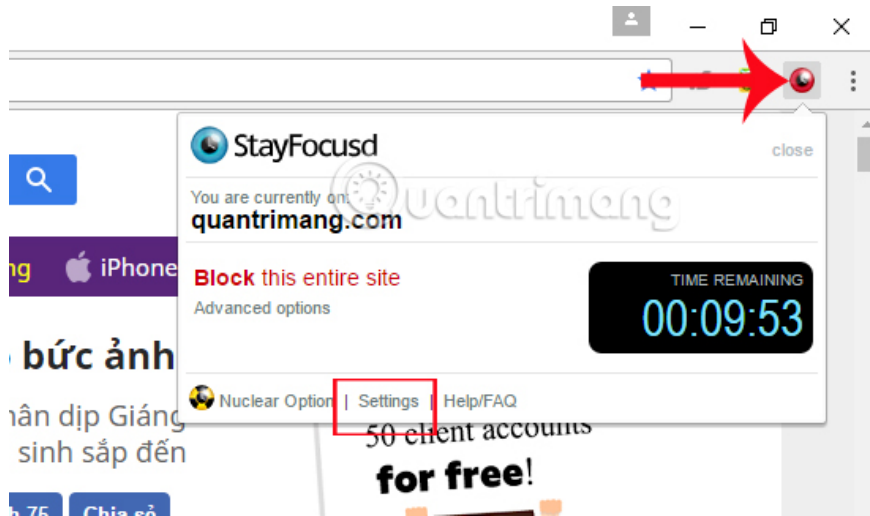

6. StayFocusd utility:

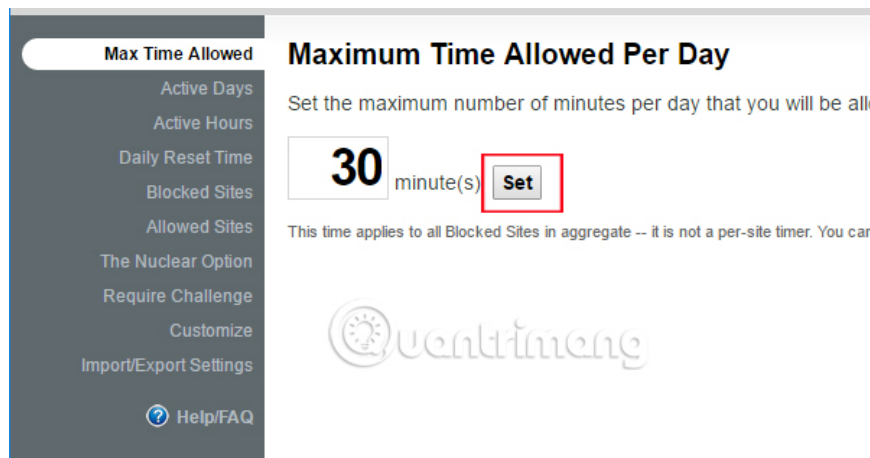

1. Download the StayFocusd utility

StayFocusd helps users to focus more on their work, when access time to other websites. For example, if you are easily distracted when surfing Facebook, you can extend Facebook access time within 1 hour / day. Once the Facebook access time has expired, you will no longer be able to log in, until the next day with the same time.

Visit a website, **click the StayFocusd icon**, and click **Block this entire site** to extend the access time. Click Settings to change the access time for the website.

On the **Settings** interface, you can optionally access time for websites, with different durations. Click **Set** to set the time.

7. Candy utility:

1. Download the Candy Chrome utility

This utility will help those who search for online documents for a discussion, when arranging documents in a topic thread. From there, users can follow and easily search for documents.

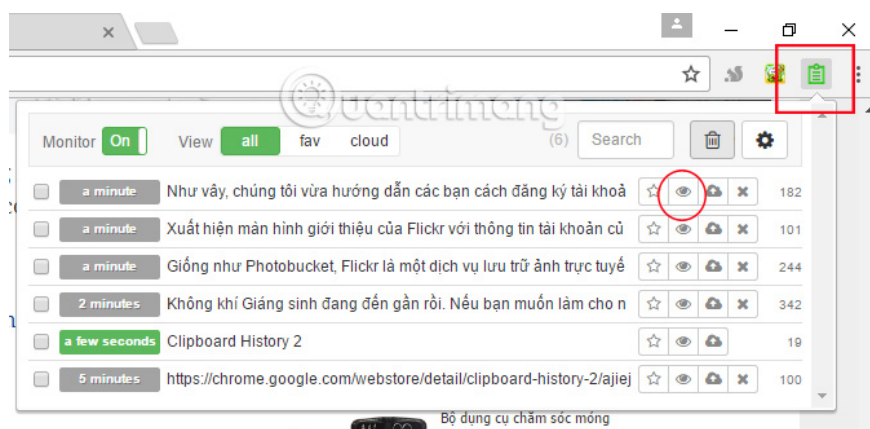

8. Clipboard History 2 utility:

1. Download the Clipboard History 2 utility

You probably copied this content many times, but mistook it for other content. And normally there is no way to save the copied part as the Clipboard on the phone. Therefore, Clipboard History 2 will help you get back the copied content.

