

2 simple ways to remove SkyDrive Pro option in Windows 10 Right-click Menu

When installing Microsoft Office 2013, by default your context menu (context menu) will appear with SkyDrive Pro option. However, every time you click on any file and folder, this option always appears on the context menu (context menu) that makes you feel uncomfortable.

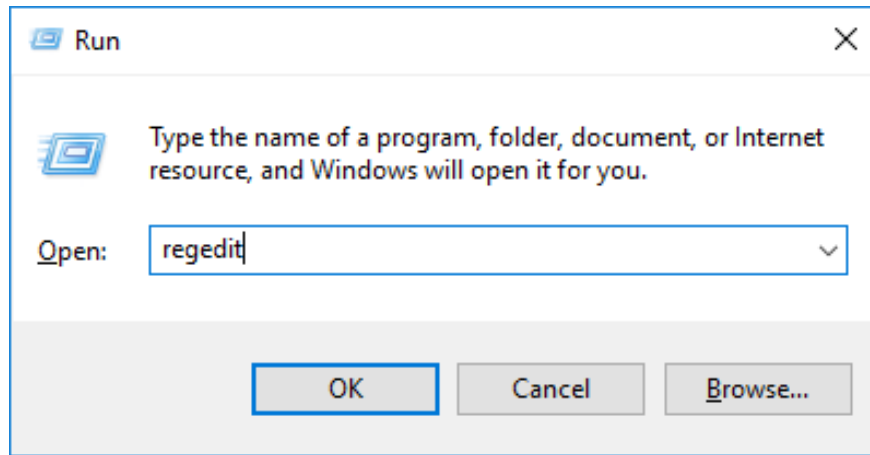

When installing Microsoft Office 2013, by default your context menu (context menu) will appear with SkyDrive Pro option. However, every time you click on any file and folder, this option always appears on the context menu (context menu) that makes you feel uncomfortable.

In addition, if you do not use Office SharePoint applications, this option will become useless. In the following article, Network Administrator will guide you 2 simple ways to remove SkyDrive Pro option in Windows 10 Right-click Menu.

1. Use the Registry

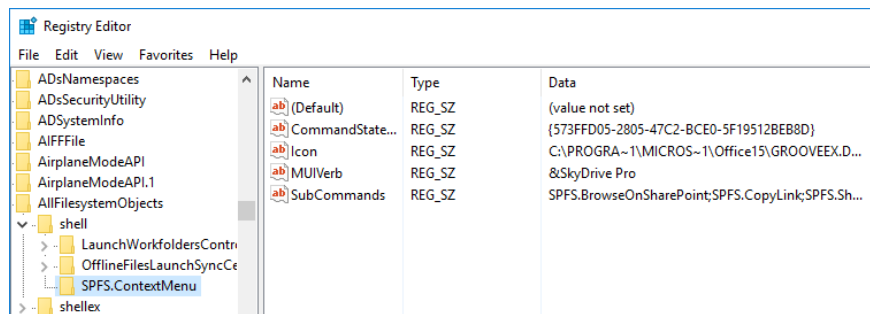

First, press the **Win + R** key combination to open the Run dialog box, then type the keyword **regedit** and press Enter to open the Registry window.

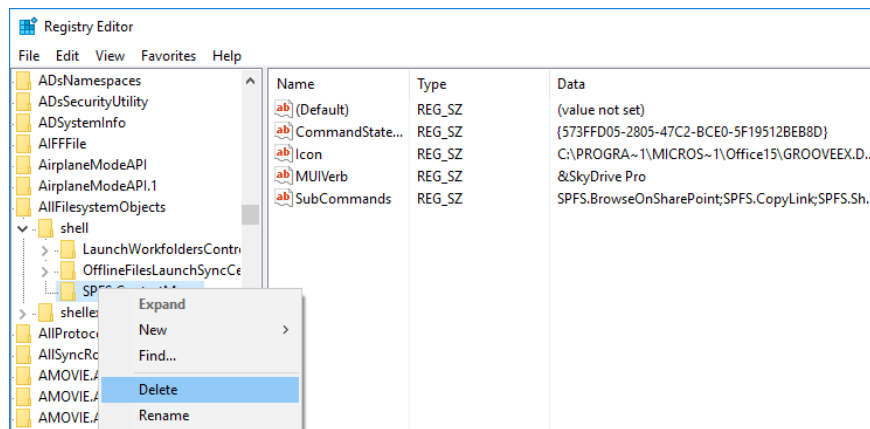

The Registry editor dialog box appears, you find the path:

