

3 ways to update Windows 11 official version

Windows 11 was officially launched in October 2021, can be upgraded directly from Windows 10. This article shows you 3 simple ways to update Windows 11.

Windows 11 was officially launched in October 2021, can be upgraded directly from Windows 10. In this article, Thuthuatphanmem.vn will guide you through 3 simple ways to update Windows 11.

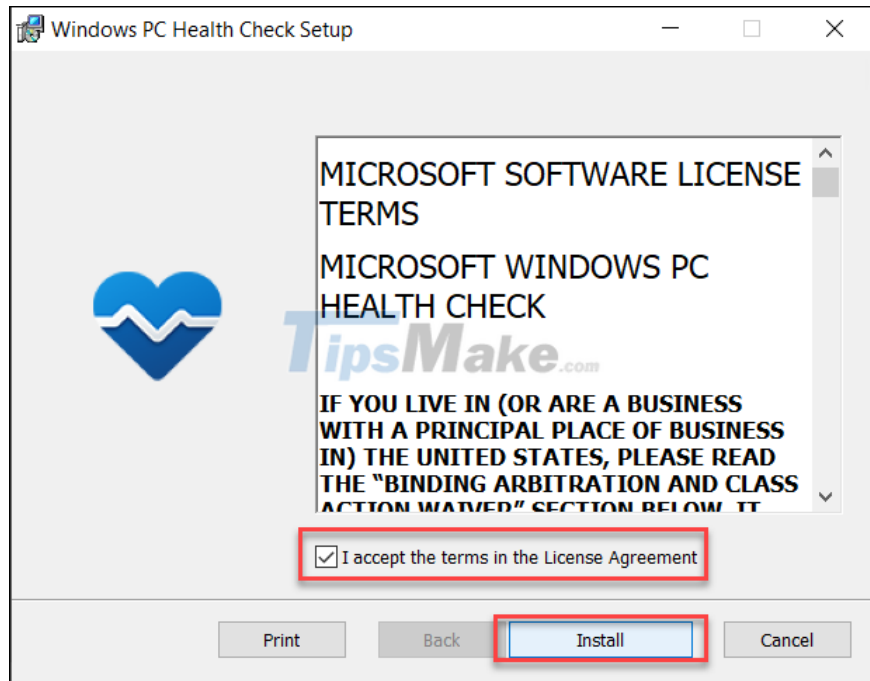

I. Windows 11 compatibility check

Before updating Windows 11, you need to make sure your computer is capable of meeting its requirements. Basically, Windows 11 has the following minimum requirements:

