

1GB equals how many MB?

GB and MB are terms of units of measurement that are quite familiar in technology. However, not everyone knows how many MB is 1GB or the conversions between these two units.

Please read the article below to know how many MB is 1GB.

What are GB and MB?

GB and MB are units that represent the amount of memory (RAM, hard drive, memory card, 3G, 4G, .) of devices such as phones, computers, etc. data capacity of that device.

Name	Value
1 Byte	8 Bits
1KB (Kilobytes)	1024B (Bytes)
1MB (Megabytes)	1024KB (Kilobytes)
1GB (Gigabytes)	1024MB (Megabytes)

1TB (Terabyte)	1024GB (Gigabytes)
1PB (Petabyte)	1024TB (Terabytes)
1EB (Exabyte)	1024PB (Petabytes)
1ZB (Zettabytes)	1024EB (Exabytes)
1YB (Yottabyte)	1024ZB (Zettabytes)

Note:

1. GB (Gigabyte) is different from Gb (Gigabit).
2. MB (Megabyte) is different from Mb (Megabit).

1GB equals how many MB?

1GB will equal 1024MB.

For example:

1. Each of your photos has a capacity of 3MB, 1GB will hold about 340 photos.
2. Each song (mp4) has a capacity of 4MB, 1GB can hold about 256 songs.

How to convert data when using the Internet

Below is a data conversion table when using the Internet to help users use 3G and 4G more effectively, please refer.

Listen to music online	1MB/min
Send and receive mail	10KB/time
Surf Facebook	1MB/min
Watch video	4MB/min
An Alliance game	30-50MB
Comment/Share FB, Zalo...	20KB/time

Hope the above article has helped you answer the question of how many MB is 1GB and understand more about the conversions between measurement units and how to convert data, so that you can use the Internet effectively when using the Internet. use 3G, 4G.
