

# 11 websites to download free security software

Now to download a software to your computer is not difficult. However, are you sure that the sites that download the software are completely safe and do not contain any dangerous viruses for the computer?

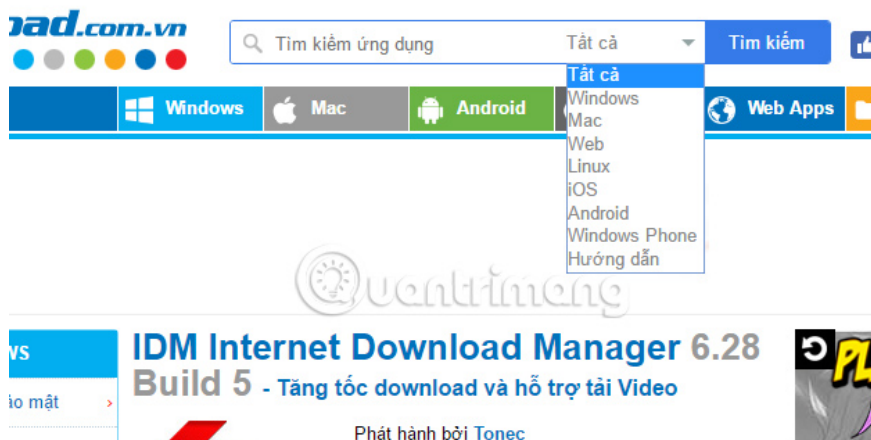

One of the reasons that computers are infected with viruses, dangerous malware is that we download software on websites that are not reputable. There are quite a few users before proceeding to download and install a software that will check the site's safety, as well as perform a virus scan of the software, if not download directly from the manufacturer's main page.

And if you install downloaded software on strange websites, the risk of dozens of viruses and malicious code will penetrate and attack the data security wall on the computer is very high. So how can I download security software for my computer, when not downloading them from the official website? In the following article, the network administrator will introduce to you some websites that provide free software, support to download and install on the computer. In particular, these websites are not accompanied by any virus or malicious code, so you can feel secure when using.

## 1. Download.com.vn

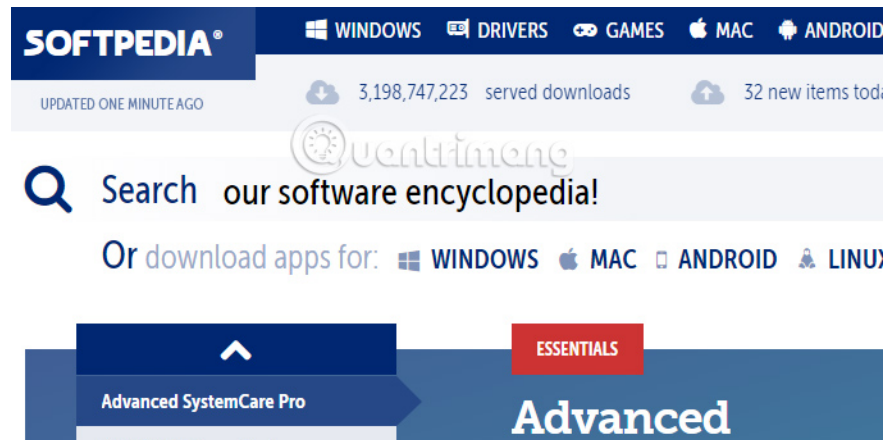

As a website with Vietnamese interface, Download.com.vn makes it easier for you to find software, applications or games. The website divides software into different operating systems, including Windows, Mac, Android, iOS, Windows Phone, Web Apps so that users can find the right software or application for the device. Besides, the software is always updated to the latest version, with the upgrade features. Each software is closely linked, ensuring safety when we download it to the computer.

In addition, Download.com.vn also provides you to read the Documents and Instructions section with the tips to guide the use of software, applications or articles related to technology, .

## 2. Softpedia.com
