

3 factors to keep in mind when buying Samsung TVs

At the end of the year is the time when many families buy new TVs to replace the old ones, if you are interested and decide to buy Samsung TVs, consider the 3 factors that TipsMake.com shared below.

At the end of the year is the time when many families buy new TVs to replace the old ones, if you are interested and decide to buy Samsung TVs, consider the 3 factors that TipsMake.com shared below.

Samsung TV is one of the series that always attracts users thanks to the breakthrough in technology and reasonable price from high-end segment to popular. However, amidst a TV 'forest' with so many technologies and models, many people have difficulty in choosing a satisfactory product. Please refer to the following suggestions to choose for yourself a quality TV.

1. 5 extremely useful features on Samsung Smart TV you may not know yet
2. Experiences to keep in mind when choosing to buy Android TV box
3. All things need to know about Samsung Smart View application

1. Model, price

In the current TV market, Samsung is one of the big names and many favorites. To be more suitable for many users, the company has launched a variety of TV series, from low-end to mid-end and high-end.

- About size: Samsung TV models are available in the market, ranging in size from 32 inches to 88 inches. With this diverse size, even if your home is big or small, it is easy to choose a television. The important thing is that you have to determine the location of the television set, how much room is to choose the size that harmonizes with the space.

Choose models and prices to match your financial and room space.

- About TV design: There are 2 types of television in the market: flat screen TV and curved screen TV. Often curved TV models are only aesthetically pleasing, not affecting the actual image. However, curved screen TVs have more advanced technology to help maximize image and user experience, which means that prices will be higher than flat screens.

- About price: Samsung TV prices are very diverse, from 5.8 million to hundreds of million, so it is easy to choose to buy.

In general, depending on the needs, the hobby of enjoying the content and entertainment on television and the financial ability of you can choose Samsung TV accordingly.

2. Image quality

Image quality is the second factor you need to consider when you intend to buy Samsung TVs:

- The common point on all Samsung TVs is that the TV images will go towards eye-catching images, vivid colors, suitable for users who prefer bright TV.

- About new imaging technology: Samsung updated and released most new technologies such as HDR TV, quantum dot screen, .

When buying television, image quality is a factor to consider.

- About resolution: Samsung TVs have both HD, Full HD and 4K TVs. Up to this point, Samsung is the only company that has a 32 inch Full HD TV (UA32K5500, UA32K5300). Other companies usually only have HD resolution for TVs of 32 inches or less.

Note: To ensure audiovisual experience, you should not buy TVs with resolutions below 720p, otherwise screen quality will be poor, and pitting. Besides, you should also note that the higher the image quality, the higher the price, so this is also a factor to consider carefully.

3 . Operating system, interface and smart features on Smart TV

Samsung Smart TVs are using the genuine Tizen operating system developed. This operating system has features that you should know as follows:

- Nice interface, smooth processing speed, little jerky and easy to update software (with automatic update mode).
- Samsung TV has the strength of pure Vietnamese applications, online movie viewing applications (FPT Play, Zing TV, Fim +, Netflix, HDViet, .), applications for the whole family (yoga, cooking, .). However, Samsung has no strength in game storage with Sony.

Don't forget the operating system elements, interfaces and smart features on Samsung TVs.

- High security thanks to virus scanning and malicious code scanning for TV (Currently, Samsung is the only company with virus scanning mode, malicious code for TV).

- There is no voice search feature Vietnamese (LG and Sony have this feature, Vietnamese support).

- Voice control features on some high-end TVs require you to pronounce English correctly.

- Samsung supports very smoothly 2 features of TV control by phone (via Samsung Smart View application) and projecting the screen of the phone on TV via Screen Mirroring.

The above are 3 factors you need to know when buying Samsung TVs, hope the information above has made it easier for you to buy Samsung TVs.
