

# 20 jobs with the highest salary for women

There are still industries in which women not only make up the majority of the workforce but also receive decent income.

Income disparities due to gender differences still exist in some sectors, especially those still dominated by men. But there are still industries in which women not only make up the majority of the workforce but also receive decent income.

Business Insider looked at the 2016 American Community survey of the US Census Bureau to find industries with the highest average wages, women who work full-time and over 16 years old.

In order to emphasize the work of many women involved, only those with at least 40% of female employees are included in the list. Here is the full list. Salary calculated according to
