

3 tips to make it easier to find photos on your computer

Sometimes, storing too many photos in computer memory will make it difficult to search and review those photos. Let's take a look at the 3 tips below to know how to organize and organize so that the search becomes convenient and easier.

Sometimes, storing too many photos in computer memory will make it difficult to search and review those photos. Let's take a look at the 3 tips below to know how to organize and organize so that the search becomes convenient and easier.

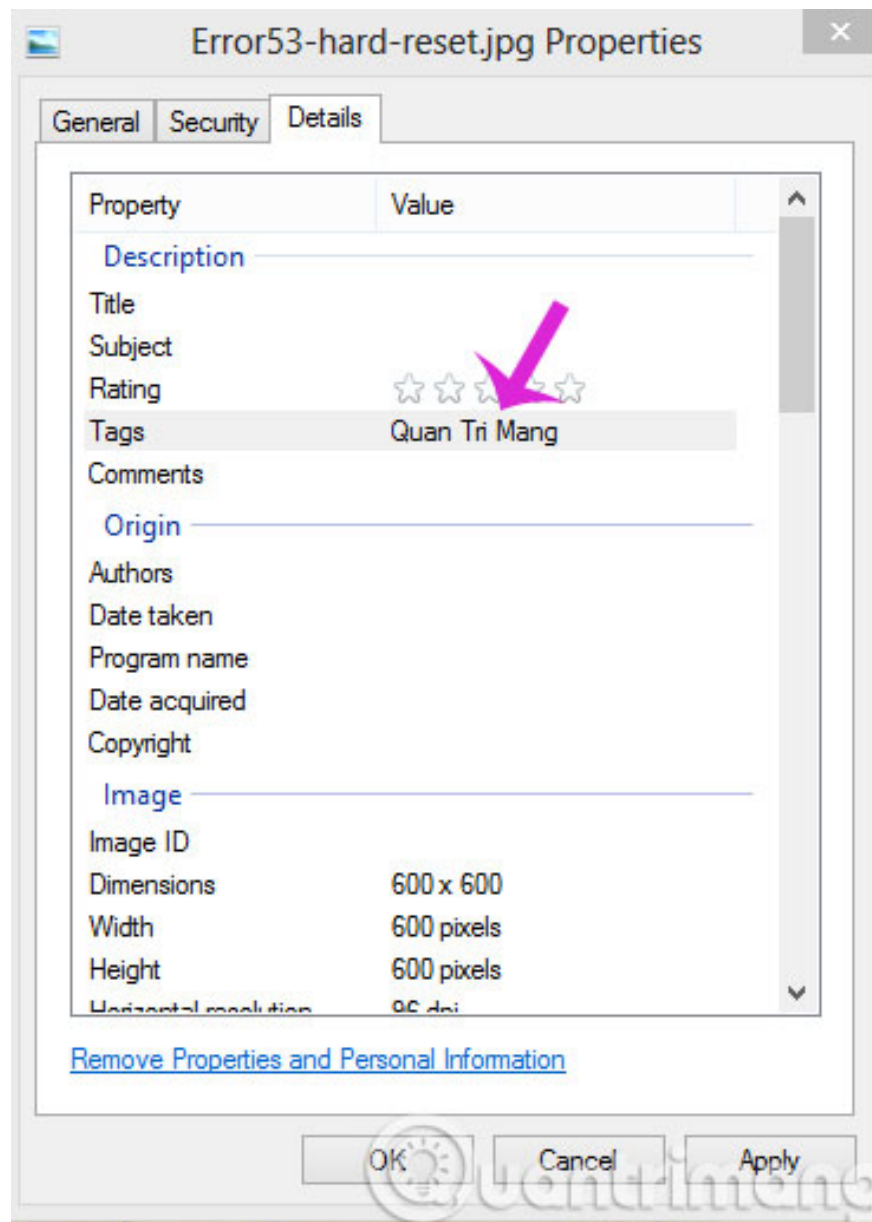

1. Sort by name

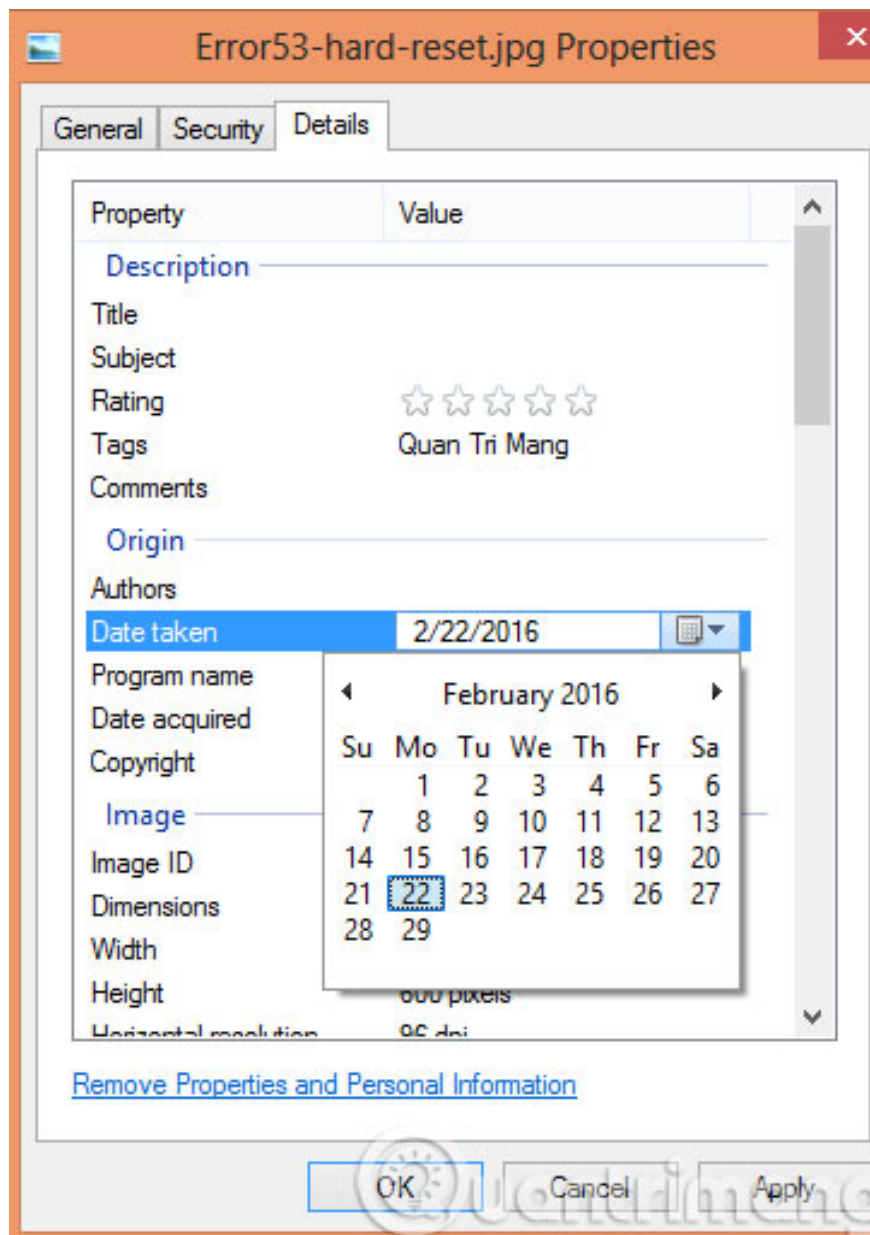

The simplest way is to arrange photos by clearly named folder, such as family photos, friends photos, work photos . Besides, collect those folders in the same location. (*usually the largest capacity partition*). When you need to search, just type the name in the search box of File Explorer as the result will be displayed for you.

2. Attach photo tag

