

# 20 animals are so strange that you don't believe they exist on Earth (part 2)

Other strange creatures in the natural world that you've certainly never heard of or met before.

In part 1, we learned about exotic animals like zebra deer, panda ants, Venezuelan poodle butterflies, blue parrot . In this sequel, we will continue to see these Other strange creatures in the natural world that you've certainly never heard of or met before.

## 11. Fluffy cow

Fluffy cows are the most adorable breed in the world because of the identical appearance of giant stuffed animals.

## 12. Son Duong Markhor

Chamois Markhor is a wild big goat that mainly lives in Afghanistan, Pakistan, Kashmir, Tajikistan and Uzbekistan. This animal stands out with balanced twisted horns in the form of a bottle opener.

### **13. Blue sea duck**

A species of bird that lives in tropical and subtropical islands off the Pacific Ocean. Even in bad weather, it is still possible to recognize them from afar thanks to the extremely prominent turquoise feet.

## **14. Sunda flying fox**

Sunda flying foxes, also known as Malaya flying foxes or Colugo flying lemurs, live on tree tops in the Southeast Asian rainforest. In fact, they cannot fly but move by gliding and passing between branches.

## **15. "Naked" shrew - Naked mole rat**

This is a completely hairless rat that lives in the Eastern part of Africa. Despite being listed as the worst animal on the planet, this hairless rat has almost no signs of aging, immune to cancer. They are used by humans to research cancer preparations and aging studies.

## **16. Mangalitsa Pig**

This pig is covered with a thick, ruffled coat that covers the whole body, making them look like sheep. This fuzzy pig breed is one of the best meat species in the world.

## **17. Monkey Emperor tamarin**

The Emperor tamarin monkey stands out with a long white mustache, arches and even stretches to the sides. This animal lives mainly on trees, in tropical forests in the Amazon basins in the southwest, eastern Peru, northern Bolivia and in some states of Brazil.

## **18. Patagonian Mara**

Patagonian Mara is an endemic rodent of Argentina. They have a "hybrid" appearance between rabbits and dogs. This strange animal is quite gentle and possesses a good ability to run.

## **19. Birds catch Amazon Royal flies**

This bird possesses an extremely colorful appearance and matches like dancers in Carnival. They often nest on the water to be able to avoid terrestrial and underwater enemies.

## **20. South American wolf mane**

Although called the mane wolf, strange animals belong to the dog family. They are the largest and tallest dog in South America. With reddish-brown fur and erect ears, mane wolf looks like a fox but they have very long legs. This supermodel "supermodel" pair of legs results from the process of adapting to life in their high meadows and large bushes.
