

## 3 new models of Samsung laptops

New models including R439, N218 and N148 all put the ability to connect to the top, to facilitate the exchange of work and entertainment.

**New models including R439, N218 and N148 all put the ability to connect to the top, helping to exchange jobs, entertainment is convenient .**

N148 responds optimally to slim, compact, light and beautiful criteria with glossy red color, highlighting the fashion style of users. The laptop measures 264 x 188 x 25.3 mm (just as thick as a book), weighing only 1.24 kg.

N218 also has the same size 264 x 188 x 25.8 mm, the thickness of 6 cell 5,900 mAh battery. Inside the casing is designed with a unique crystal effect, which is capable of enduring heavy operations for up to 13.5 hours.

With the N218, worry-free owners are interrupted while downloading e-mails, downloading photos or conversations over Skype with distant friends, and are completely comfortable without carrying batteries throughout the day.

Samsung's entertainment capabilities are maximized thanks to the Intel Atom N450 processor application for N220 and N148. With R439, Samsung has brought Intel Core™ i5 450 with Turbo Boost smart technology to help focus the strongest energy to process data when needed, users do not have to worry about standing or waiting for a long process. at the same time more data.

Moreover, R439 also has ATI Mobility Radeon™ HD545v graphics processor with 512MB of gDDR3 native memory, giving users great experience when handling graphics or playing 3D games.

Easy Sharing mode will help users to access the Internet quickly to exchange emails, view Facebook or connect to search data anytime, anywhere.

The common point in all R439, N218 and N148 models is Samsung's proprietary Fast Booting technology application. It only takes 3 seconds to open the machine and can handle the data I need. This technology helps reduce waiting time, while helping to make energy use smarter. In particular, in the R439 line, there is also Recovery Solution mode, the computer will automatically transfer the processing data from RAM to hard drive, making your data safest.

The anti-glare LED screen gives true color display that makes the outside work sessions as well as the "show" images in the picnic easier.

Aiming at young people who travel a lot, Samsung also equips with a beautiful, impressive and well-built outer cover to ensure the inside data is safest when moving.