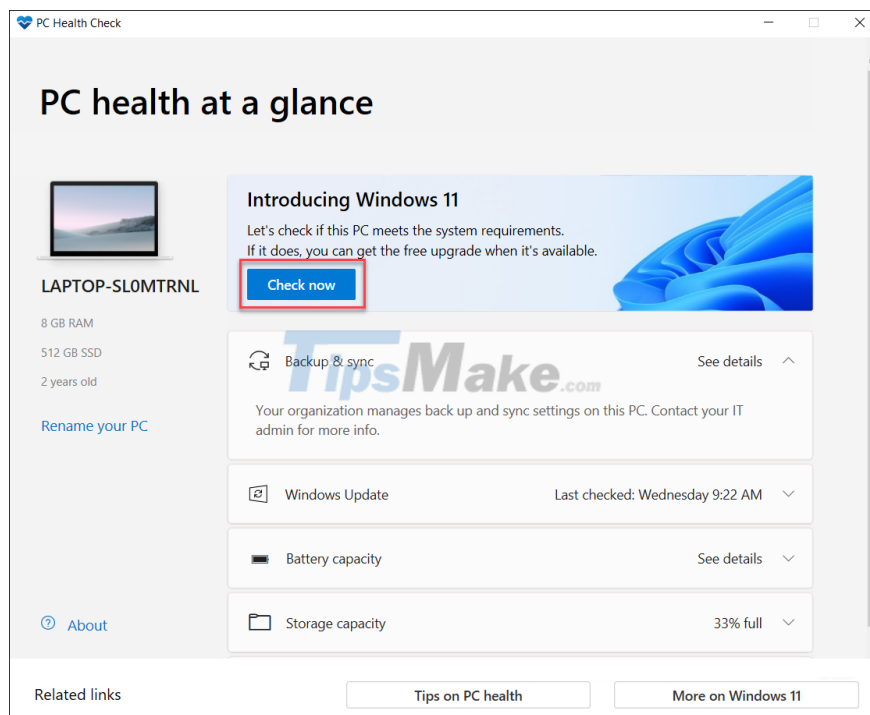

1. CPU: 1 GHz or faster, 2 cores or more, system type x64
2. RAM: 4GB
3. Memory: 64 GB or more
4. System Firmware: UEFI, with Secure Boot
5. TPM: version 2.0
6. Graphics card: DirectX 12 compatible or higher with WDDM 2.0 . driver
7. Display: High definition (720p), more than 9 inches diagonal, 8 bits per color channel.

To check if your computer meets the requirements, [download the PC Health Check Tool](#).

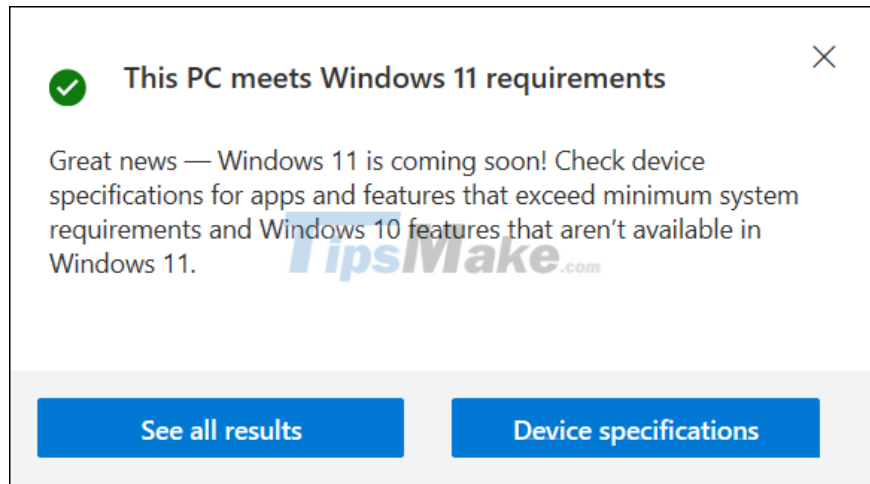

Open the downloaded Setup file, check I accept the terms in the License Agreement >> Install.

When the installation is complete, open PC Health Check and then click Check now.

If the screen says This PC meets Windows 11 requirements, it means that your computer meets the minimum requirements to update Windows 11.

