2. 19 beautiful pictures to "suffocate" make you think that you are on another planet, not Earth
3. See Salesforce's \$ 1.1 billion building in San Francisco

Have you ever seen unique images that make you feel dizzy, twisted brain? Let's TipsMake.com look at **11 photos of "optical illusion"** below, which will make you no longer believe in your eyes.

Infinite chocolate bar

© reddit

This 5x5 chocolate bar when cut and rearranged like the picture, you will not understand why it is redundant one piece? If you want to know, try doing so with a realistic chocolate bar to understand this tip, just seeing it with your own eyes can immediately understand why.

Illusion wooden bar

© imgur

Look at these logs. Depending on the end of the wooden bar you are looking at, it seems that they are next to each other, sometimes overlapping.

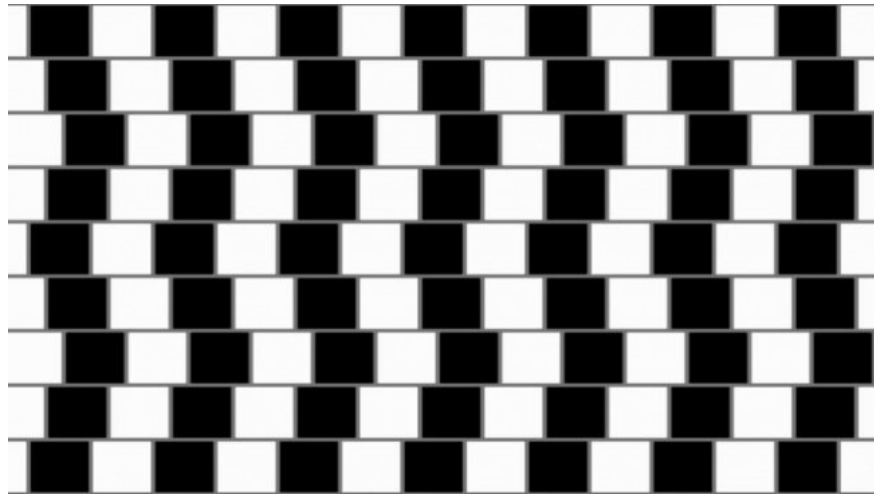

Cube and two cups are exactly the same

© Chris Westall

This is an illusion design by Chris Westall. A cup on the table and next to the cup is a cube with a smaller cup on top. However, from a different perspective, you will see that this cube is just a drawing and the other two cups are the same size. Look closely!

Picture on the wall in a cafe

© Wikipedia

At first glance, it seems that these curves curve but in fact they are parallel. This illusion figure was discovered by R. Gregory on the wall of a café in Bristol.

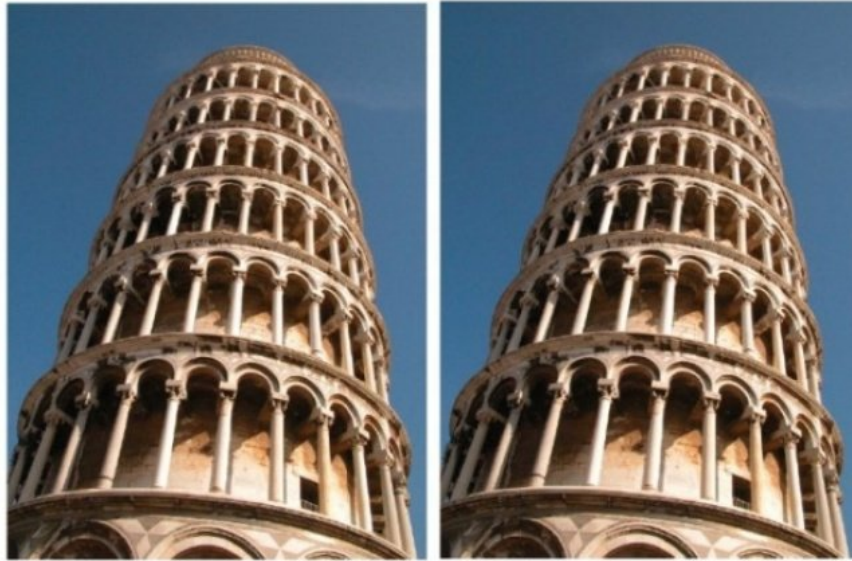

Illusion girl negative picture

© focus.de

Look at the red dot on the " *negative girl* " nose for about 30 seconds, then look quickly over the other direction or look at the ceiling, you will see that change.

