

2 steps to help users view subtitles on YouTube

To view YouTube video subtitles with supported videos, users will need to turn on YouTube video subtitles or enable subtitle viewing option in YouTube settings.

To view YouTube video subtitles with supported videos, users will need to turn on YouTube video subtitles or enable subtitle viewing option in YouTube settings.

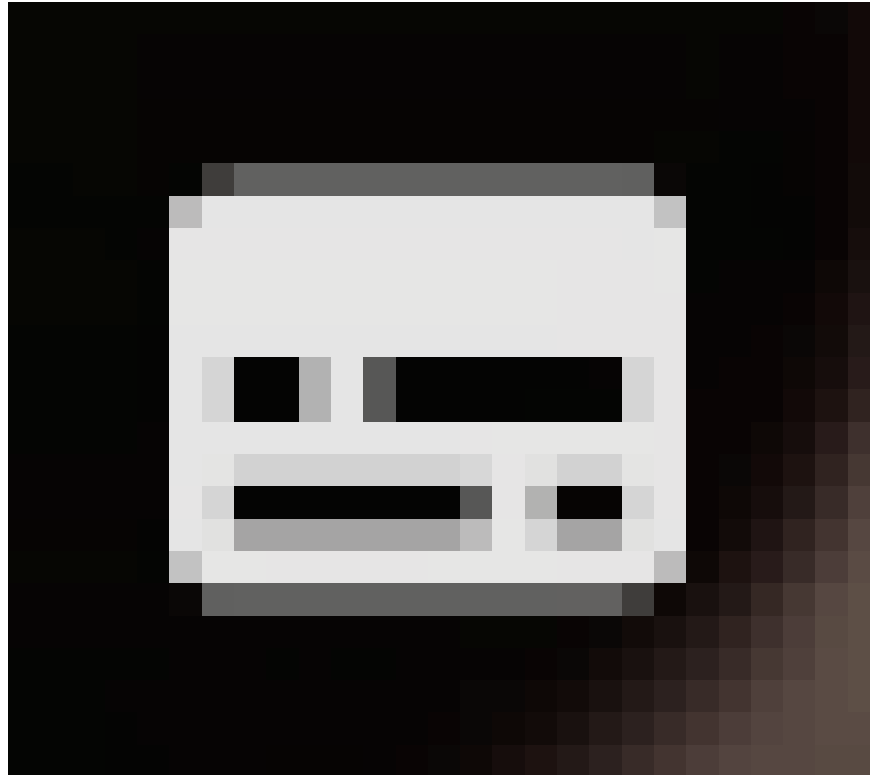

In order to support a worldwide audience, Youtube has now also allowed subtitles to be added to videos so users can follow the transcription or video content. However, it is not always necessary for users to want to watch video subtitles and want to turn off video subtitles so that they don't get confused when watching videos on Youtube.

If so, we can customize it right on the setting subtitles on Youtube. Users will customize or display YouTube video subtitles, or display subtitles automatically by recognizing the voice (when available) on Youtube. Custom steps to turn on, turn off Youtube video subtitles will be available in the article below.

How to turn on YouTube video subtitles

This only applies to videos that have been subtitled by an author or by YouTube automatically. You will then see the caption icon on the video

