

12 sentences of billionaire Elon Musk: The madman or genius?

The views shared by billionaire Elon Musk to the public are evidence of insanity and genius thinking is very fragile.

1. "What role do you have for the company?" - Lesson learned from the story Elon Musk sacked his assistant to stick with him for 12 years for demanding a raise
2. Watch Elon Musk's presentation on the plan to conquer Mars
3. 20 sayings of billionaire Elon Musk for those who dare to dream

Referring to billionaire Elon Musk, we will know right away that it is a multi-talented person, he has the thinking of a genius and acts in madness. The boundaries of these two things are very fragile.

Born into a family in South Africa and later living with her mother in Canada. Elon Musk's childhood is a hard and devastating day. But not so that he succumbed to the fate of life.

From an early age he showed himself to be a genius when he sold a simple game of Blaster to a computer magazine for \$ 500. After that successful milestone, he constantly learned and cultivated more experiences when going to college, so that now at the age of 45 he has become a billionaire, holding many companies and officials. important case.

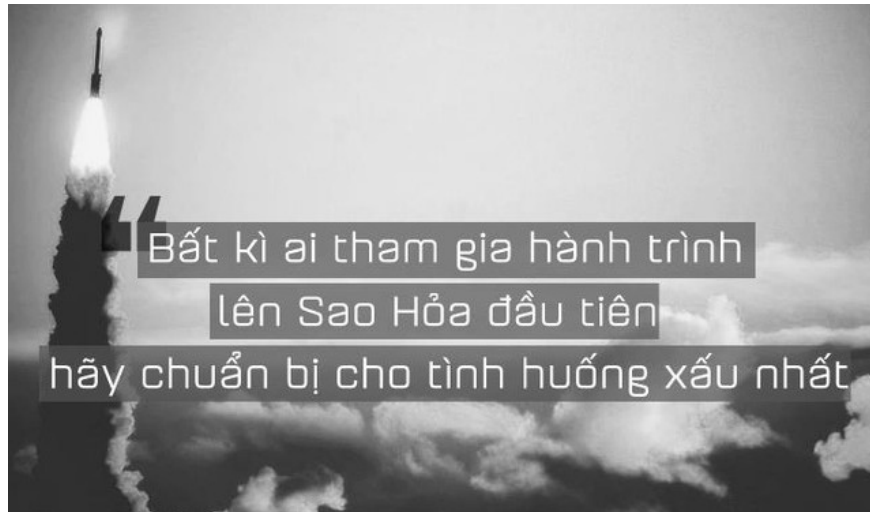

A genius often has a different way of thinking, Elon Musk is no exception. He shared his intentions, "We are developing flights to Mars that people can trust".

" The trajectory flies from Earth to Mars only lasts 26 months, so there will be a flight in 2018 and the next trip will be in 2020. And I think if everything goes according to plan, we will can take people on these flights in 2024 and set foot on Mars in 2025 " .

" I think the form of Government on Mars will be Direct Democracy, instead of Representative Democracy," Elon Musk shares her vision of a Government on the red planet. "In this way, people can vote directly on issues. And I think that will be better ."

Bringing people to Mars is not merely to make people 'survive' on it, but he wants to be able to build a bustling city, crowded with residents and growing trade centers. up as below.

Although a lot of ambition and confidence will succeed, Elon Musk insists "the first journey to Mars is really dangerous". He admitted the risk of death from it was very high, but there was no other way.

Despite the danger, Tesla boss is still very optimistic and says: "I think if you have to choose a place to die, Mars is not a bad idea."

“Chỉ có 1 trong số 1 tỷ
khả năng là chúng ta
đang sống trong cuộc sống thực

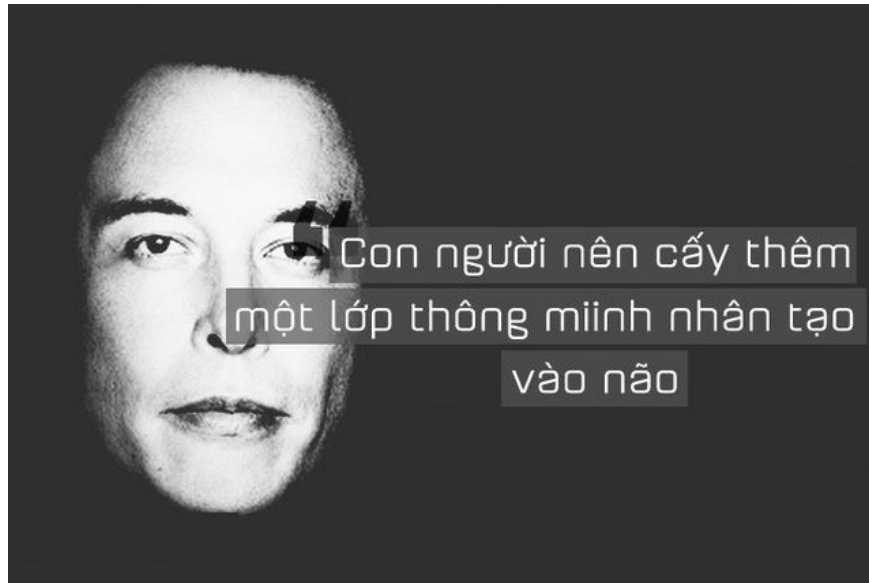

“Loài người nên hy vọng rằng
mình đang sống
trong một thế giới giải lập

“Con người
cũng là
người máy

Musk said the ability to leave a digital presence via email or social networking has brought a "superpower" to a robot.

Elon also emphasized that humans should develop the above "robot parts" by adding a digital intelligence layer to the brain to avoid becoming "domestic cats" of artificial intelligence.

As can be seen, we humans in the near future will be able to reach Mars to be able to live.
