

12 unaffiliated Polytechnic students received \$ 6,000 / month, high-quality IT engineers are always sought

At the end of July, SmartGrid - a company in the field of Artificial Intelligence has recruited 12 students of Bach Khoa University at the time of graduation to work with a salary of 6,000 USD / month.

At the end of July, SmartGrid - a company in the field of Artificial Intelligence has recruited 12 students of Bach Khoa University at the time of graduation to work with a salary of 6,000 USD / month.

According to educational experts, digital transformation is becoming a global trend, most of all field processes are converted to integrate intelligent automation, so the demand for IT care will remain 'hot' for years to come.

According to the survey, by 2020 we will lack about 500,000 human resources for the IT industry. Currently, the recruitment demand for this sector is increasing by 47% but the human resource only increases by 8% a year. Not only lack of quantity but also the quality of training in many facilities has not met the demand of employers.

AI human resources are scarce, in Vietnam the best people often choose to study abroad. Which usually these people have gone is not returned.

Therefore, employers both in the country and abroad, especially companies from Japan are always 'hunting' high quality IT engineers from reputable training institutions.

About the story of artificial intelligence training (AI) in the university, Mr. Ta Hai Tung - Director of the Institute of Information Technology, Hanoi University of Science and Technology, said that in 2019 AI was also added to the chapter. The school's curriculum, with a minimum input score of 27 points, only 0.5% of A-grade

candidates nationwide achieved this score. In the future, children who are able to become Tech Leaders will lead the development of AI industry in particular and the science and technology fields in general of the whole country.

To have the opportunity to own quality human resources, companies are forced to place orders with universities and research institutes.

1. The Ministry of Information and Communications issues "Documents of things to know about IT jobs", a guideline for young people who love technology
2. Free online artificial intelligence (AI) course of Finnish university