HKEY_CLASSES_ROOT\AllFilesystemObjects\shell

Expand the shell directory and you will see the **SPFS.ContextMenu** option.

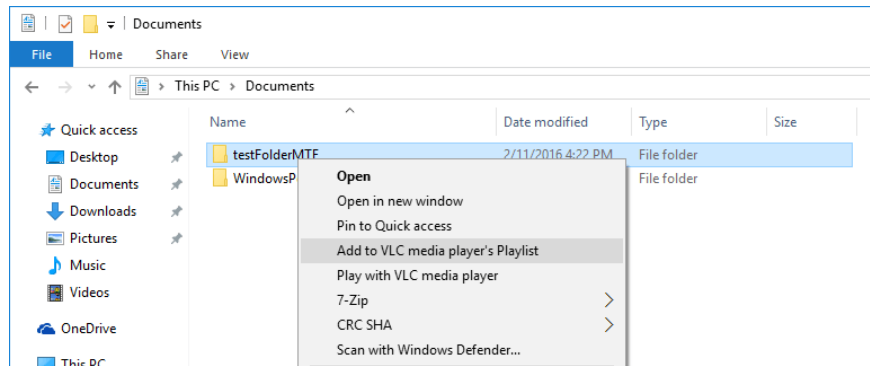

Right-click **SPFS.ContextMenu** and select **Delete** .

At this time, a window will appear informing you whether you want to delete the key or not. Select **Yes** to delete SkyDrive Pro.

So you've completely removed the SkyDrive Pro option from the right-click menu.

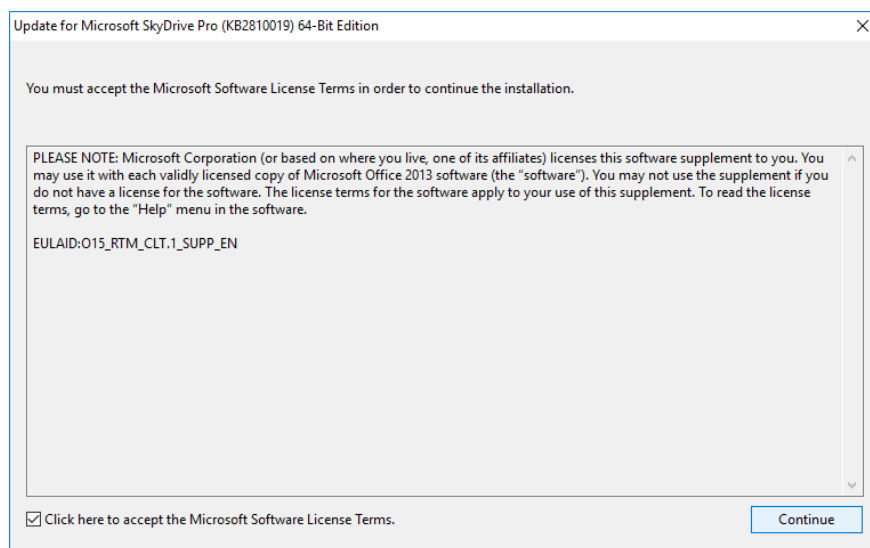

2. Use Microsoft Hotfix

Download Microsoft Hotfix to your computer and install it here:

