

30+ beautiful black dark wallpapers for phones, OLED screens

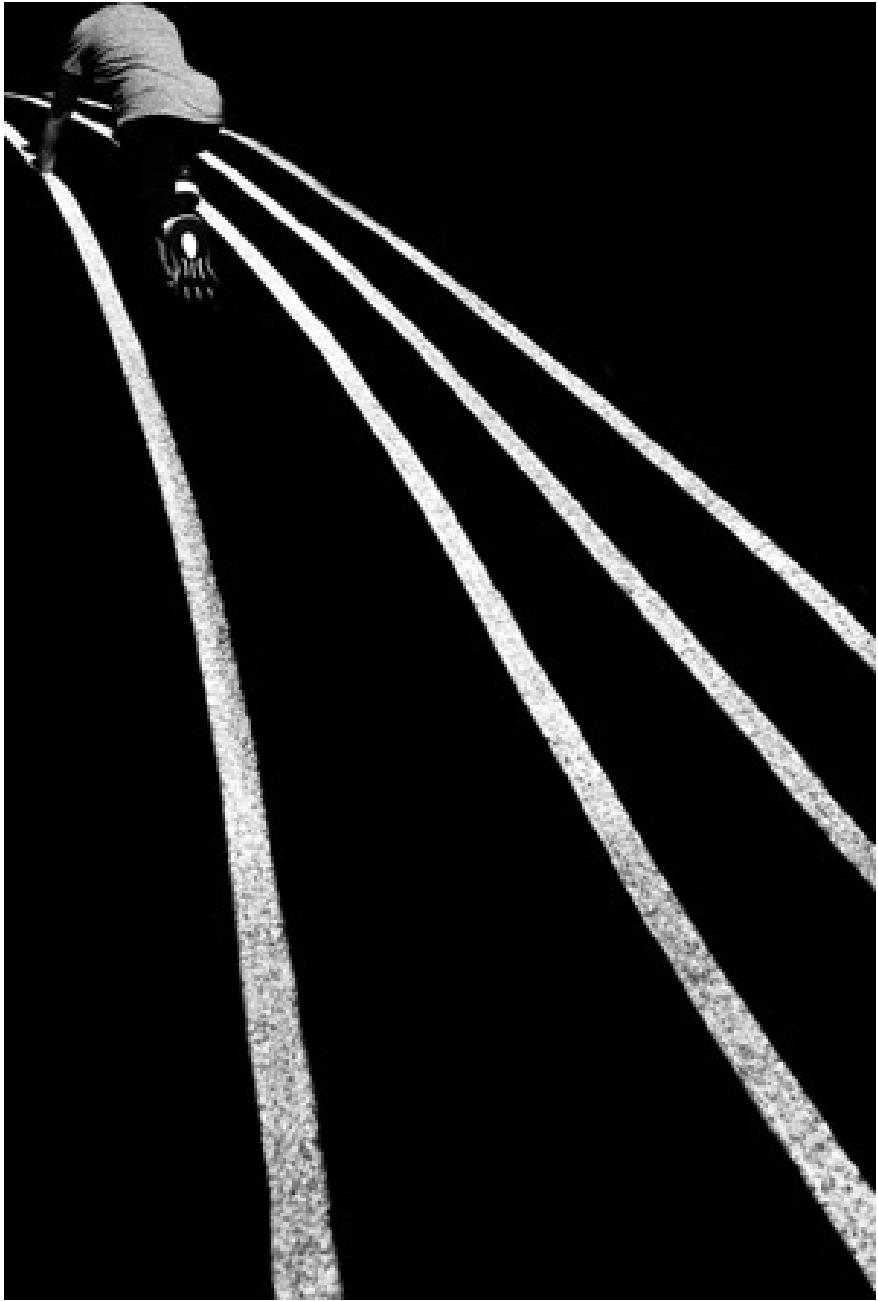

Black wallpapers or dark backgrounds look better with phones with OLED displays. Here are more than 30 dark wallpapers created by Phonearena.com, but just look, you want to download right to your phone.

