

11 cool Samsung Galaxy S21 tips and tricks

Samsung Galaxy S21 is one of the hottest products of Samsung smartphone today. The following article is to show you 11 great Samsung Galaxy S21 tips and tricks that you should know.

1. Turn on effects for video calls

Video calling is no longer too strange for us, you can easily meet relatives and friends at any time with just one video call. Samsung Galaxy S21 launched a series of great effects when making calls to increase the appeal, more vividly for each call.

To set up call effects, simply select Settings> Select Advanced features> Select Video call effects> Choose the effect you like.

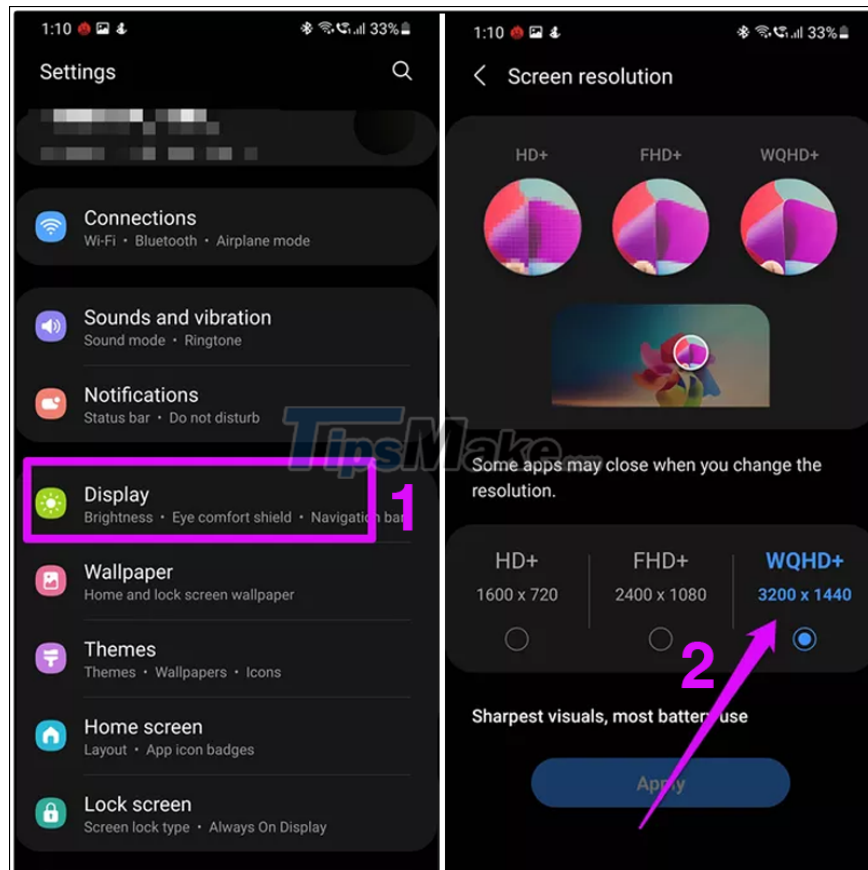

2. Smoother screen setup

Unlike Galaxy S20 or Galaxy Note 20 and earlier, Samsung Galaxy S21 excels in using QHD resolution technology (short for Quad HD or 2K, 4 times clearer than standard HD, corresponding to the 2,560 x 1,440 pixel resolution).

Thanks to this special technology, the screen of the Galaxy S21 phone will be much sharper and more vivid.

To open the QHD resolution mode, choose Display Settings> Select Motion Smoothness> Select Adaptive> Scroll down to select Screen Resolution. > Select WQHD.

