### **Note when setting up:**

When you have an idea for setting up a computer corner, you should write it down to avoid forgetting or for reference.

The setup should be optimized from the wiring in advance to be neat and convenient.

You should combine the device with the same color tone, for example, the same white tone, from which you will see that painting the same color tone as the case will highlight the device quite a lot. Or the LED light with the same color as the computer's LED when decorating outside is the same.
