

17 extremely important events that can change the world before 2050

Please see 17 extremely important events that can change the world before 2050 in the following article!

1. 6 helpful tips to prepare for future opportunities
2. Top 5 technologies are expected to change people's lives in the future
3. 7 reasons for mistakes when choosing a career for the future

To predict the future, sometimes we just need to analyze what is happening at the present time. Researchers have predicted **17 extremely important events that could happen to change the world in the second half of the 21st century** . Invite you to watch!

2019: New countries can appear on the map

© Google Maps

The Pacific island of **Bougainville** has now officially become an autonomous region of **Papua New Guinea** . However, by 2019, it could become a separate country, which would only happen when the majority of the population of Bougainville voted for this decision in a referendum. **New Caledonia** , now part of France, may

also become a separate country in the future.

2020: Construction of the world's tallest building will be completed

© Ammar shaker / Wikipedia Commons © AFP / EAST NEWS

Currently, the **Burj Khalifa** in Dubai is holding the title of the world's tallest building (828 m), but architects are looking to overcome that record by 2020. With the name **Jeddah Tower** , a project The new project being deployed in Saudi Arabia, will be a skyscraper architecture of nearly 1,000 meters tall, expected to be completed before 2020.

2020: Hotel in the first space will be opened

© Graham Grable / Wikipedia Commons © NASA / Wikipedia Commons

Bigelow Aerospace is planning to launch a spaceship, a private space for people from Earth in space in 2020. In addition to industrial and scientific purposes, it also has the potential to become a point. Space travel and support for research missions on the Moon and Mars.

Such aircraft tests were successful and even one of them was used as an astronaut's storage room in the International *Space Station* (*ISS*).

2024: SpaceX missiles will launch on Mars

© AFP / EAST NEWS

SpaceX, the company founded by billionaire Elon Musk in 2002, is aiming to make its first flight to Mars in 2024. After that, they want to send the first people to live there. The billionaire Elon Musk wants to operate four such spaceships, with two carrying them on Red Planet.

At that time, SpaceX plans to build a fuel-synthesis plant on the surface of Mars to use for the journey back to Earth.

2025: Earth's population will be 8 billion people

© Yan bo - Imaginechina / FOTOLINK / EAST NEWS

According to the United Nations, the world population will be 8 billion by 2025. By 2050, experts estimate the Earth will have 10 billion people.

2026: The Sagrada Familia church in Barcelona will be completed

© Aflo Images / East News

The construction of the **Sagrada Familia** church , the great catholic church in the Catalan region began in 1883. The Sagrada Familia is the famous symbol of Spain with its architectural combination of traditional Gothic and modern Art Nouveau. The biggest problem is the design of special blocks and it takes a long time to complete a block.

According to the Spanish government, this masterpiece will be completed in 2026, on the 100th anniversary of Antoni Gaudi's death, the author of this beautiful work, who suddenly died while the completion unfinished.

2028: The city of Venice may not be able to stay because of flooding

© Polaris / East News

That does not mean that the city will be completely submerged (*possibly, but before 2100*). **Venice** is a city floating in Venetian lagoon along the Adriatic Sea, often flooded by wind and rain combined with rising tide. There are concerns that the water level in the upcoming Venetian lagoon will increase so much that people will not be able to live in the house.

2029: Apophis will progress nearly 23,860 miles from Earth

© NASA / JPL-Caltech / UCAL / MPS / DLR / IDA © NASA / eyevine / EAST NEWS ©

As predicted by NASA, **Apophis asteroid** will move closer to Earth in 2029 with a range of not less than 36,000 km, closer to the distance between many current satellites and Earth. 7 years later, ie 2036, Apophis asteroids can hit Earth with a probability of 1 / 45,000.

Today, though, it is not possible to know whether the Apophis asteroid hit Earth in 2036, but experts agree that the asteroid is a suitable object for practicing conservation options. Protect the Earth in the future.

2030: Arctic ice area will be very small

© NASA

Arctic ice area is decreasing. According to estimates, the Arctic Ocean will completely melt in the summer before the end of the 21st century.

2033: Begin experimentation to bring manned ships to Mars

© Wikipedia Commons

The European Space Agency's programs are still focused on studying the Moon, Mars and asteroids. They have the ambition to design special ships for manned expeditions to Mars. Before sending people to the planet Mars, they will launch ships to them and then develop technologies so that the ships can return to Earth.