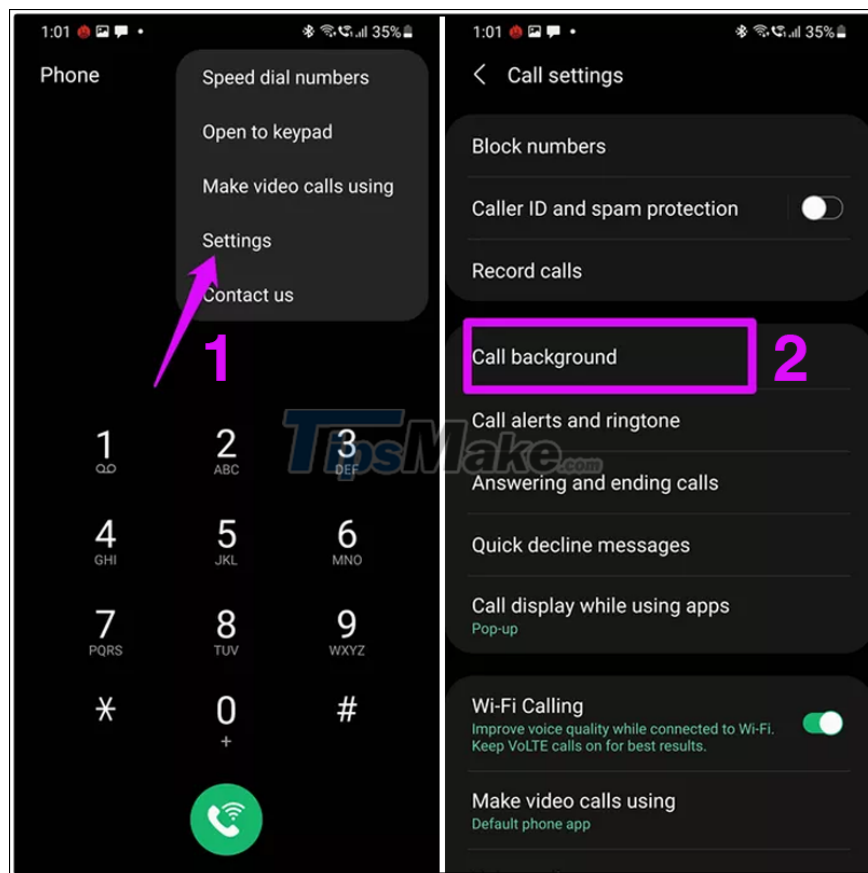

3. Change the call background

For current phone lines, when receiving a call or making an outgoing call to someone, the phone will display the wallpaper that you have pre-installed. But with Samsung Galaxy S21, not only are pictures but you can also use live wallpapers for your calls.

To set live wallpaper, you just need to select the name of the person to install the wallpaper> Select the 3 dot button> Select Settings.