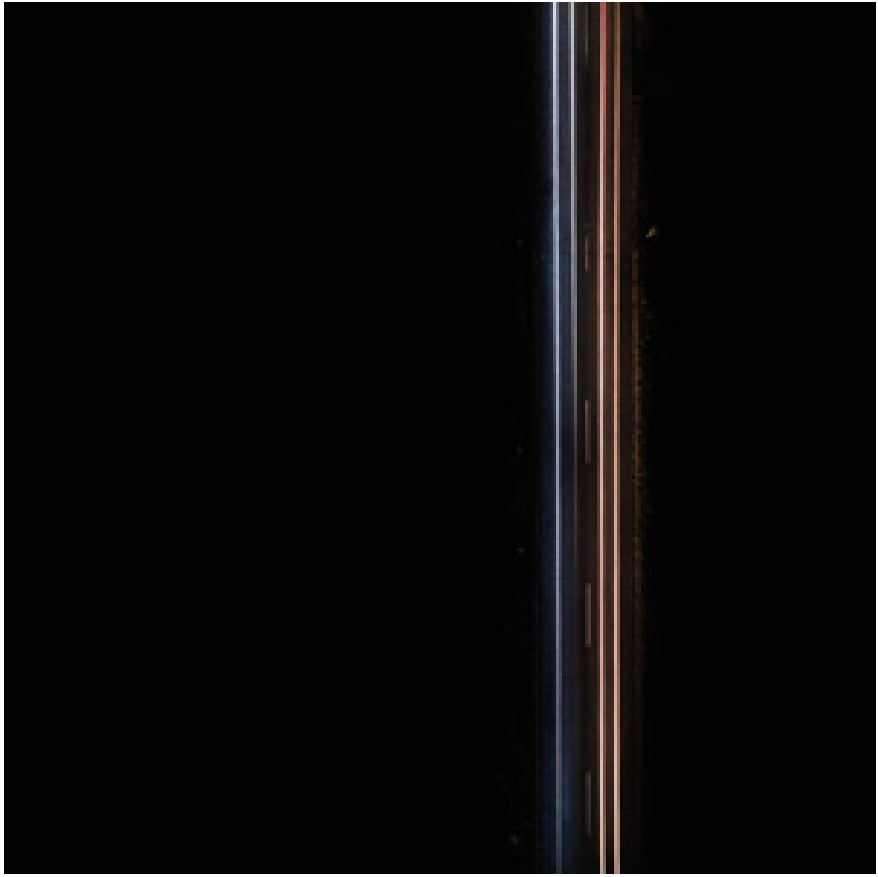

Dark wallpapers look better on OLED screens and are especially good when you don't want your eyes to be disturbed by bright colors at night. Darker backgrounds are also less annoying, not confusing with icons and widgets on the main screen, and can exude an elegant line for the design of any black or gray smartphone. Come on.

And the collection of black dark wallpapers for OLED screens of this week's phone of Phonearena.com are night city scenery, blurry landscapes, dark forests and more! Before downloading the full-size wallpaper collection from the Creator's Drive itself, take a look at these beautiful phone wallpapers.

These wallpapers have been resized to reduce capacity, with the original file you can use as wallpaper on the latest Android and iPhone phones such as Samsung Galaxy S8, Note 8, iPhone X, LG V30, Nesux, Pixel 2, can even be used to make the desktop wallpaper still taut.