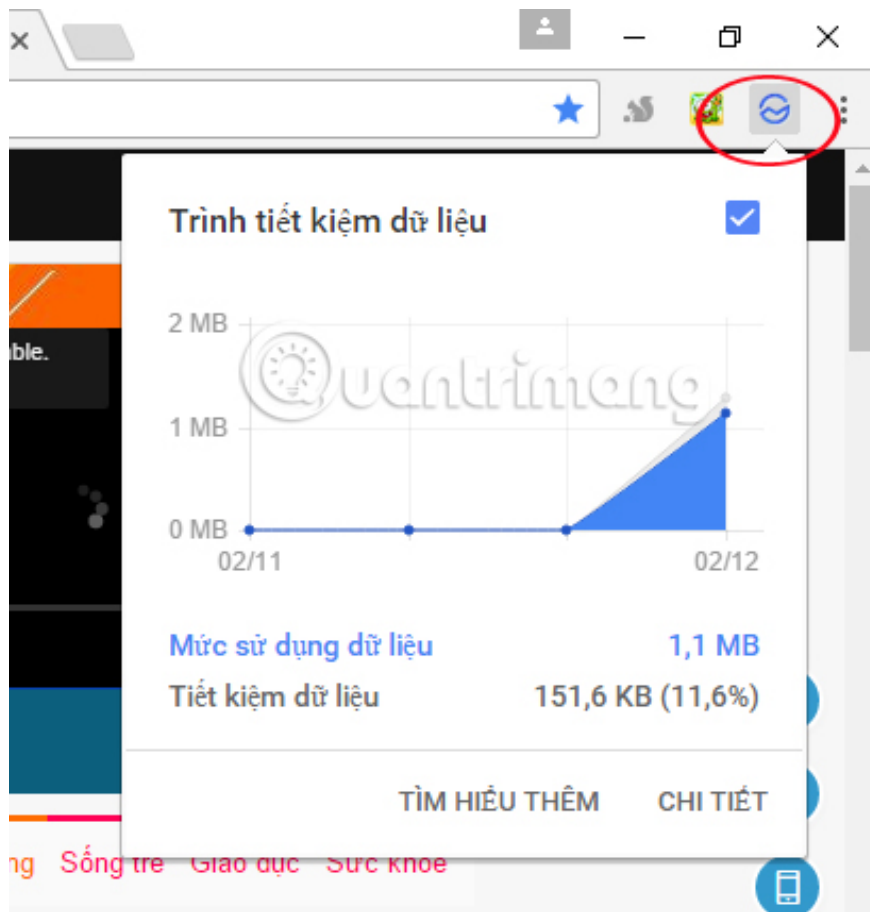

Just copy any content and copy it at once. Then, click on **the icon of Clipboard History 2** on the browser, the list of content clicked Copy will appear. To see the content, press **the eyes icon**.

9. Google Data Saver utility:

1. Download the Google Data Saver utility

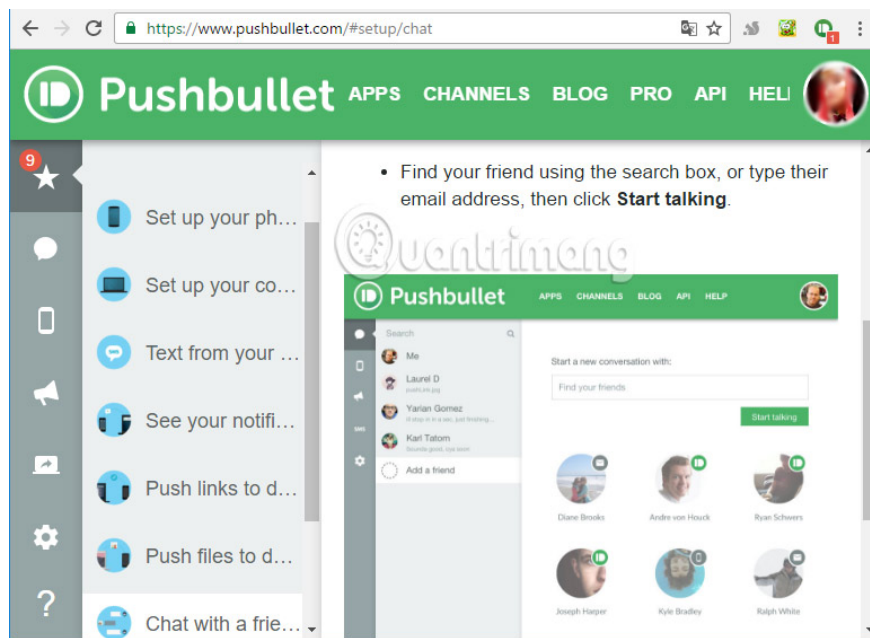

This utility will help users save space when accessing web pages in the browser. The utility will reduce data usage when using Google's servers to optimize access pages.

10. Pushbullet gadget:

1. Download the Pushbullet Chrome gadget

Pushbullet will gather all social networking applications into a list so users can reply to messages quickly, without having to open the application. The utility will sync those applications even SMS into one place to be able to send messages quickly, right on the browser interface. After installing, please log in with your Google account so you can use Pushbullet.

The above are 10 attractive utilities on Chrome browser. Each utility brings you new experiences, other useful management features, enabling users to use Chrome browser more effectively. Find and install yourself the Chrome add-ons in the list above.
