

12 best keyboard apps for iPhone / iPad you should not miss

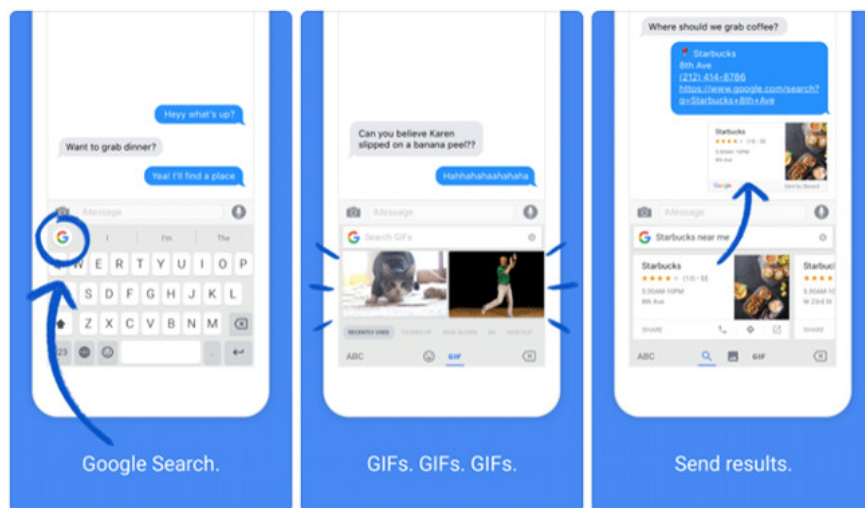

In the article below we would like to share with you the list of 12 best keyboard apps for iPhone and iPad with many positive feedback from users.

If you are a phone user to text or chat with friends, then you always want your device with the best Vietnamese keyboard to help you improve the typing speed and limit misspelled when entering data. Although Apple's traditional keyboard is also quite good, it is still not enough to satisfy the needs of today's users when they want more interesting applications built on the keyboard like the emoticons, contact, send beautiful GIFs and themes to send quickly to conversations.

If you are uncomfortable with the manufacturer's default application or prefer to experiment with a new keyboard, you can install 3rd party keyboard applications with more advanced and interesting features to help you experience it. Use the keyboard in the most enjoyable way. In this article, Network Administrator would like to share 12 of the best rated custom keyboard applications for iOS, please download it quickly for use, because they are completely free.

1. Gboard

Download the Gboard app

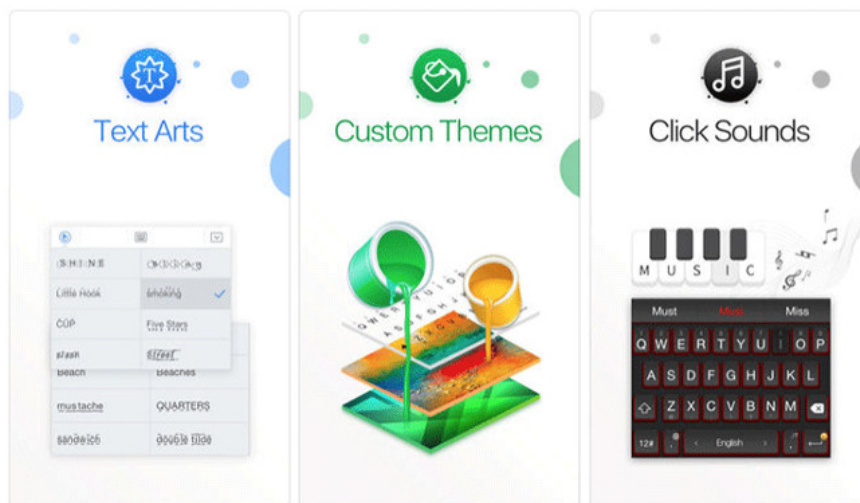

This application was released in May last year in the US, at that time GBoard was almost unusable in Vietnam due to limited availability in the US Appstore and only English support but Google gradually expanded it. Currently, you can download GBoard on the Vietnam Appstore, select the Vietnamese part in the system settings

that is already available. This is a highly rated app for your iPhone and iPad version. Gboard is integrated with a range of impressive features like swipe to type, search capabilities in all applications that support Vietnamese, funny emoticons, GIFs and more. You will not be disappointed and bored when using Gboard to text.

If you are looking for your smartphone with the best keyboard application, don't ignore Gboard.