(with Vietnamese interface) or

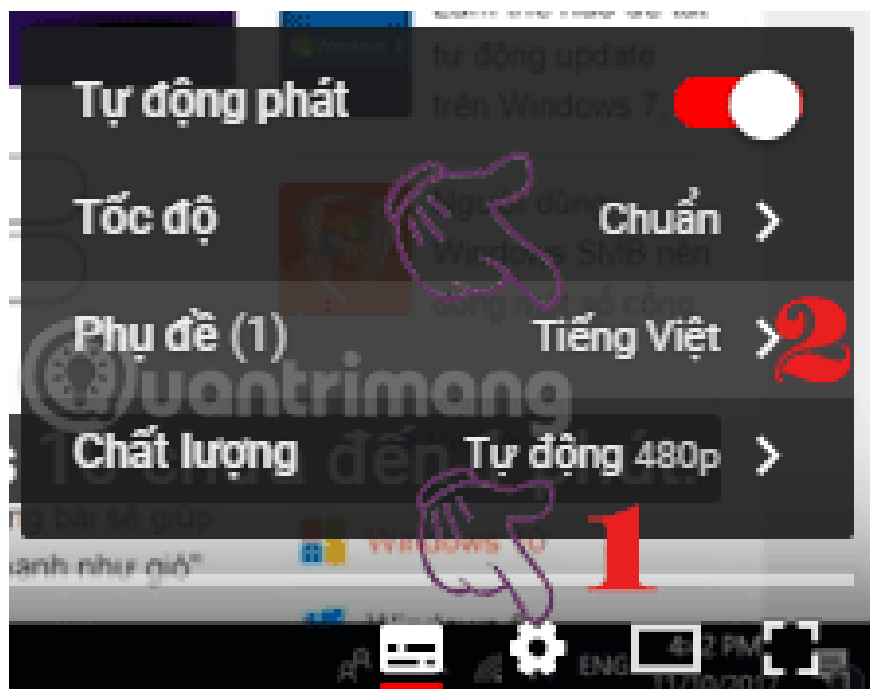

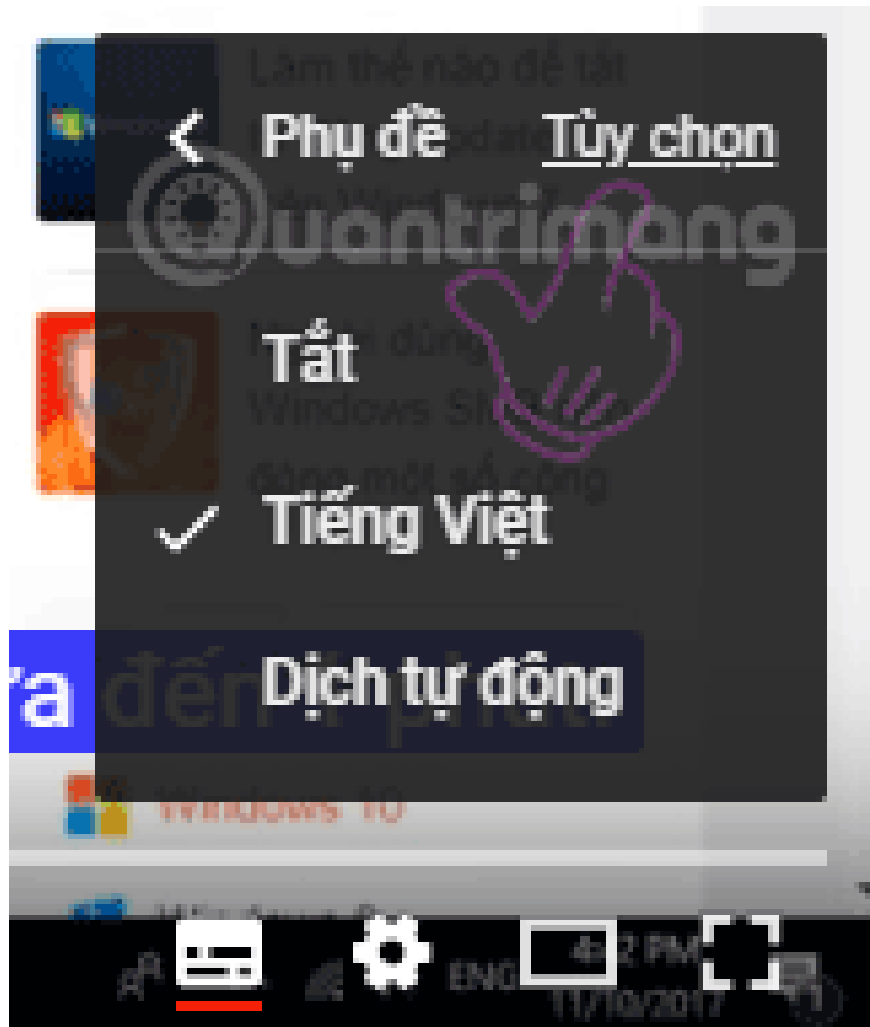

(with English interface).

To turn on YouTube video subtitles is very simple, on the video you are watching, click the subtitle icon. Then, video captions will be displayed in the default language set by the video creator or created by YouTube's captioning mode (this is usually English).

