

# 12 super attractive AR apps for Android people

Enhancing virtual reality has become the trend on today's smartphones. Take a look at the 12 best AR apps for Android that you can try today.

Enhancing virtual reality (Augmented Reality) has become the next big trend on smartphones. Both Google and Apple plan to push this virtual reality enhancement experience to the next level and you may have used it without realizing it like in face filters in Snapchat and Instagram-based Instagram. like last year's biggest mobile game: Pokemon Go.

But what about other applications besides these big names? Here are 12 best AR apps for Android that you can try today.

## 1. Star Walk 2

There is no faster and simpler way to show the magic of virtual reality enhancement technology compared to Star Walk 2. Just download the app, direct your phone to the sky and all planets, Stars and constellations will be displayed right before your eyes.

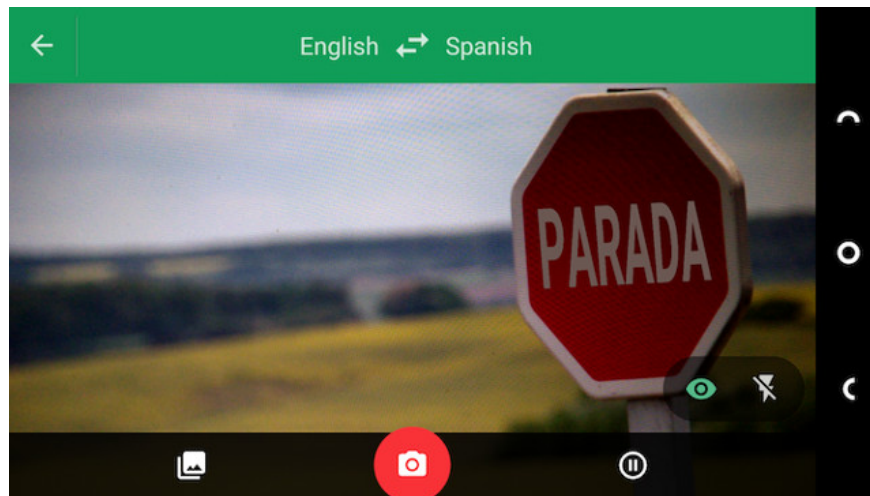

This pocket astronomer is a great app for teachers, amateur astronomers or just for those who are passionate about astronomy to determine if light in the sky is a star, Mars or Space Station International.

## 2. Google Translate

Google Translate is one of the best applications for travelers. It allows you to chat with people, even if you don't speak the same language. But this application is not limited to words.

Google Translate has used virtual reality enhancement technology to point the phone's camera at a signpost, menu or any other piece of text, and you'll get an instant translation. This feature works in 38 languages and you can download language packs for offline use.

1. How to translate images, translate words on photos for Android

**Download: Google Translate (Free)**

### **3. SketchAR**

There are many applications and websites that help you learn to draw. SketchAR takes a unique approach, using virtual reality enhancement technology as a guide.

Take a blank sheet of paper, then upload an image to SketchAR (the app provides some of the available images or you can switch your own photo) and the "project" a virtual copy of the image All you need to do is draw it.