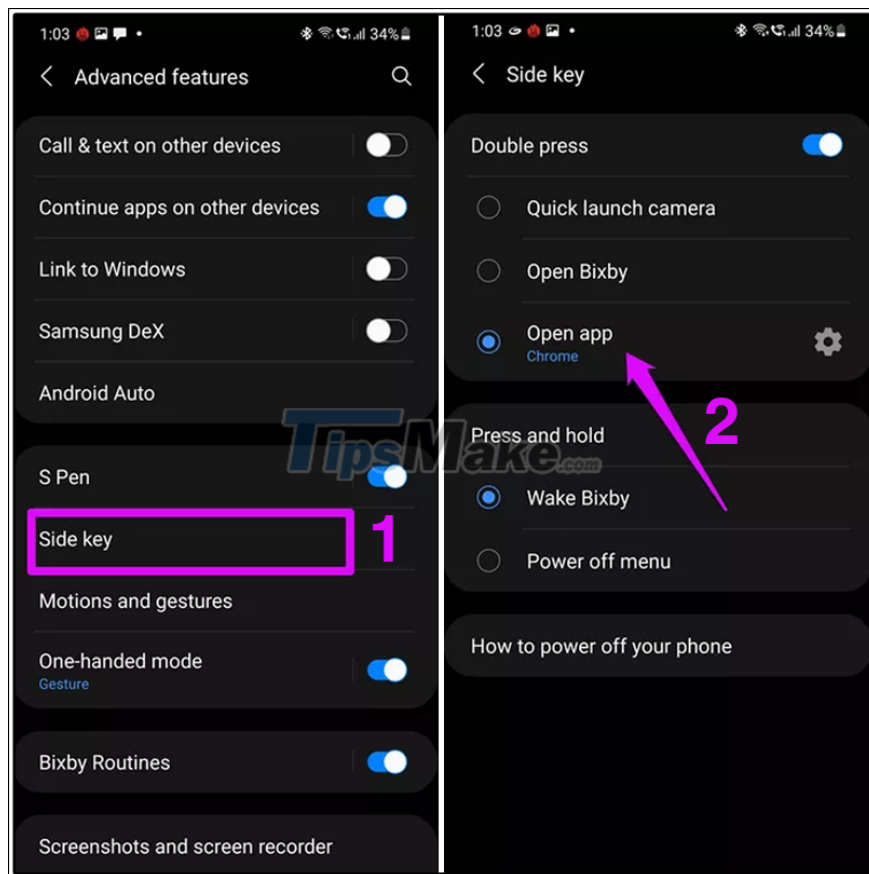

Then select Call background (Call background)> Select Wallpaper (Background)> Select the video you want to install.

In addition, you can also add the background video you like by clicking the "+"> Select the background video you like.

4. Customize the Side key

Samsung Galaxy S21 is designed to allow users to use extra magic while surfing the phone. For example, double tap to open the camera, long press to open Facebook , and other actions are up to you.

To activate the secondary key, you need to go to Settings> Select Advanced features> Select Side key.

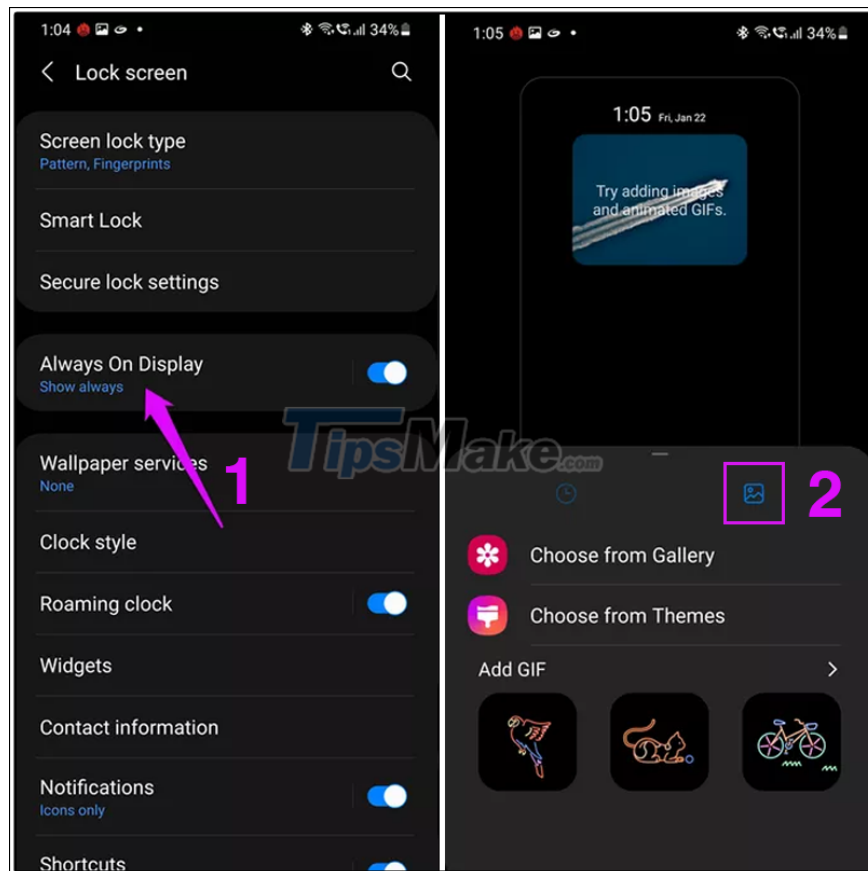

Under Double Press> Select the action you want when double-clicking the screen. Similar to the remaining items.