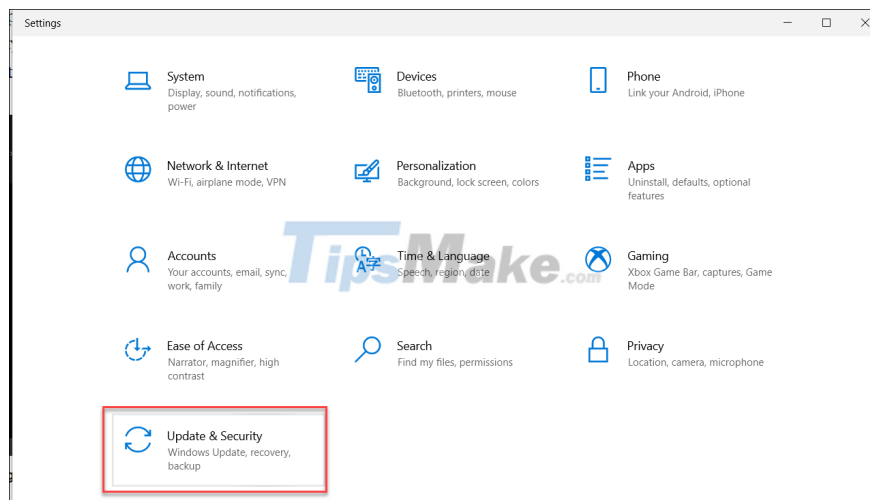

II. Some ways to update Windows 11 official version

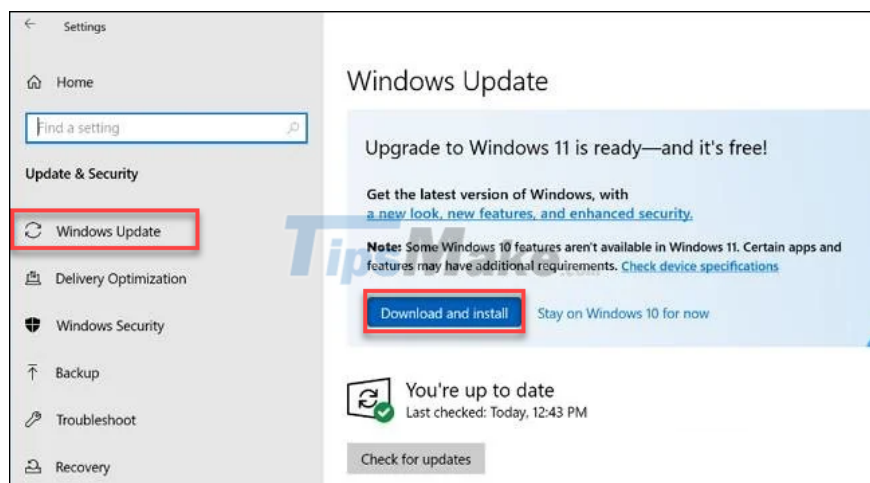

1. Update Windows 11 with Windows Update

Microsoft is gradually rolling out Windows 11 to the right Windows 10 computers. So you can find the update in Windows Update.

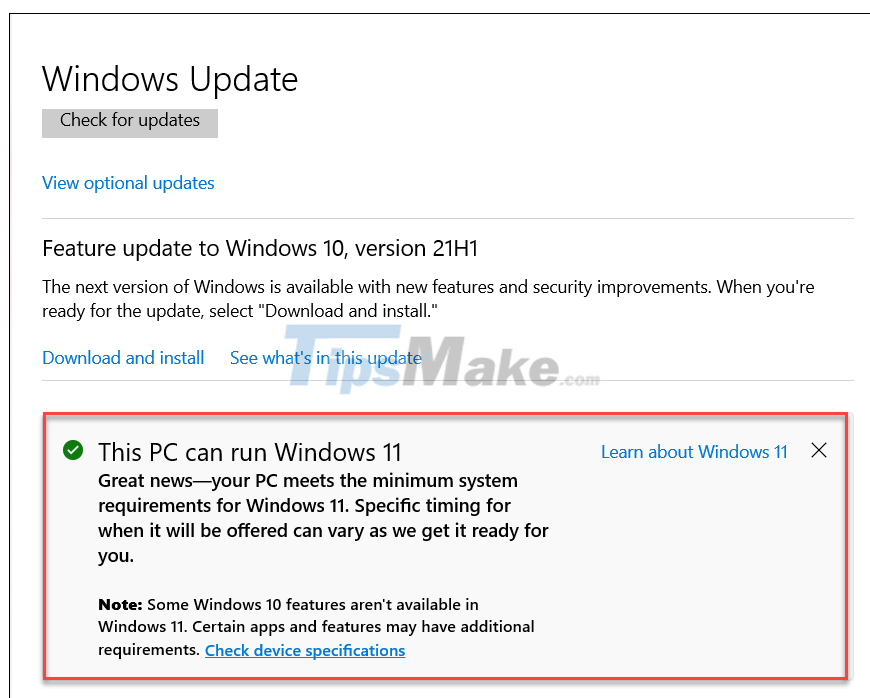

Step 1: Press Windows + I to open Settings, click Update & Security.

