

3 ways to turn off annoying notifications from Game Center on iOS

If you are using an iOS device and often receive unpleasant notifications from the Game Center default application, follow the instructions below to turn them off.

If you are using an iOS device and often receive unpleasant notifications from the Game Center default application, follow the instructions below to turn them off.

Method 1: Log out of your account

Since this is the default iOS app, you will not be able to remove this application from the device. Therefore, you should choose the solution to log out of your Apple account by going to **Settings** > **Game Center** > pressing **Apple ID** and selecting **Sign out**

Settings

App Store

Method 2: Block invitations from friends

However, there are some games that need to log in to **Apple ID** to play, so please switch to block the game invite feature or make friends from **Contacts** or **Facebook** to avoid being bothered. In the **Game Center** section, turn off the following 4 features

Settings Game Center

GAME INVITES

Allow Invites

Nearby Players

- Allow friends to invite you to play games.
- Allow nearby Game Center players to find and invite you to multiplayer games over Wi-Fi or Bluetooth.
