

10+ video cutting / joining applications on phones

Introducing 10 free video cutting / joining applications on your most used phone, suitable for any phone you are using.

Currently, the editing, video collage has become a lot easier with the support of applications, video editing applications. However, not all applications are good, free and easy to use. Here are the top 10 best apps for your reference.

1. VivaVideo

One of the most popular free video cutting / joining applications on mobile is [*VivaVideo*]. Currently, this application has more than 200 million users worldwide

This is an easy-to-use application with a simple interface, users can easily create videos that capture everyday moments then share with family, friends or on social networking sites.

In addition to the ability to cut / merge images beautifully, quickly and simply, VivaVideo also equipped with many other useful functions such as:

1. Create titles and motion effects for each video
2. Has many advanced features when recording videos such as slow-motion effects, or fast-motion recording with fast-motion.
3. Good projection ability can adjust fast and slow arbitrary
4. Export videos to your phone quickly and easily.

2. Videoshow

If you are a fan of taking photos and videos on your phone and often share them with your friends, then [*VideoShow*] will be a great choice for you.

VideoShow promises to bring users the professional video editing experience that not all applications have. With Videoshow, you can easily create impressive and attractive videos and amazing effects.

The software is equipped with a lot of useful features as follows:

1. Add text, music to the video
2. Add beautiful effects to videos with 10 filters including Beauty, Sepia, Sketch, etc.
3. Create movie effects, music, cut and export files.
4. Edit video synthesizer, "mix" videos and photos together
5. Fast, slow motion for video

And there are many other features waiting for you.

3. KineMaster

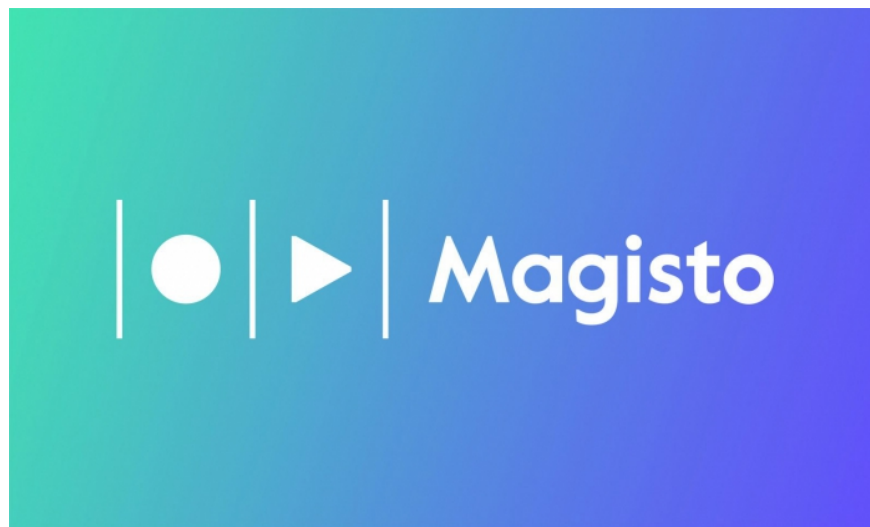

Currently, [*KineMaster*] is a video editing application that is popular with many young people because it is the only professional video editor with all the features needed for your phone but it is completely free. .

The software is very smartly designed, giving you a timeline of videos to help you easily manage the content to be cut and joined just like professional video editing applications on your computer.

KineMaster also possesses all the functions you need when editing videos such as cutting, stitching, creating multiple layers of videos, images with effects, color correction, contrast, light and even transitions. 3D. Along with that are countless light filters, sounds, transitions on the KineMaster app store.

With KineMaster, you can become a skilled video editor with expensive movies.

4. Magisto

Referring to the best video editing / *collageing* applications on the phone, we can't ignore the name [*Magisto*]. It is a quick and easy to use photo and video editing and photo editing application and it is suitable for a wide range of audiences.

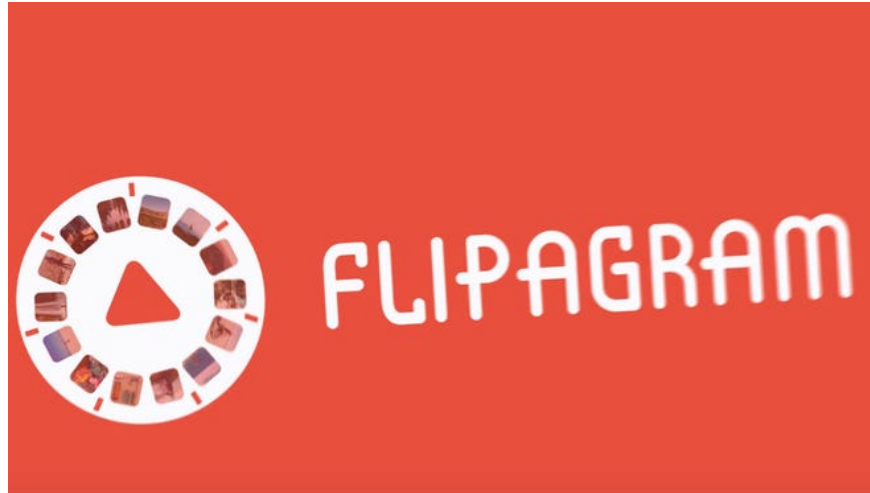

Thanks to the integrated intelligent tools, emotional judgment utility on the video, Magisto helps users can create extremely eye-catching and unique video footage.

The highlight of this application is to equip a lot of different topics for each scene, such as memories (memories), storyteller (storytelling), dance (dance), . for users. You can choose the most suitable video topic. Each topic will correspond to the appropriate music track.

