A few details help macOS feel a little more premium than Windows. Mac users will be familiar with the Drift screensaver, which was introduced to macOS in 2020. It's a really cool interface, and now, thanks to an independent developer, you can get it for Windows too.

## 2. Fliqlo

After all, how long do you actually spend staring at your computer screen with the screensaver running? For most people, it's probably not very long.

So a clock seems like a better use of space. Being able to know the current time at a glance is always useful.

Fliqlo has a few settings, including clock size and 12/24 hour format conversion.

### **3. Windows built-in options**

You might not have noticed, since 'Screen saver settings' are well hidden in Windows 10 and 11, but the operating system actually comes with a few built-in screensaver options.

You won't find the big classics like 3D Maze or Pipes here, but there are a couple of old timer tools (3D Ribbons and 3D Text) there, as well as some cute alternatives and of course the option to scroll through your photo library.

This screensaver has a very peaceful, fun feel to it and it includes a very elegantly designed clock right in the middle of the screen (with the date displayed). This is a screensaver for serious people (unlike some of the more quirky options on this list).

## 8. Plane9