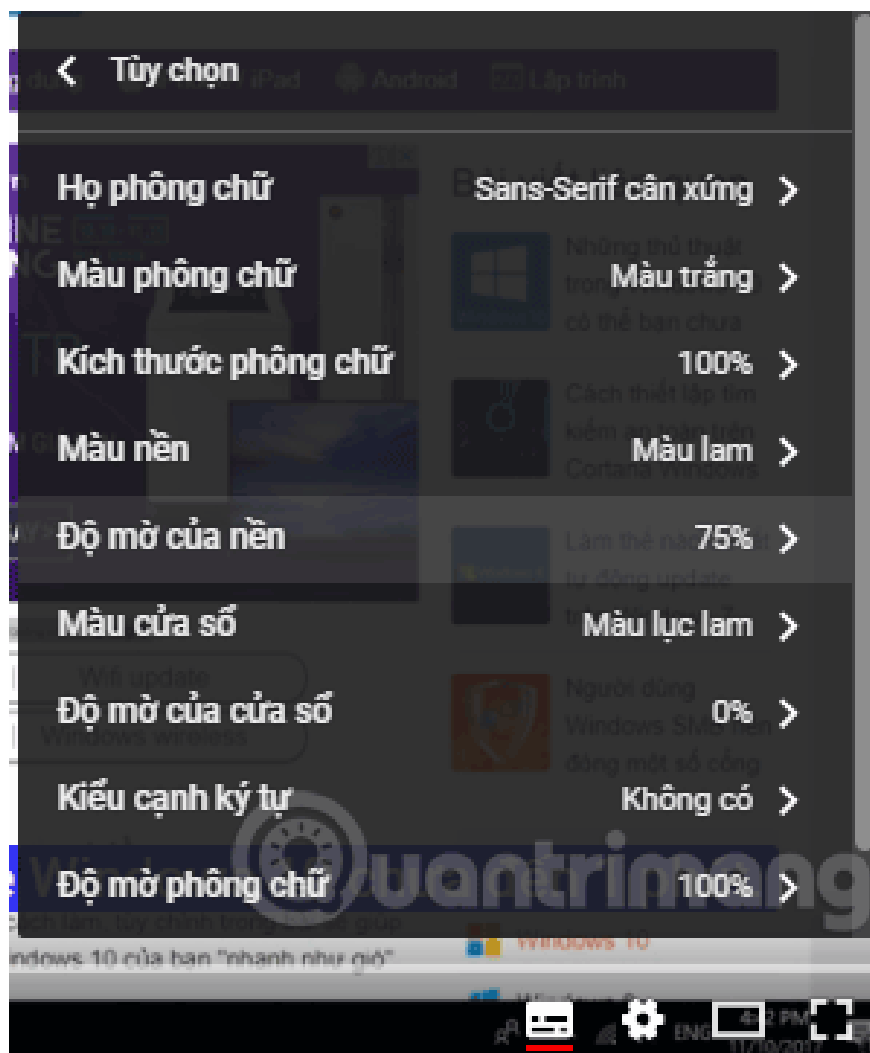

To customize YouTube video subtitles, do the following: Click the alias icon> **Subtitles** > **Options** :

Choose font, font color, background color, size, opacity, . to suit your needs.

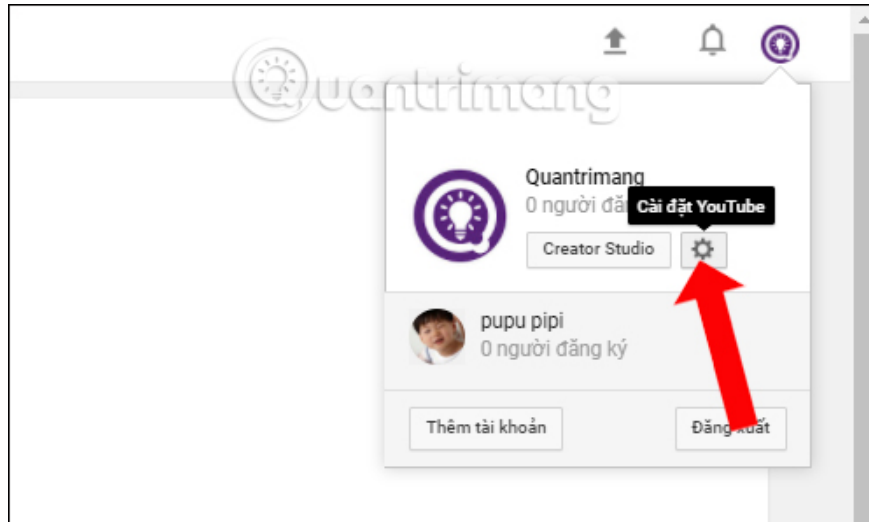

So you can watch the video with subtitles on YouTube already.