There is another way to help you quickly find the image you need, which is to tag it by right-clicking on the image and selecting **Properties** . Next, click on the **Details** tab and then enter the **Tags** box and click **Apply** .

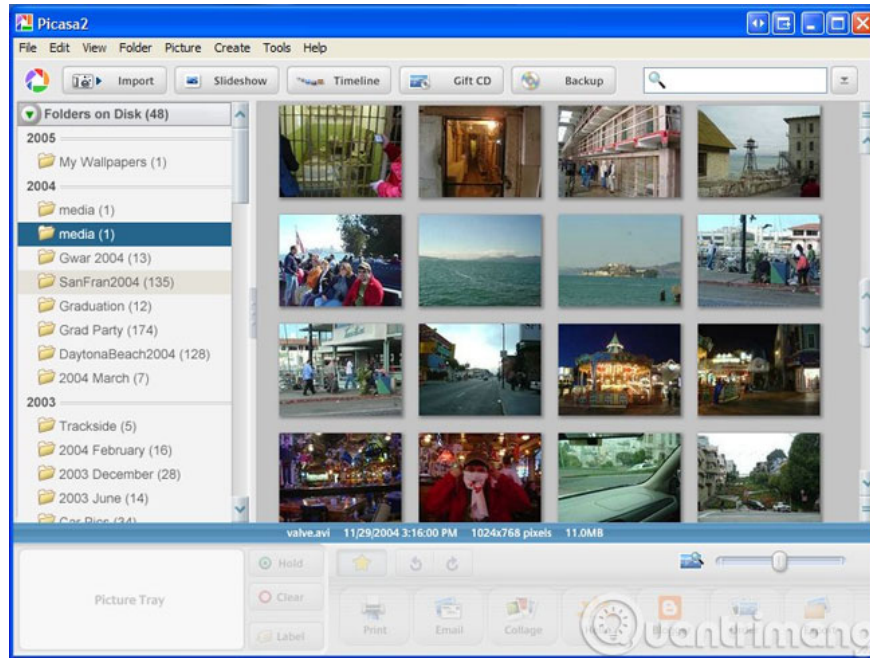

Later, in order to search for the Tag image, you just need to enter the tag in the search box of File Explorer, the system will automatically display the images containing this Tag.

In addition, you can set specific timelines for these photos by scrolling down to **Date taken** . To search again later, go to File Explorer and enter **data:** in the search box and select the date in the calendar interface that appears.

3. Use Picasa application

The last way is that you can "ask" the **Picasa** application to search for all photos saved on your computer and display them on the main interface of this application.

1. 4 tips to help identify photos that have been edited
2. Simple way to delete online photo backdrops
3. How to create Gif images quickly with Giphy

Good luck!