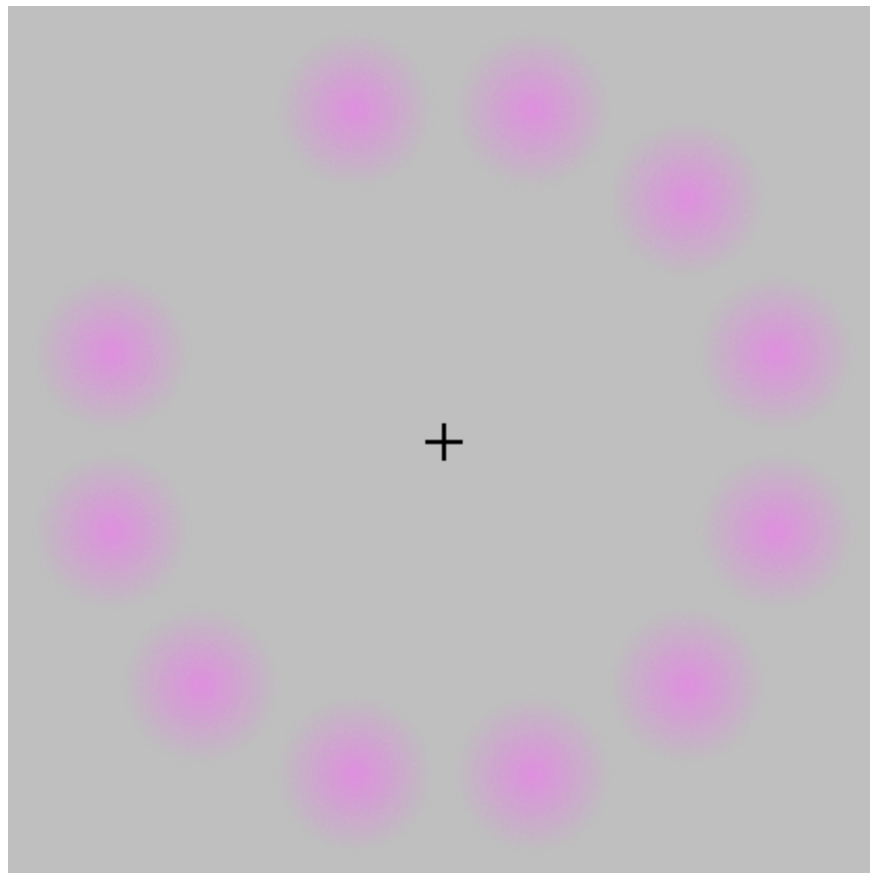

The illusion of leaning trend of Pisa tower

© 2007 Kingdom, Yoonessi & Gheorghiu

At first glance, it seems that the right tower image is tilted at a larger angle than the left image, but the two images are actually identical. Our visual system sees these two images as parts of a whole, thus making us think they are different.

The point disappeared

© Wikipedia

Each lilac color will disappear in about 0.1 seconds, moving in the same circle. If you stare at the plus sign in the center you will see a green spot running around the circle and then the mauve points will begin to disappear completely.

