You are too familiar with popular Google applications like Chrome, Google Maps, Google Keep, Google+, YouTube, Gmail, . However, the fact is that Google offers users a lot of services, applications great utilities and utilities that not everyone knows. Here is a summary of Google's interesting applications provided by Mountain View, try to enjoy their extremely useful features and maybe you'll be enamored right away.

## **Just a Line**

Just a Line is the first name you should try, this is an augmented reality application that lets you create simple drawings in space, then share your creations with a short video. Using Just a Line, touch the screen to draw and press record and share what you do with hastag #justaline. Currently, the application works on all ARcore-enabled devices.

1. Download Just a Line

## **Selfissimo**

Another application using Google search engine is Selfissimo. The purpose of the app is to assist you in finding a selfie with perfect shooting angles. With Selfissimo, you only need to make changes to the location and the capture job will be automatically detected by the application. Next, you can freely choose one of the photos you like best and download that image to your personal phone. If you want, you can easily share photos directly from the application.

1. Download Selfissimo

## **Google Arts & Culture**

Not as famous as other products, but Google has succeeded in introducing the Google Arts & Culture application with extremely modern and interesting functions. Application to turn selfie photos into works of art. Specifically, you just need to select a selfie photo and Google's algorithms will find the artwork from the museum the most similar to it. They are then displayed according to the same level.

As can be seen, Google has once again applied artificial intelligence technology and they again use the machine learning system, which means the system improves over time as it learns from everything it can see. You can also find images of works from many museums around the world.

1. Download Google Arts & Culture