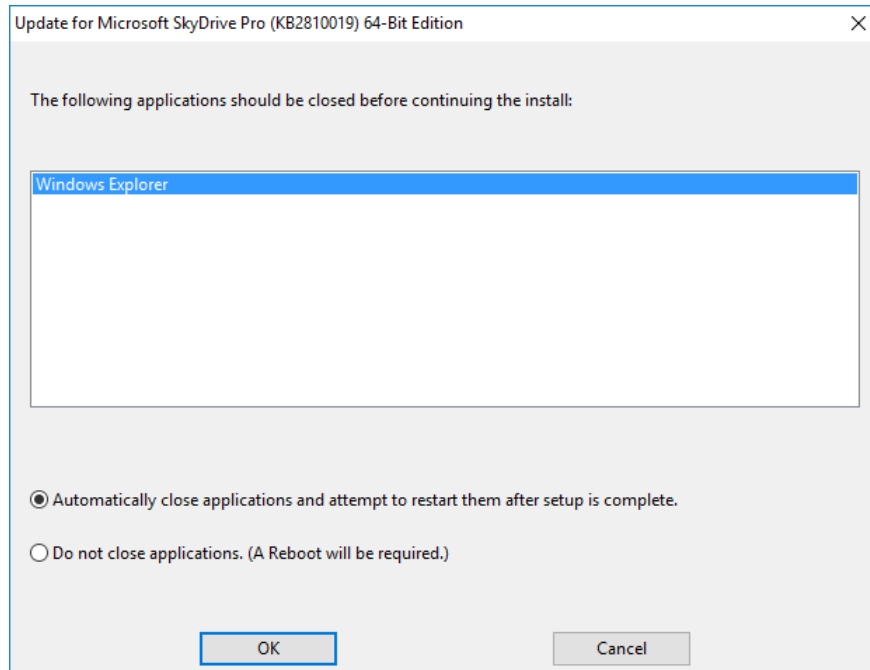

1. 32-bit
1. 64-bit

After downloading the application, you proceed to install, check the box agreeing to the following terms and choose **Continue** .

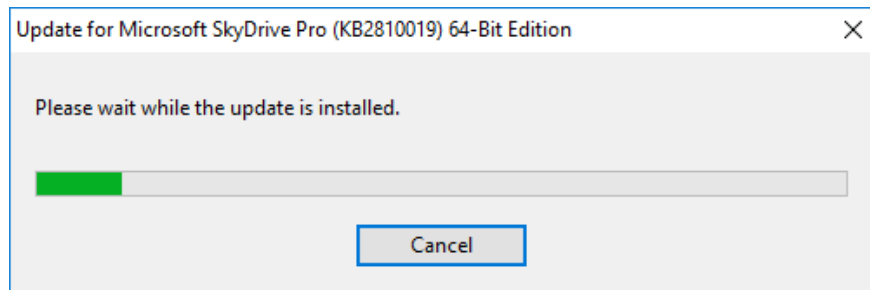

On the next window, the Hotfix application will display the applications you need to close before proceeding with the Hotfix installation.

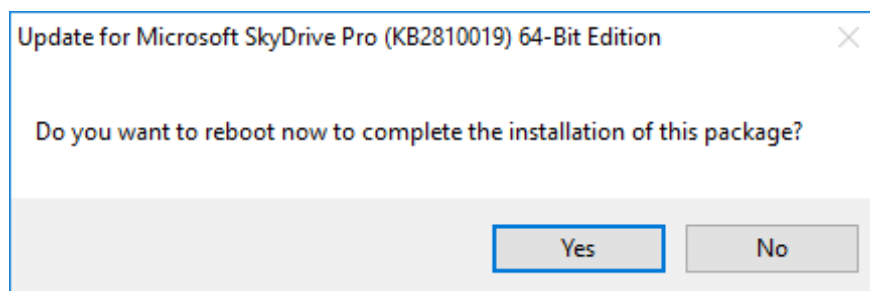

Select one of the two options, then select **OK** to continue.

Next proceed to restart your system to start the installation process.

After installation is complete, Hotfix will ask if you want to restart the system. Select **Yes** to restart the system. When your system has finished booting, you no longer see the SkyDrive Pro option in the Right-click Menu.
