

# 11 job applications in English for IT people

Please refer to 11 application forms in English for Information Technology major in the article below!

1. Top 10 common errors to avoid when hunting online
2. Having these technology skills in your CV, you will be sure of the 'ticket' in the interview round
3. Write a more professional CV with LinkedIn's new Resume Assistant feature

Surely many of us think that **CV** - ie **curriculum vitae** - and **resume** means a **resume** , a summary of an individual's work history? However, there are differences between them. **Resume** aims to convince your skills and work experience in a convincing way, while **CV** presents academic achievement with the qualifications you have earned in exams.

A Resume will direct employers to know what skills and experience you have, especially if they match **the job criteria** they require in their candidates, especially in your case. Must compete with other talented candidates in the upcoming interview.

Although Resume is not a complete way to provide all the necessary information, it is still a typical means of persuading employers to choose a suitable candidate. Therefore, you need to show your skills, experience and career goals in the most impressive way to be able to quickly enter the employers ' *blue eyes* ' .