Step 2: You select the Windows Update item in the left menu. Next you will see a notification to update Windows 11 from Microsoft, click Download and install to let the computer automatically download and update the new operating system.

If you don't see the above message, but instead 'This PC can run Windows 11', it means the update hasn't arrived yet.

You can wait or follow the method below to install Windows 11 immediately.

2. Install Windows 11 directly using Windows Installation Assistant

This is a very simple way for you to install Windows 11 immediately on an eligible computer. First, visit the Download Windows 11 website at [this link](#).

Click Download Now under Windows 11 Installation Assistant.

Download Windows 11

There are three options for installing or creating Windows 11 media. Take a look at each one to determine the best option for you.

If you are upgrading from Windows 10, we recommend that you wait until you are notified through Windows Update that the upgrade is ready for your PC.

Before installing, please refer to the **PC Health Check** app to confirm your device meets the minimum system requirements for Windows 11 and check the **Windows release information status** for known issues that may affect your device.

Windows 11 Installation Assistant

This is the best option for installing Windows 11 on the device you're currently using. Click **Download Now** to get started.

 Before you start

Download Now

Click to open the file you just downloaded.

Windows 11 Installation Assistant

This is the best option for installing Windows 11 on the device you're currently using. Click **Download Now** to get started.

Download Now

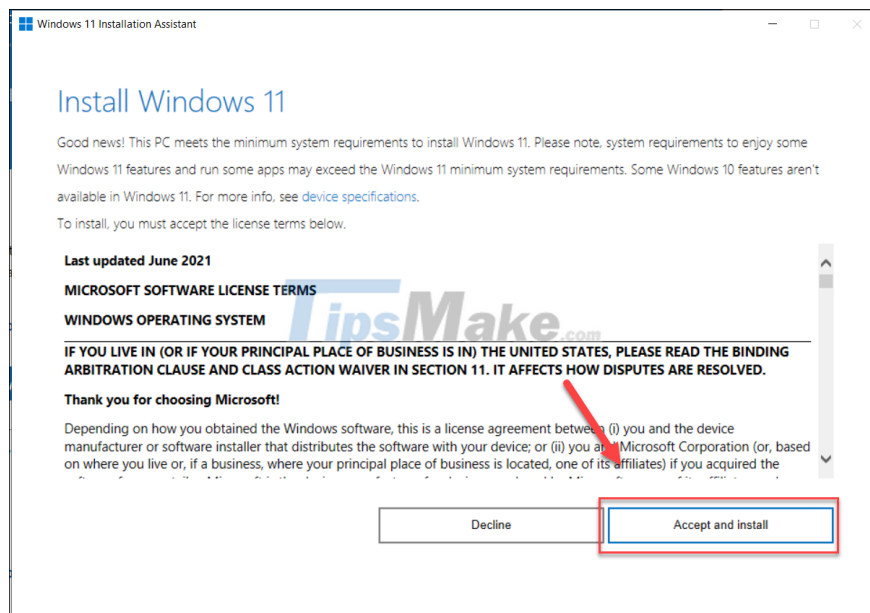

Create Windows 11 Installation Media

If you want to perform a reinstall or clean install of Windows 11 on a new or used PC, use this option to download the media creation tool to make a bootable USB or DVD.

 Windows11Installa...exe

Show all

Select Accept and install.

The rest of you is quite simple, just wait for the application to automatically load Windows 11 and install the operating system.

