

120 passwords for free WiFi at airports around the world

WiFox application for Apple iOS and Google Android is constantly updated and it will display the latest airport map with wifi password in the lobby around the world.

Created by FoxNoMad, this is a great map for those who regularly travel. The first thing you want to do after landing is to log in to Facebook or Google to find something and at this time free Wifi in most airports will become extremely useful. The map below is updated regularly by Polat, including Wifi password and location of dozens of airports around the world.

WiFox application for Apple iOS and WiFox for Google Android is constantly updated and it will display the latest airport map with wifi password in the lobby around the world. In **Map view** mode, you can click any available Wifi icon and copy the password to the clipboard. This map is available offline (when you download the appropriate Google Maps), so you don't need an Internet connection to use WiFox when you're on the go. The best place to use free Wifi is StarBucks and almost every airport has StarBucks.