5. Customize the screen with many effects

One of the prominent features of the Galaxy S21 series is the setting of effects for the standby screen. Similar to the laptop or PC , when you don't interact with the device for a certain time, the screen will go to standby mode and show the custom wallpaper before.

You can also set up wallpapers for your phone to suit all categories such as images, GIFs, custom colors, . You need to go to Settings> Select Lock Screen> Select Always-on Display> Swipe left on Always On.

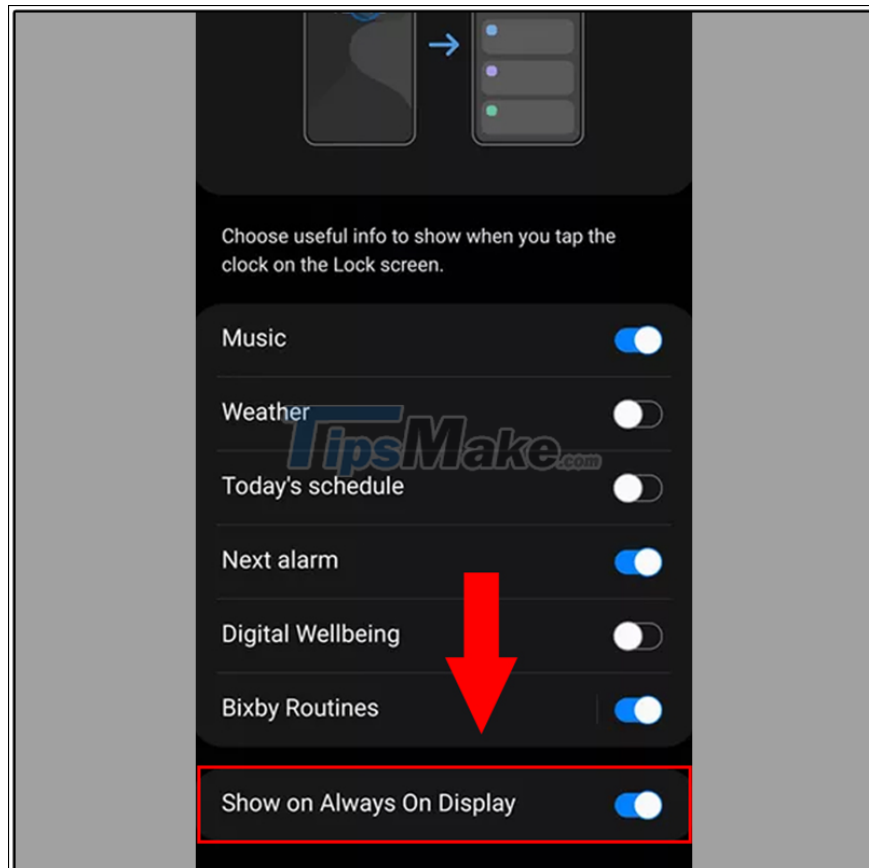

Once done, choose the Clock Style section below> Select the clock style and color you like> Select the Image icon> Select the picture you want to set as the standby wallpaper.

6. Activate Widget on lock screen

Samsung Galaxy S21 allows you to enable widgets right on the lock screen. You can follow weather forecast, reminders, notes, . right on your lock screen.

To activate this feature, open Settings> Select Lock screen> Select Widgets> Swipe right to activate the tasks you want to show on the lock screen.

7. Auto subtitle creation feature

Subtitles are an indispensable part every time we watch foreign movies or shows. For Samsung Galaxy S21, subtitles will be created automatically whenever you open a video on your phone like Youtube , Netflix or even a video from your image library.