Magisto will be the ideal choice for you if you want to find a video transplant application on your iPhone or Android device. Especially for those who want to create their own style-free movie clips.

However, the limitation of this application is that it must be posted on a personal account before downloading videos to your device. And you only create videos under 1 minute only, if your video is over 1 minute, the application will ask you to upgrade to a paid version of Pemium.

5. Flipagram

Add another video cutting / joining application on the phone that Freetuts would like to recommend to you is [*Flipagram*]. This is a professional, multifunctional and especially free video design application.

Flipagram is very popular with young people because of its beautiful interface, easy to use with video editing tools aimed at dynamic young people.

The software also allows users to easily express themselves, create on each frame, text and background music. With just a few taps, there is an attractive video that brings every beautiful moment in life.

Highlights of Flipagram are:

1. Integrated instant preview mode: see your Flipagram every time there is a change.
2. Display optional titles with a variety of fonts
3. Add music to videos from personal library
4. Ability to adjust the start time of music playback
5. Equipped with countless effects, different filters
6. Ability to repeat, delete or crop arbitrary photos.
7. Adjust starting point with background music.
8. Display video duration.

Similar to the Magisto application, the limitation of Flipagram is that after creating the video, you must post to your personal page to download the video to your device.

6. VidTrim

[*VidTrim*] is known as one of the most professional video processing applications currently on the phone. According to many reviews, VidTrim PRO has the interface and features quite similar to KineMaster application.

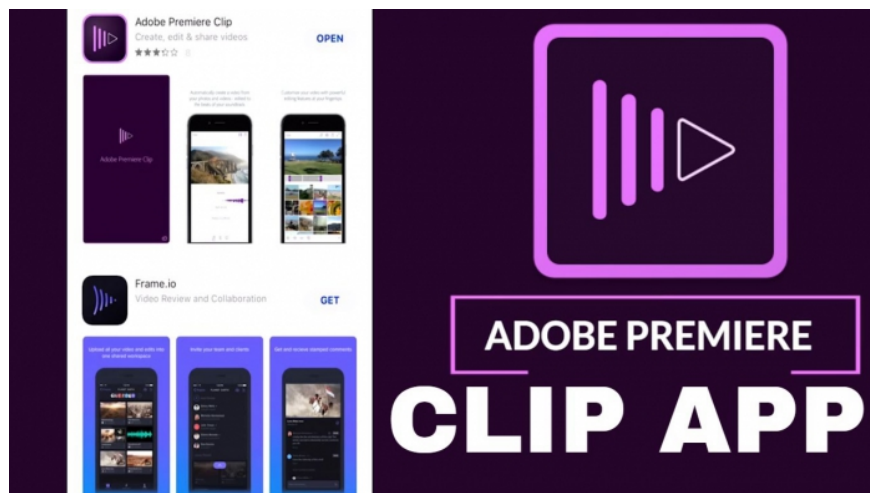

VidTrim is equipped with many features such as *cutting video, separating or using filters for videos, applying effects, extracting audio from videos into MP3 files*. You can even share your videos with your friends directly through the app.

The interface of the application is very simple, the usage is easy, the video export is also processed very quickly and conveniently.

In addition, VidTrim is a very effective video conversion solution that allows converting videos to MP4, resizing and compressing videos.

The only regret of this application is that it only works on Android operating systems only.

7. Adobe Premiere Clip

[*Adobe Premiere Clip*] is the next name that you should choose when you want to edit and edit images and videos to share them with your loved ones.

Currently, this application is well known for its ability to edit professionally, quickly on all devices from smartphones to tablets with the editing process is very simple and completely free.

Adobe Premiere Clip integrates a lot of powerful features such as video collage, insert music, adjust the volume, increase and decrease the brightness, color for the video, change the playback speed .

The highlight of this application is that it allows users to customize the speed of videos, background music and features that automatically balance between videos and music to avoid excessive music. fast or too slow.

In addition to the free version, Adobe Premiere Clip also has other versions that charge with more advanced features for users.

8. LapseIt

Picture 8 of 10+ video cutting / joining applications on phones

[*LapseIt*] is also one of the high quality video editing and collage applications on mobile phones and is used by a lot of people. This is a free app for users on Android and IOS.

The most difference of this application compared to the remaining applications is equipped with mobile timelapse feature. With this feature, you can share them on different social networks very quickly and easily.

In addition to the basic features, LapseIt also has many interesting editing features, such as user-friendly clip editing system, background music effects and unique filters. Besides, this application also allows users to select processes that can help the editing process take place as fast / slow as you want.

9. FilmoraGo

Add an application that you should not ignore if you want to edit, collage images to create beautiful and in a short time it is [*FilmoraGo*].

This software allows users to edit videos with many features such as: combining subtitles and related texts, increasing speed, as well as performing color alignment for clips.

In addition, FilmoraGo also features the ability to add your favorite music to videos along with hundreds of visual themes and effects. Various filters to create interesting and unique videos .

10. Vizmato

The last piece of video cutting / joining software that I would recommend to you is [*Vizmato*]. This is a software equipped with many useful features and the ability to edit videos quickly and professionally so you can create extremely attractive and different videos.

The salient features not to be missed of Vizmato are:

1. Cut, join, filter, effects for video
2. Equipped with animated image generator capable of exporting images from videos
3. Adjust the voice with many different effects
4. Share videos to social networks easily
5. Add appropriate text and background music in the video

In addition, Vizmato also has a repository of user uploads that allow new members to discover and learn from top videos.

Above are 10 video cutting / joining software on your phone that will help you to create and make extremely beautiful and impressive videos but requires no experience or cost. Hopefully you can choose for yourself a suitable video editing application. I wish you success!
