Sometimes you need to review the file download history on Chrome or open the Download folder of your browser. Through this directory you can review the downloaded file link, open the folder containing the downloaded file to your computer. Today, TipsMake.com will guide you 3 ways to view the download history of Chrome.

Sometimes you need to review the file download history on Chrome or open the Download folder of your browser. Through this directory you can review the downloaded file link, open the folder containing the downloaded file to your computer. Today, TipsMake.com will guide you 3 ways to view the download history of Chrome. Please take a look.

Method 1: View download history with Chrome shortcut

Press **Ctrl + J** for quick access to the download history on Chrome. Here you will see a list of downloaded files, file names, links to download the original files. If you need to find the downloaded file to see where it is stored on your computer, click **Show in folder** or **Show in folder**.

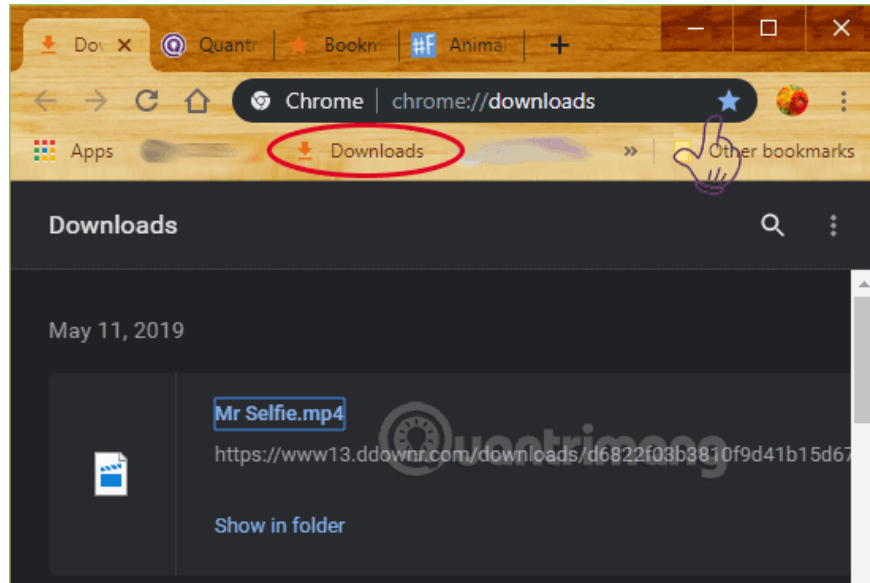

Method 2: View the download history via the address bar

You enter **chrome://downloads** into the address bar.

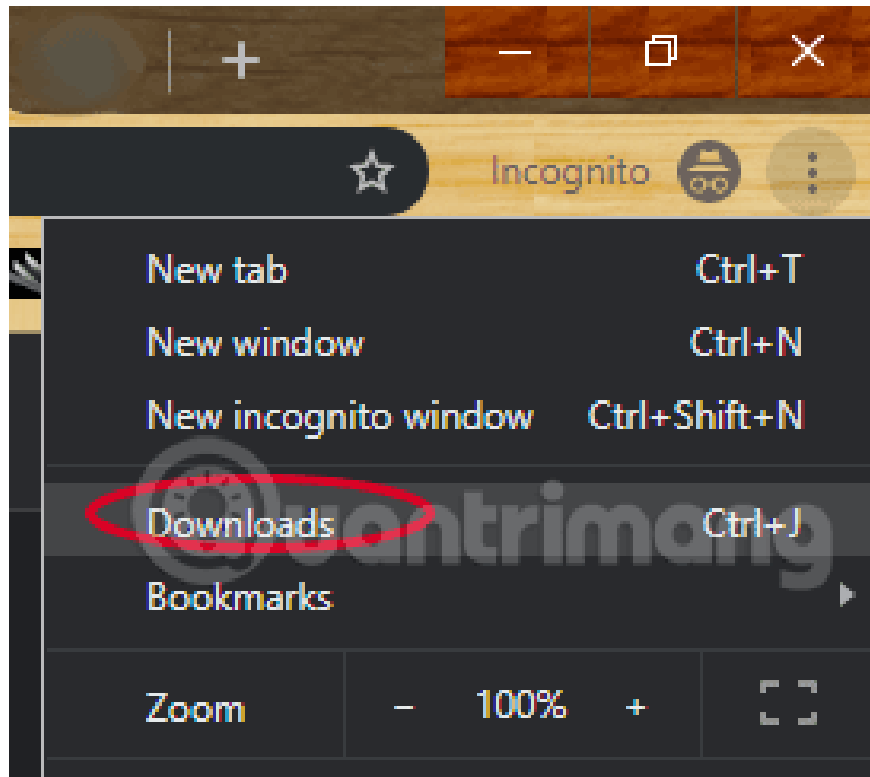

Click **the star** icon at the end of the address bar so it turns green. Then, the **Download** icon will appear on the **Bookmark** bar. From now on, simply click the Downloads icon on the bookmark bar to open the download page on Chrome.

Method 3: Open the downloads folder on Chrome via installation

You click on the menu ? > select **Downloads / Downloads** , the download folder will appear as 2 ways above.

The easiest way is to remember the combination of shortcut keys Ctrl + J, just press these 2 keys at the same time that you can review the file download history on Chrome, find the download link or the folder containing the file you missed forgot.

Chrome in the screenshot above is Chrome 74, with lots of new features. Especially dark mode, quite complete, interested readers can see how to enable dark mode on Chrome.