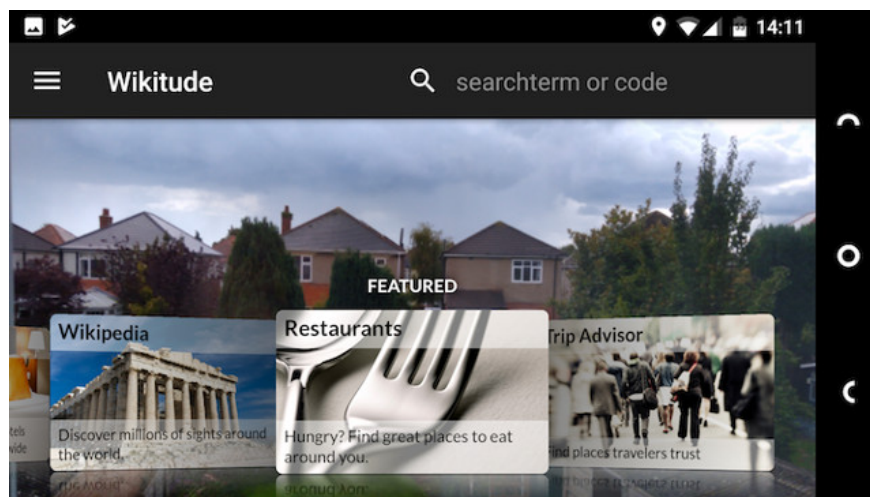

You can create A4 size images in the standard application or if you have a Project Tango phone, you can use it to create artwork on the wall.

## 6. Inkhunter

If you are planning to 'earn money' but then you may regret it because the tattoo doesn't suit you. Another way to reduce this risk is to use the Inkhunter application before starting the tattoo.

Inkhunter uses AR enhancement technology to display selected tattoo designs on the arm or other parts of the body. You can see how it looks before the real tattoo. Moving arm or phone allows you to check how it will look

from every angle. It's easy to save and share results.

## 7. Ghost Snap AR Horror Survival

A short but sweet movie according to the genre found, Ghost Snap works best when you wear the headset and turn off the light.

The game uses the camera's flash to brighten the surroundings and switch the display to night vision mode. All you need to do is explore your home, take photos of any strange events that take place.

**Download: Ghost Snap AR** (Free)

## 8. Lumyer

Lumyer is built like the face filter you see in Snapchat and Instagram. However, they are not applied in real time. Instead, take a selfie photo, then add some animated or hair effects to the image and save as a GIF image. You can also use the photos you have taken.

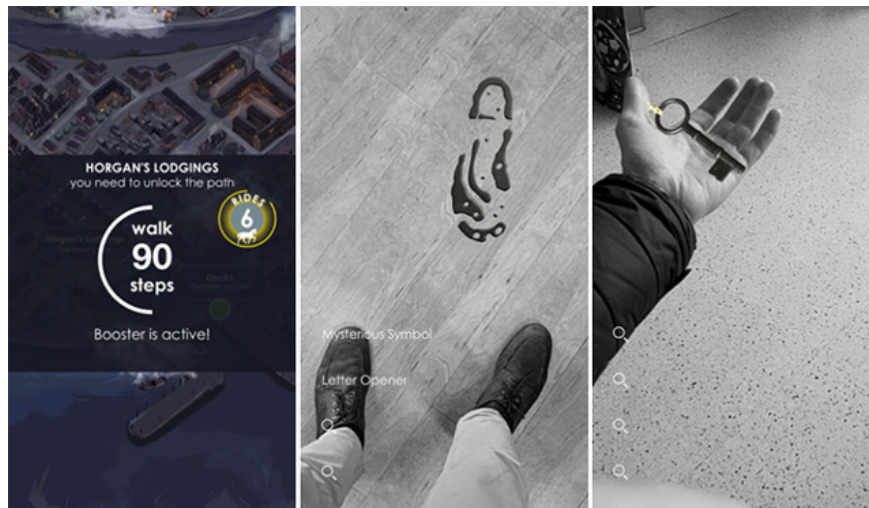

Lumyer works with videos and these will be applied in real time. You can add fireworks and other style effects. Lumyer did not beat the big names in this game and the processing was a bit slow. But if you're tired of what Snapchat has to offer, this will be an interesting option.

**Download: Lumyer (Free)**

## 9. Silent Streets

Silent Streets is an adventure-only and hit game. Instead of just standing in place and exploring in the 2D world, clicking on objects to investigate, you need to move really towards it.