Instructions for viewing Youtube video subtitles from installation

Step 1:

First of all, please log in to your personal YouTube account. Then click on **the avatar** of the page and then click on **the gear icon** .

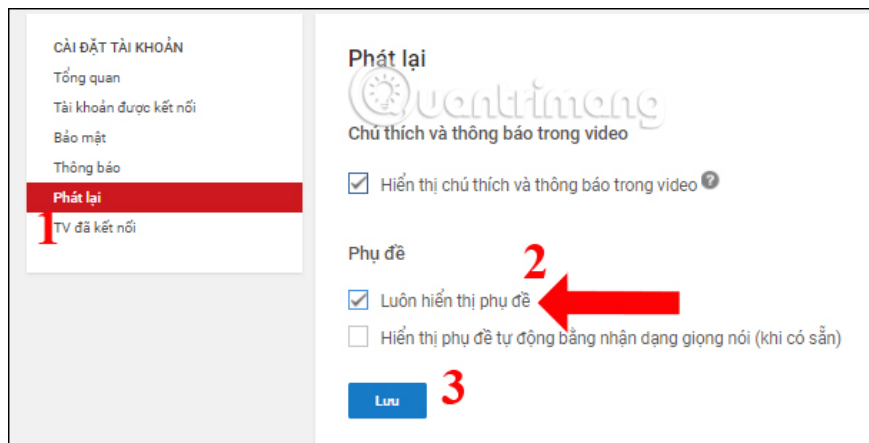

Step 2:

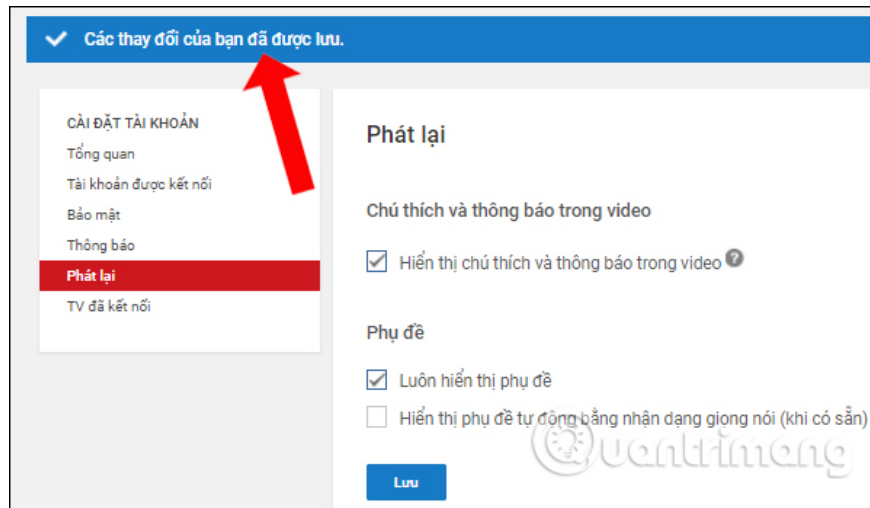

Switch to the new interface and look at the list on the left, select Playback.

Looking at the interface next to the user will see Subtitles (Captions). Check the **Always show subtitles** item (Always show captions). If you want, you can also choose to select Show subtitles automatically by voice recognition (when available) (Automatic captions are provided by automatic recognition (when available)).

Finally click **Save** (Save changes) below to save the changes.

We will then see **the message Your changes have been saved** as shown below.

Customizing whether to enable or disable YouTube video subtitles will make it easier for users to watch videos. In addition, there is now support to create YouTube video subtitles right on YouTube without the need for other support services.