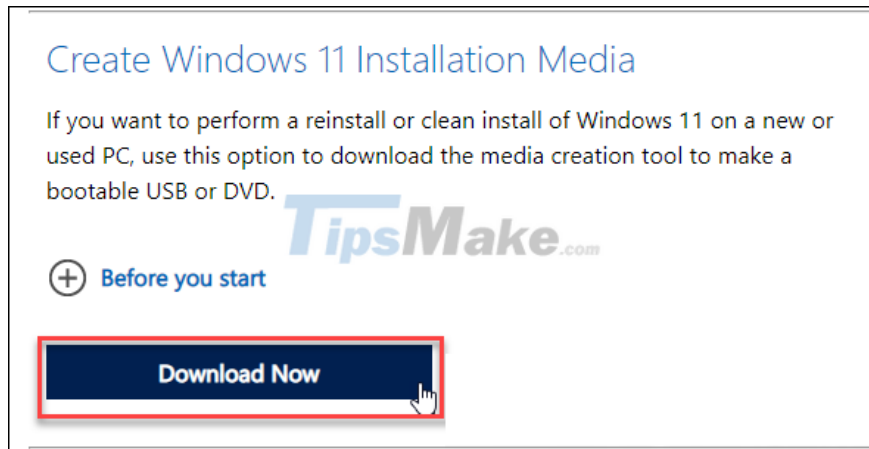

3. Install Windows 11 using Installation Media

This method requires you to have a USB or portable hard drive that acts as the boot device.

Step 1: Plug your USB (portable hard drive) into the computer, make sure it has at least 8GB of memory.

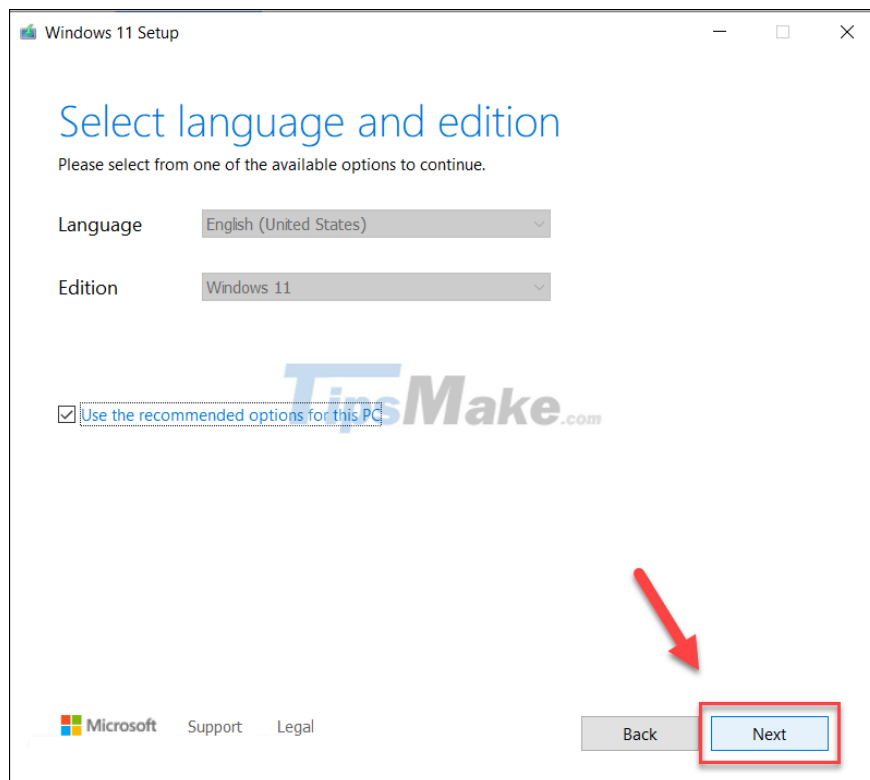

Step 2: Go to the [Download Windows 11 page](#) and download Installation Media.

Step 3: Open the downloaded file and click Accept at the first screen.

Continue to select Next.

