

# 3 ways to quickly remove applications on Windows 11 from your computer

The application was unnecessary or caused a system error. The only fix is to uninstall the app. Today I will show you how to uninstall applications on Windows 11.

When using the computer, there are a few unnecessary and heavy applications that slow down the performance of the computer. Applications that are rarely used or cause system errors, software conflicts are inevitable. At this point, the only fix is to remove that application from your computer. So, today I will show you how to uninstall applications on Windows 11.

## 1. Uninstall apps using Start Menu

**Step 1:** Open the **Start Menu** and select **All apps** in the upper right corner.

**Step 2:** Then find the application you want to remove and right-click and select **Uninstall**.

**Step 3:** A confirmation window to uninstall the application will appear, select **Uninstall** .

In the case of a Win 32 application, after selecting Uninstall, the Control Panel window will open to the **Programs and Features** page . Find the application you want to remove, right-click it, and then select **Uninstall** .

## 2. Uninstall apps using Settings

**Step 1:** Press **Windows + I** key combination to open **Settings** .

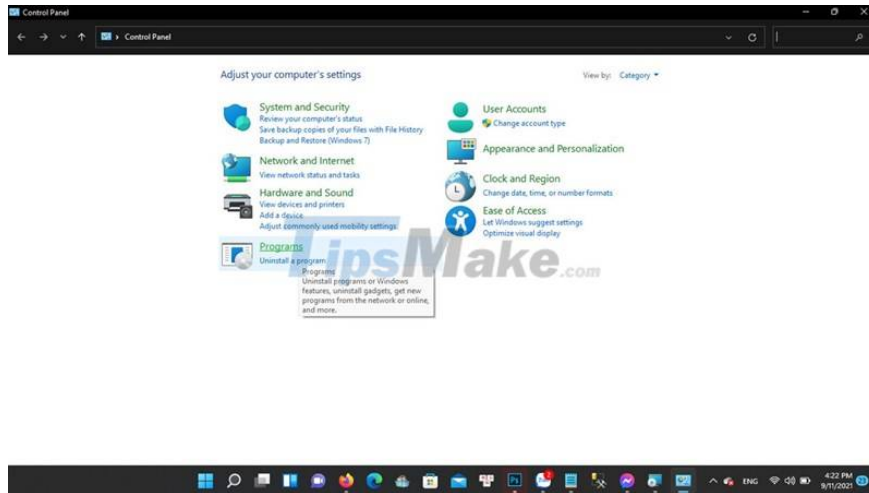

**Step 2:** After opening Settings, select **App** then select **App & features** . Tap the ellipsis on the app and select **Uninstall** .

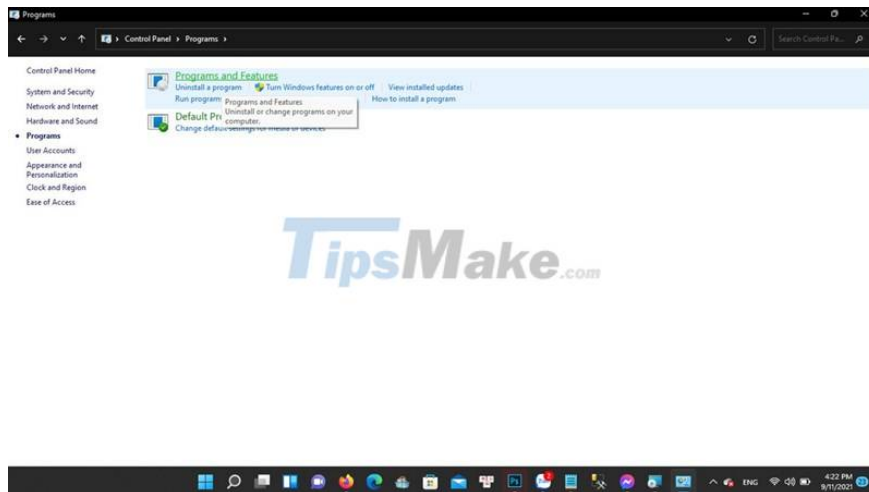

### 3. Uninstall apps using Control Panel

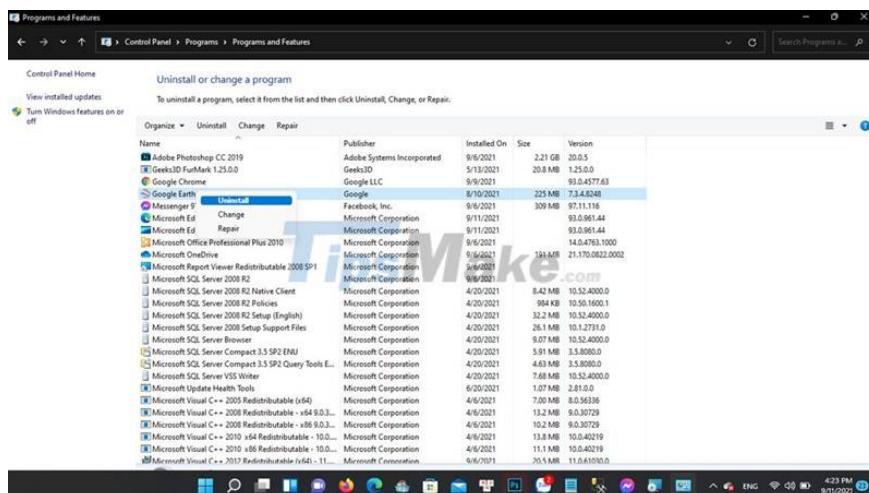

**Step 1:** Open **Control Panel** and then select **Program**.

**Step 2:** Then select **Program and Features**.

**Step 3:** At the **Program and Features** window . Find the application you want to remove, right-click it, and then select **Uninstall** .

Good luck.