To activate this feature, you need to press the volume button> Select Expand icon (down arrow)> Select Live Caption.

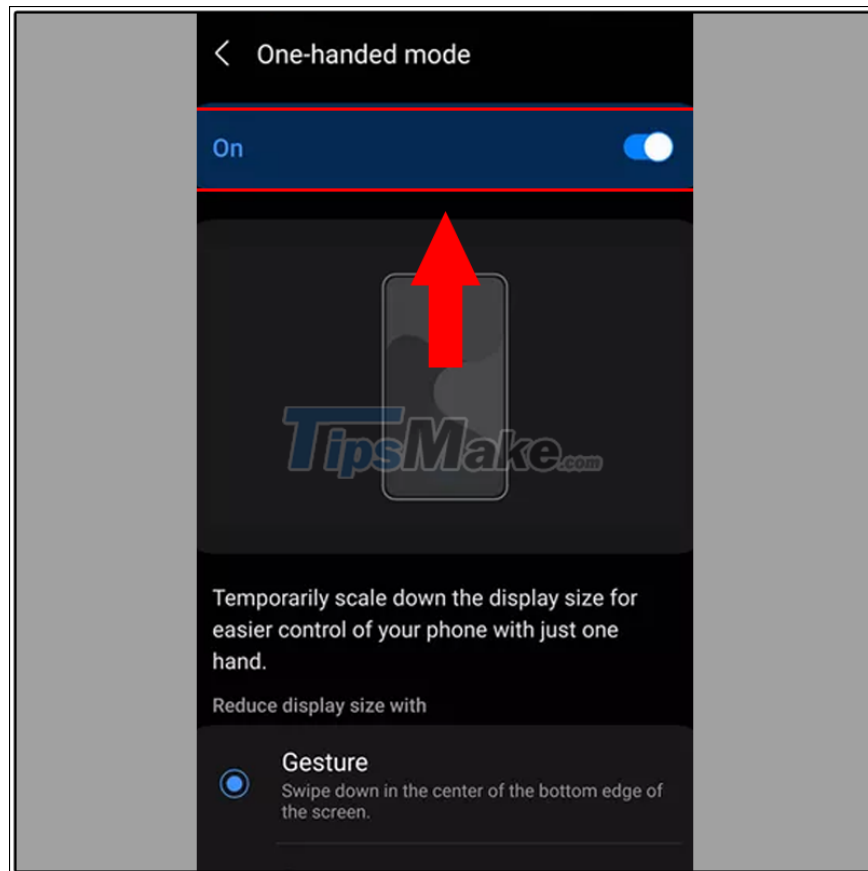

Note, however, that live subtitles will not render as fast as built-in subtitles.

8. Activate One Handed Mode

Phones these days are usually quite large, the Samsung Galaxy S21 is no exception. To make it easier for users to use, One-handed Mode is available. This mode allows you to use the phone with just one hand without obstructing the problem of the phone screen being too large.

To enable this, go to Settings> Select Advanced features> Swipe to the right of the On-handed switch under One-handed mode.