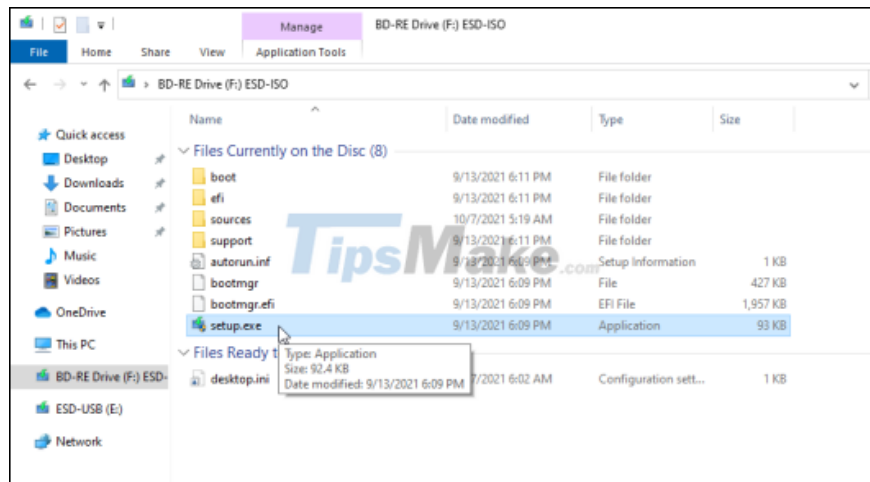

Step 4: Click to select your USB (default is drive D) >> Next. If your USB does not appear here, double check that the connection is secure, and then click Refresh drive list.

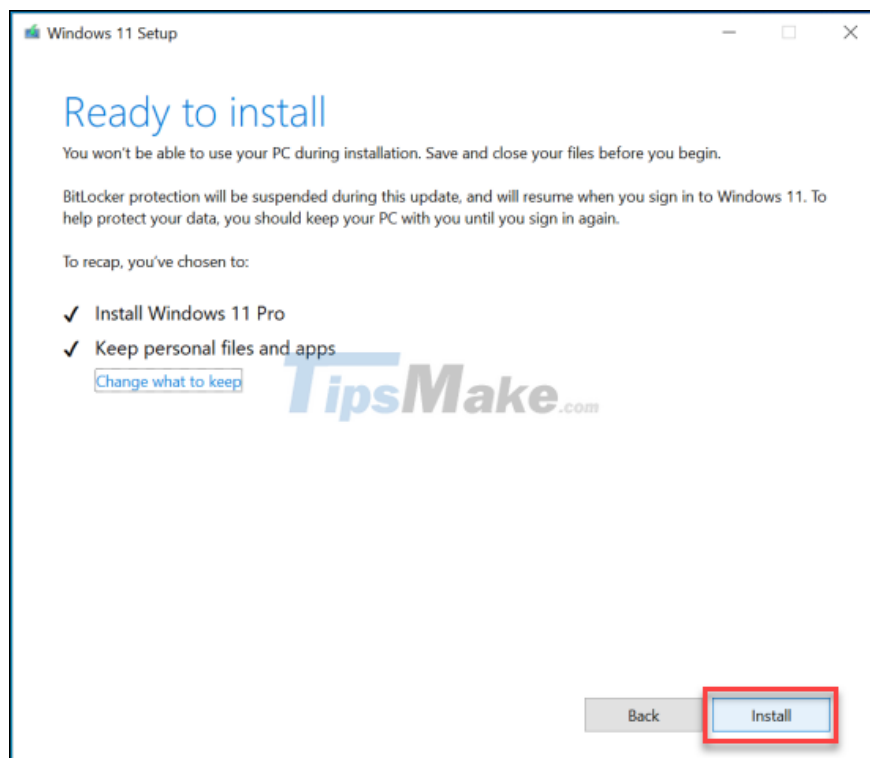

Step 5: The tool will automatically download Windows 11 to your USB, when the process is complete, click Finish.

Step 6: Now it's time to install Windows 11. First you open the USB storage in File Explorer. Click Setup.exe.

Microsoft will notify you which files and settings are kept. Continue to click Next, until the final screen is Install. Windows 11 will run the upgrade and restart automatically.

Above are detailed instructions on 3 ways to install Windows 11 on a Windows 10 computer. If you want to install Windows 11 completely (erase all personal data), then use the method of booting the operating system by USB. .
