

18 'extremely creative' inventions are available only in Japan

Invite you to consult 18 extremely creative inventions only in Japan!

1. 17 "very impressive" advertising ideas on social networks
2. 20 unique products on Amazon that you want to own right away
3. Laughing with 11 "unbelievable" inventions that people thought of

Japan is famous as a "*manufacturing furnace*" for innovative inventions. Some of these inventions are quite strange, while others are extremely intelligent and useful. Do you remember in the 1980s, we even laughed to invent Japanese selfie sticks. Yet now selfie sticks are an indispensable tool in travel trips.

The Bright Side page has synthesized some useful Japanese inventions that make life easier and more comfortable. Please refer to the **18 "extremely creative" inventions available only in Japan !**

1. Swivel chair on board

If you don't like sitting in the designed direction, just turn the chair in whatever direction you want.

2. A helmet with round holes for long-haired women

This is a great invention for women.

3. Place the baby in the toilet

This is indeed an extremely useful invention. Parents can place children where they can observe while "*resolving*", especially when they are alone with their young children.

4. Coffee shop for lonely hearts

If you feel unhappy when you go to drink coffee alone without friends or lovers. Don't worry, you just go to the bar and the staff will bring a lovely teddy bear with you. Is it all alone?

5. Outline the slanted line

At major intersections, crossing is a very difficult thing, especially in opposite buildings. However, in Japan, you can cross the street with slanted lines, extremely fast and convenient.

6. Laptop holder

Your hands will be free while watching movies or surfing the web, avoiding the situation of hugging a sleeping machine and falling into the face.

7. Eyeglasses for puppies

© ??????

It may seem strange at first, but dogs are like humans, they also hate the sun. And Japanese people always care about this.

8. "Silent" karaoke orchestra

© japantrendshop

If you don't want to disturb others or simply be afraid and don't dare to sing loudly, then the "silent" karaoke orchestra is the best invention for you.

9. Exclusive slippers for toilets

Japanese people always think that toilets are the place that contains the most bacteria in the house. So, they could not bring the same sandals and went around in the house.

10. Pillow for those who like to work prone

© japantrendshop

Thanks to this pillow, when you are tired from sitting and working for a long time, you can lie on your stomach without fear of discomfort.

11. Apartment to the surname of the owner

Finding a home in Japan by address is a really difficult challenge. Most of the streets here have no names and the number of houses in Japan is replaced by the day they built the house, so it is more convenient for the Japanese to write their family name on the door.

12. Tank water saving

This way you can save water and protect the environment already.