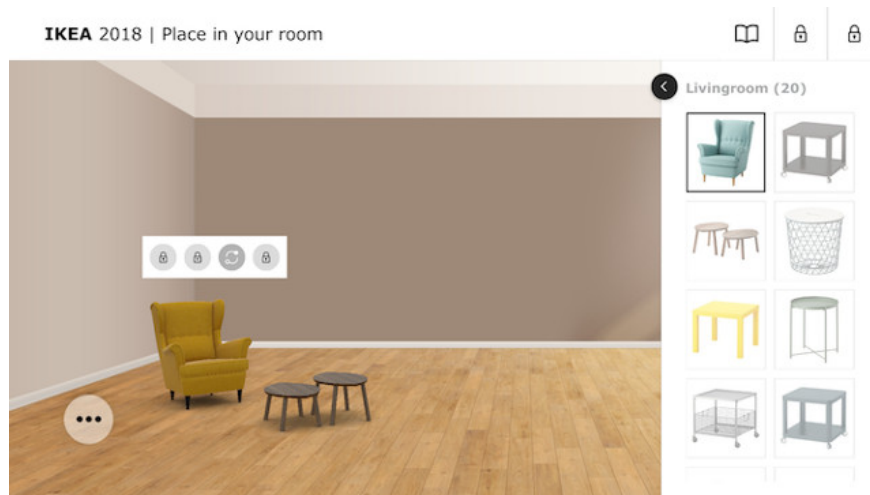

The story is very interesting and interesting when you investigate criminals in a Victorian setting. There are many puzzles for you to solve. The first part is free, but you will have to pay to continue playing later.

## 10. IKEA Catalog

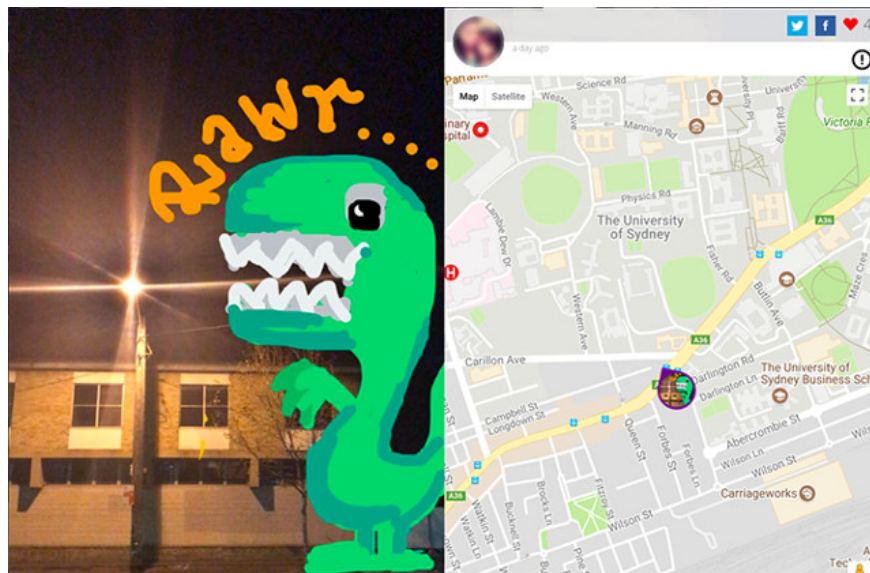

When buying furniture you often wonder if it suits your home. So let IKEA solve this concern for you.

The application has more than 300 items, you can put a chair in the corner, the lamp on the table and feel how they fit. One drawback is that you have to manually edit the product size.