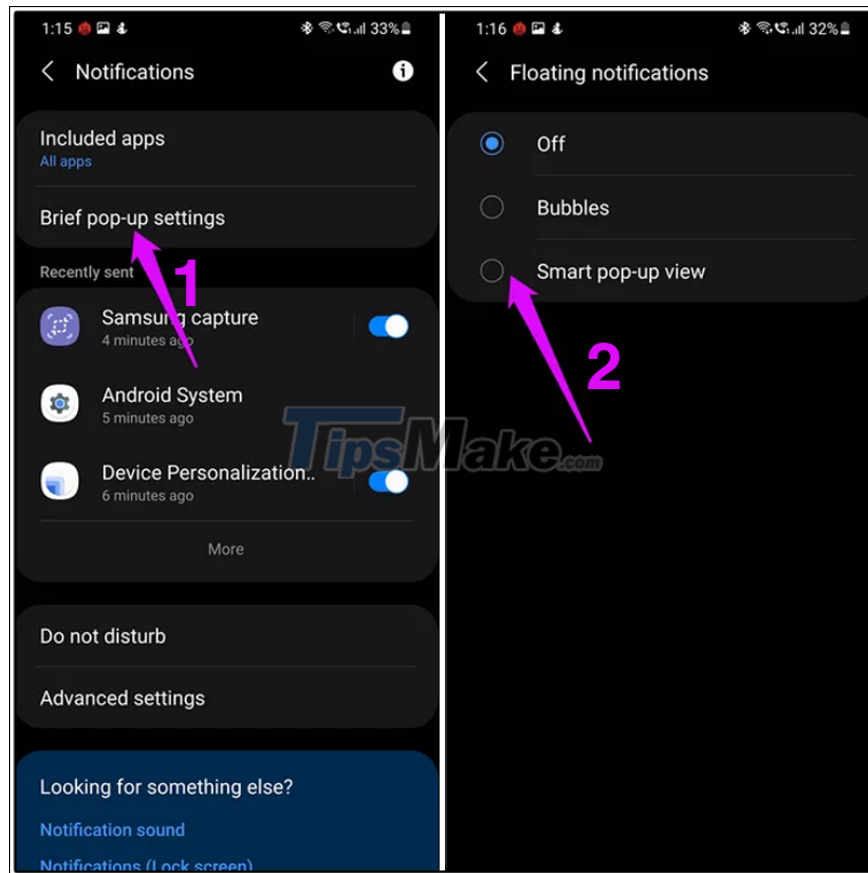

You can now make settings for this mode depending on how you want to use it, you can either move the window around or resize it, to your liking, .

Once done, tap the Home button twice to activate it.

9. Set up Floating Notifications

The next outstanding feature is interaction with floating notifications. You can swipe down the notification to open a floating window for it easily.

