

11 laptops will shine in 2009

Laptops predicted by PCWorld will shine among the series of laptops introduced by Asus, Lenovo, Dell ... at the CES electronics technology exhibition that has just taken place in Las Vegas (USA).

Laptops predicted by *PCWorld* will shine among the series of laptops introduced by Asus, Lenovo, Dell . at the CES electronics technology exhibition that has just taken place in Las Vegas (USA).

Lenovo ThinkPad w700ds

In the light of a thin, light laptop, the ThinkPad w700ds is a huge but reasonable product. It is a laptop for graphic people and professional image processing. Not only is the 17-inch screen large, this product also has an extra 10-inch screen. Especially, this laptop is also equipped with 4-core Inter Core 2 Extreme processor, 960GB hard drive. But the price is quite expensive: \$ 3,700.

Sony Vaio P

Sony Vaio P is considered one of the brightest at the CES 2009 exhibition. This laptop belongs to the netbook line, which uses an Atom processor, weighing 1.4 pounds and has an 8-inch LED backlight display with a resolution of 1600x768. This Sony netbook supports GPS satellite navigation without requiring an Internet connection. This product is expected to be released later this month with a US market price of US \$ 900.

Dell Adamo

The Adamo word in Latin means 'to fall in love'. This is Dell's first product to enter the laptop market for aesthetics. Instead of plastic, Dell chose an alloy case in two colors: light gray and black. This laptop has a 13.3-inch screen, which is expected to hit the market in the first half of this year. More specific technical details about the product and price are still a secret.

Asus Bamboo Series (11-inch)

Not a new product, but Asus's Bamboo Series laptop really caught the attention at CES 2009. This product is equipped with Intel Core 2 Duo processor, with 11.1-inch LCD with light technology applied. LED background. In particular, the case of this laptop is made of bamboo, both beautiful, strange and environmentally friendly.

Asus S121

This product of Asus belongs to ultraportable laptop with 12-inch screen and 1.33 GHz Atom power-saving processor. Asus S121 weighs over 1kg, is about 1 inch (2.5cm) thick and has a beautiful design. Customers can order this laptop with a choice of 512GB SSD hard drive for \$ 1650. Asus is expected to launch this product earlier this year.

Dell Studio XPS

This new Dell laptop has two screen sizes: 13 inches and 16 inches. The 16-inch version supports High Definition Full HD (1920-by-1080) resolution, while the 13-inch version can choose between two graphics processing modes: integrated on the motherboard (save power) and discrete graphics. Both versions of the laptop support WiMAX wireless connectivity, GPS satellite navigation, Firewire, HDMI, DisplayPort, and eSATA connectivity. The selling price of both versions is \$ 1,200.

Asus Eee PC T91

Asus first brought touch technology to the Eee PC T91 laptop. Asus laptop is equipped with 1.33GHz Atom processor, 8.9 inch touch screen. In addition, this laptop screen can rotate, allowing use as a small tablet. The Eee PC T91 is expected to be available in March 2009 for \$ 500.

Lenovo IdeaPad Y650

This is a product oriented to serve those who have entertainment needs. IdeaPad Y650 is equipped with a 16-inch high definition image, speaker technology with Dolby Surround sound. Weighing more than 2kg, IdeaPad Y650 is considered quite light and has a large touchpad. In particular, this product is equipped with enough ports connecting from HDMI to eSATA; DVD burner (select Blu-ray drive instead). This product will be available in March this year for \$ 1,200.

Dell Inspiron Mini 10

The older brother of the Dell Inspiron Mini 9 is the Dell Inspiron Mini 10. Compared to the 'brother', the Dell Inspiron Mini 10 remains the same 10-inch screen size but has improved resolution, can watch high-definition movies (720p); The key on the keyboard is also larger.

MSI U120

The MSI U120 laptop also belongs to the netbook line, with a 10-inch screen, a 1.6 GHz Atom chip and a weight of about 1kg. This netbook has 1GB of RAM (can be upgraded to 2GB), the hard drive has an option to upgrade

to 320GB. Estimated prices range from 350 to 400 USD.

MSI X320

MSI X320 is a laptop that looks like a copy of the MacBook Air but is much cheaper. This laptop uses an Atom processor, weighing 1.4kg and can choose an 8-core (cell) battery that runs for 10 hours continuously. MSI said it will launch this laptop in the first quarter of this year for \$ 800.