**Download: IKEA Catalog (Free)**

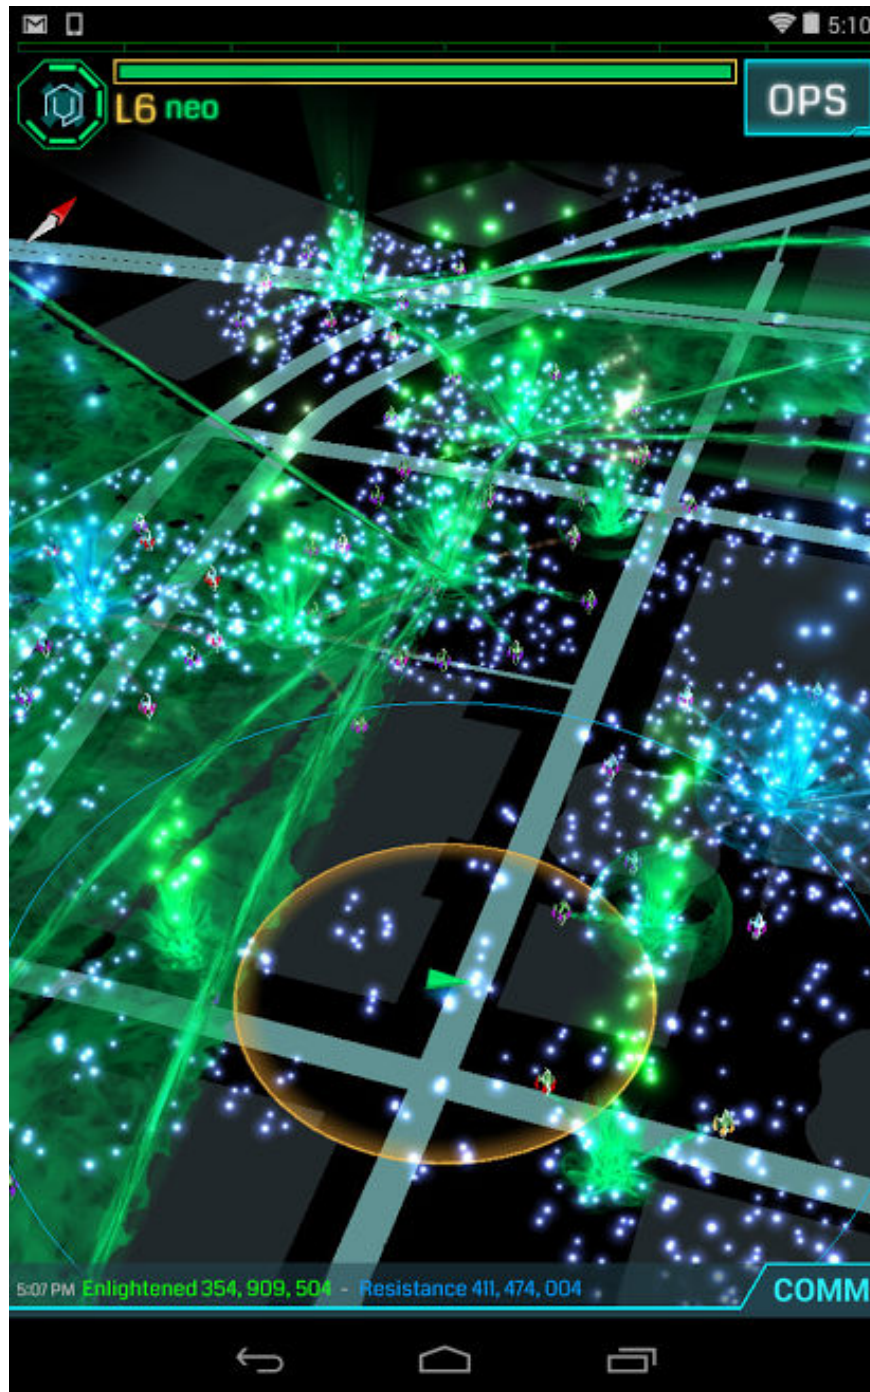

## 11. WallaMe

WallaMe allows to make secret messages with others by pointing the phone camera at an empty wall and writing or drawing a message on the screen, then sharing it. No random passerby even knows that there is a "secret mail" there. Only those you share with or "WallaMer" can read this message if you share it publicly.

**Download: WallaMe (Free)**

## 12. Ingress

Before Pokemon Go existed, Ingress turned millions of technologies to enhance the virtual world into the game. Set in a complex sci-fi world, the game requires you to choose a faction, then wander around shooting or protecting locations.