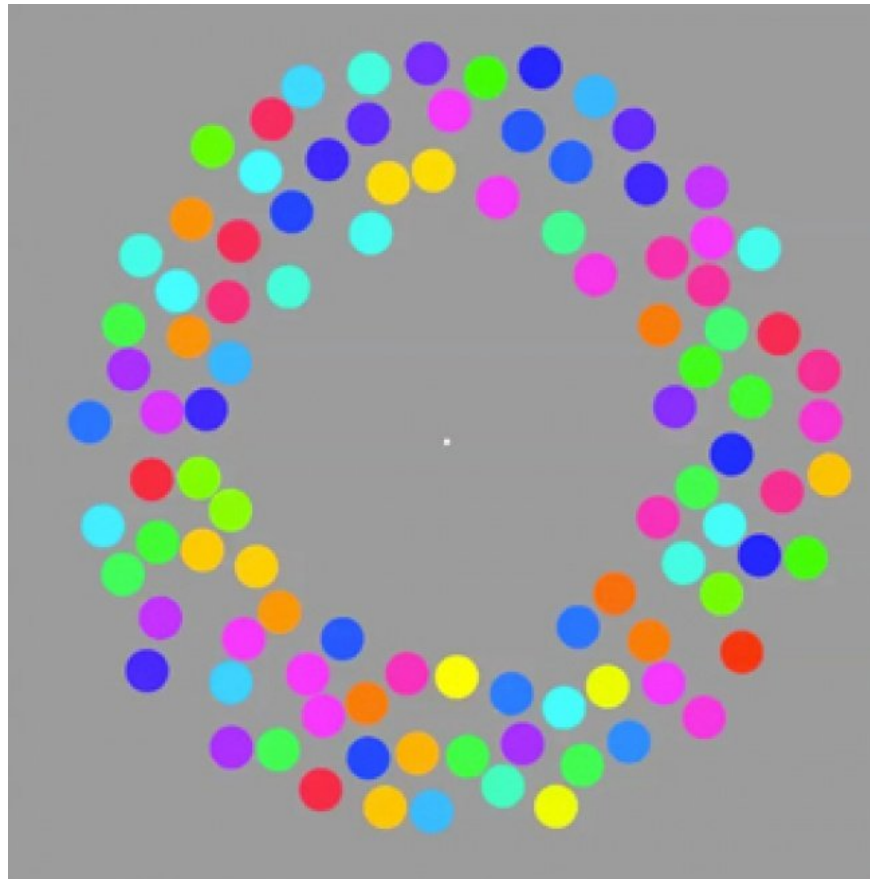

White - black illusion

© zazzle.com

Look at the four points in the center of the image, then look quickly at the ceiling, on the wall. What do you see?

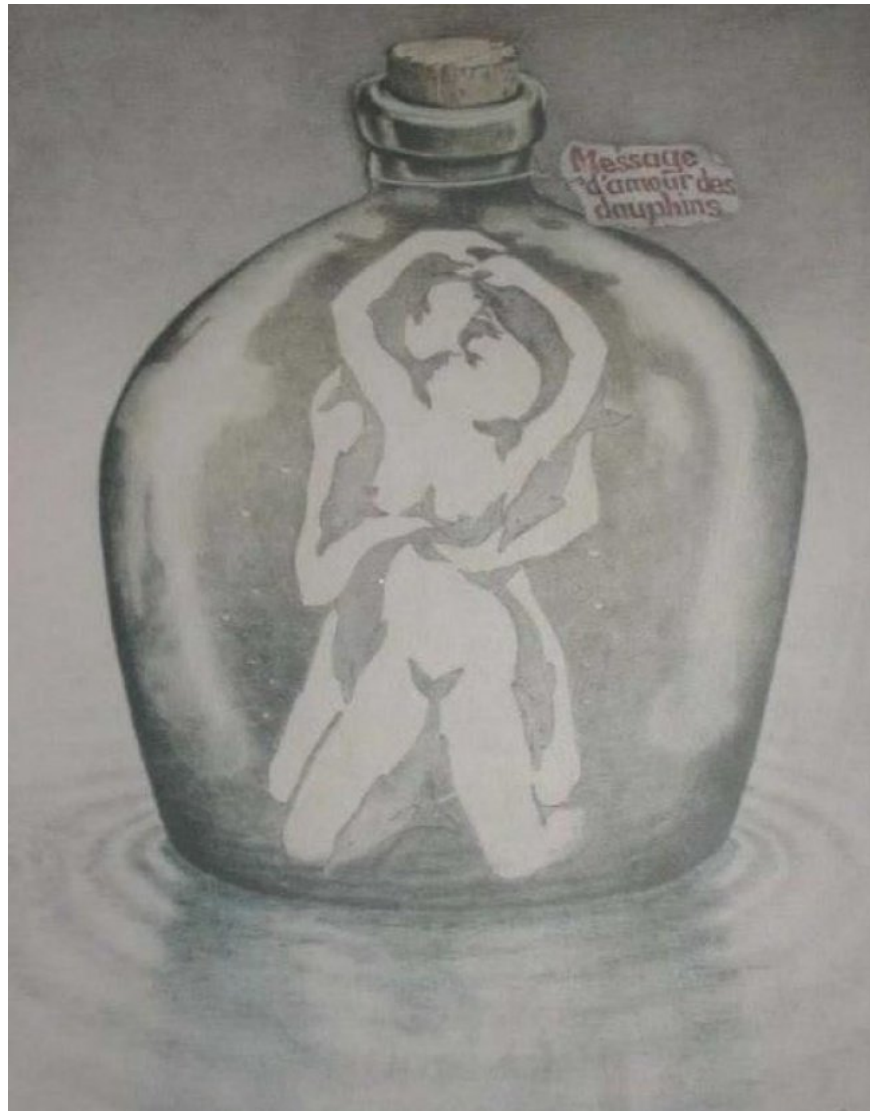

Discoloration

© Io9

If you look at the white dot in the center within 30 seconds, you may notice how the colorful dots around start to change color or disappear completely.

Playing dolphins or lovers are "in love"?

© Io9

Children will see dolphins playing in this picture, while adults see something completely different. It happens because children do not have "adult" images in their memories. In this way, images are taken by Sandro Del-Prete and called "Message of Love from the Dolphins - The Message of Love from the Dolphins".

Ships or buildings

© Facebook / Rob Gonsalves

This illusion is actually an art made by Rob Gonsalves, a magical realist painter. Depending on where you look, you will see when it is the structure of a long bridge, sometimes the sail of ships.