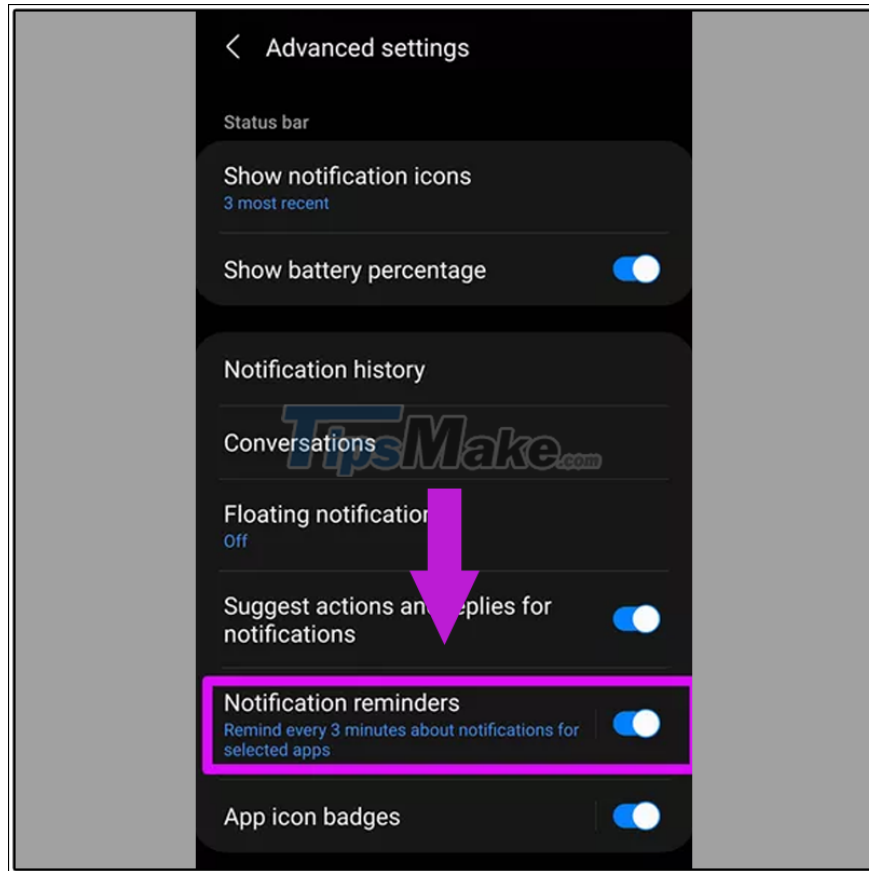

To activate, you need to open Settings> Select Advanced settings> Select Floating Notifications> Select Smart pop-up view.

10. Set reminders for notifications

Sometimes because there are too many notifications we often accidentally delete them, but don't worry Samsung Galaxy S21 will remind you of notifications that you accidentally ignored them.

Just open Settings> Select Advanced Settings> Select Notification settings> Swipe right on the Notification Reminders switch> prompt for the application.

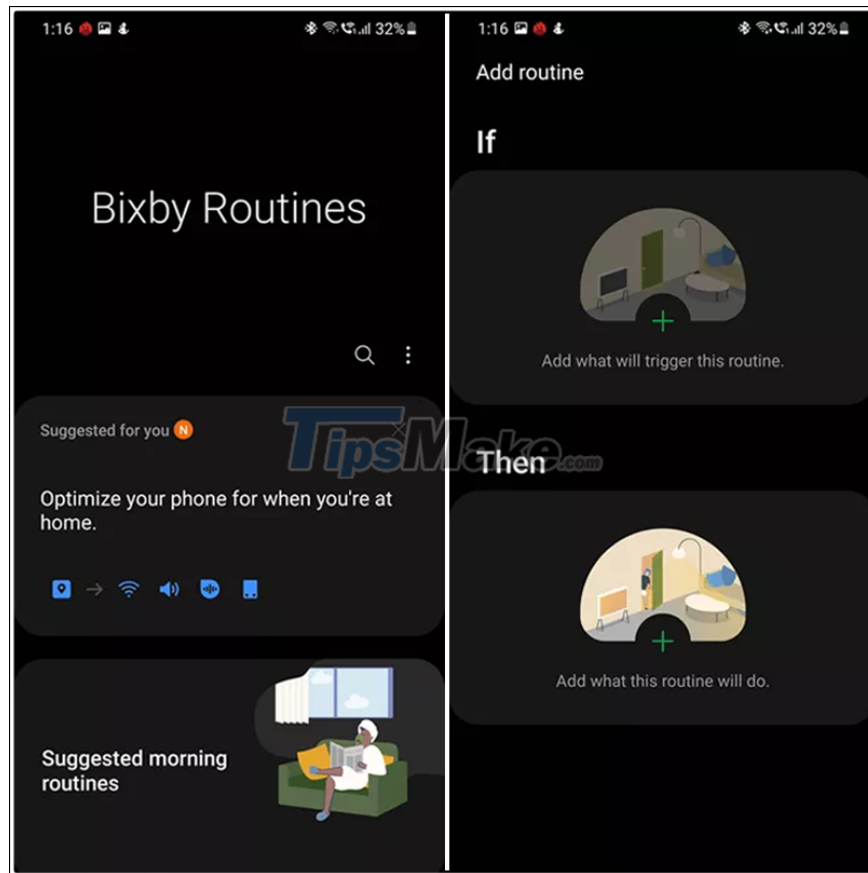

?

11. Build good habits with the Bixby app

Compared to Google Assistant or Siri, Bixby might not reach that stature, but it still has its own potential.

You can build good habits for yourself with Bixby Routines. Bixby Routines will show you what to do for a day.

To install Bixby Routines, open Settings > Select Advanced features > Select Bixby Routines.

You will then select the suggested items or fill in the blanks according to your requirements. You can also create your own routine from scratch by clicking the "+" icon in the top right corner of My Routines.