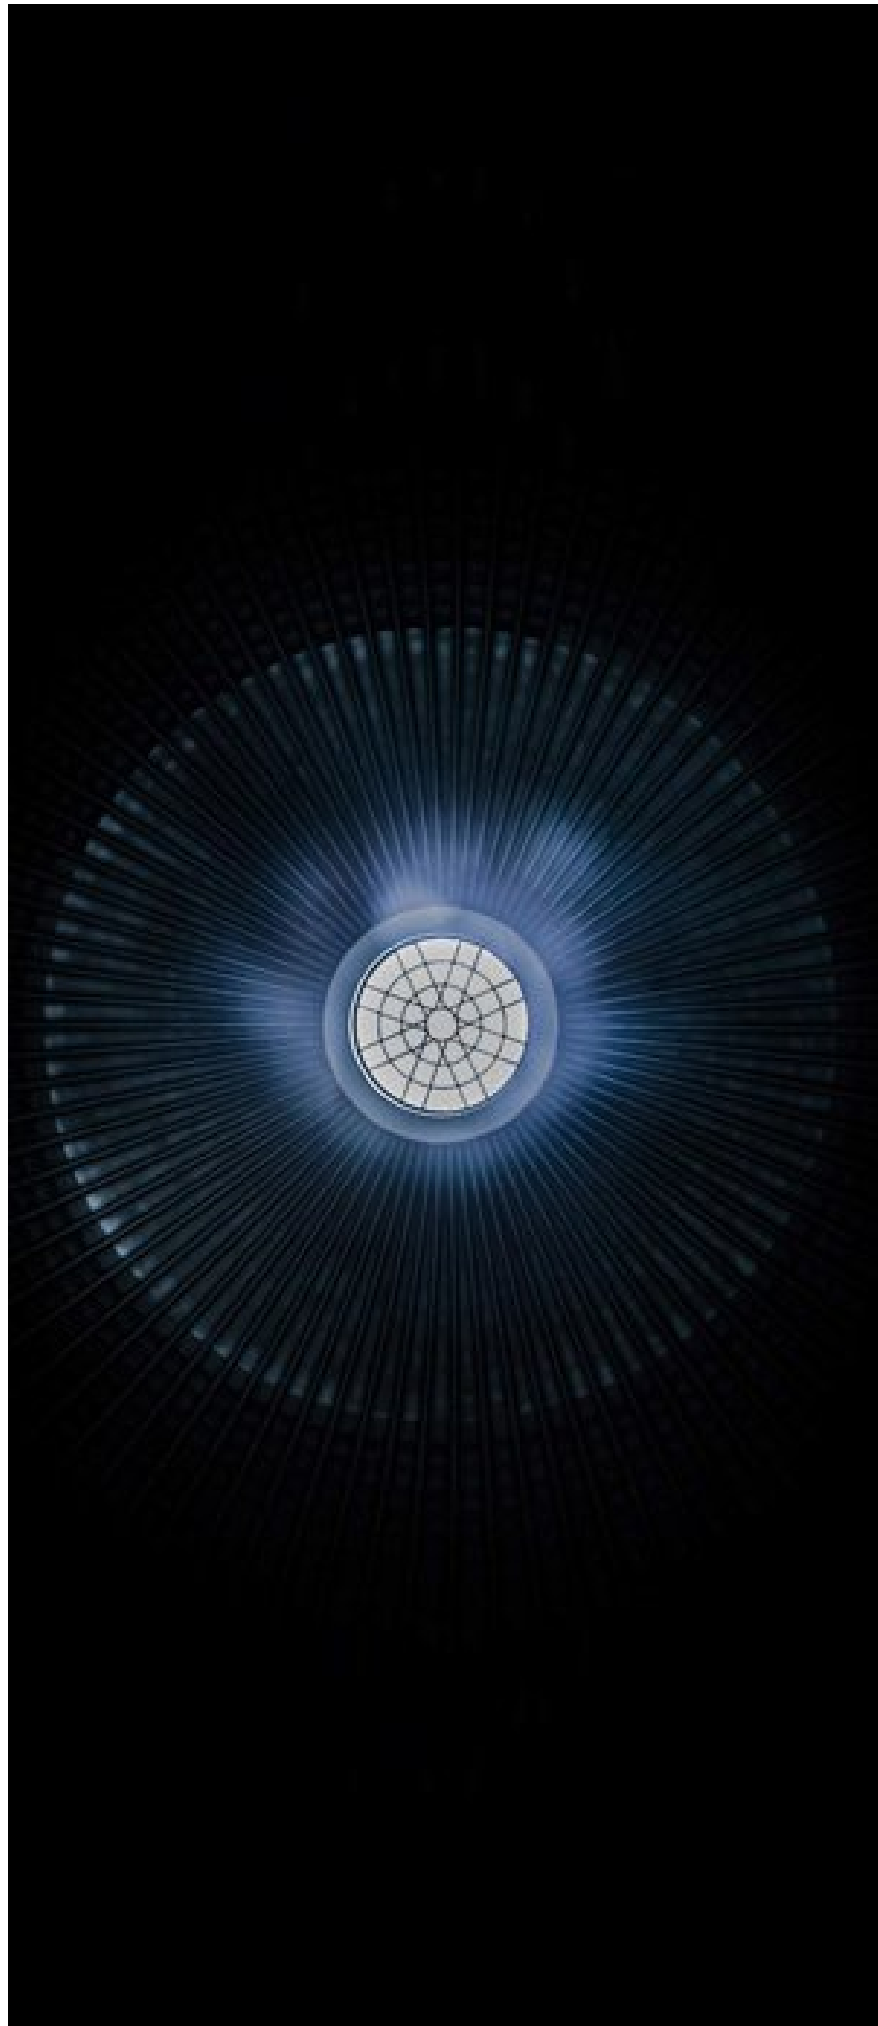

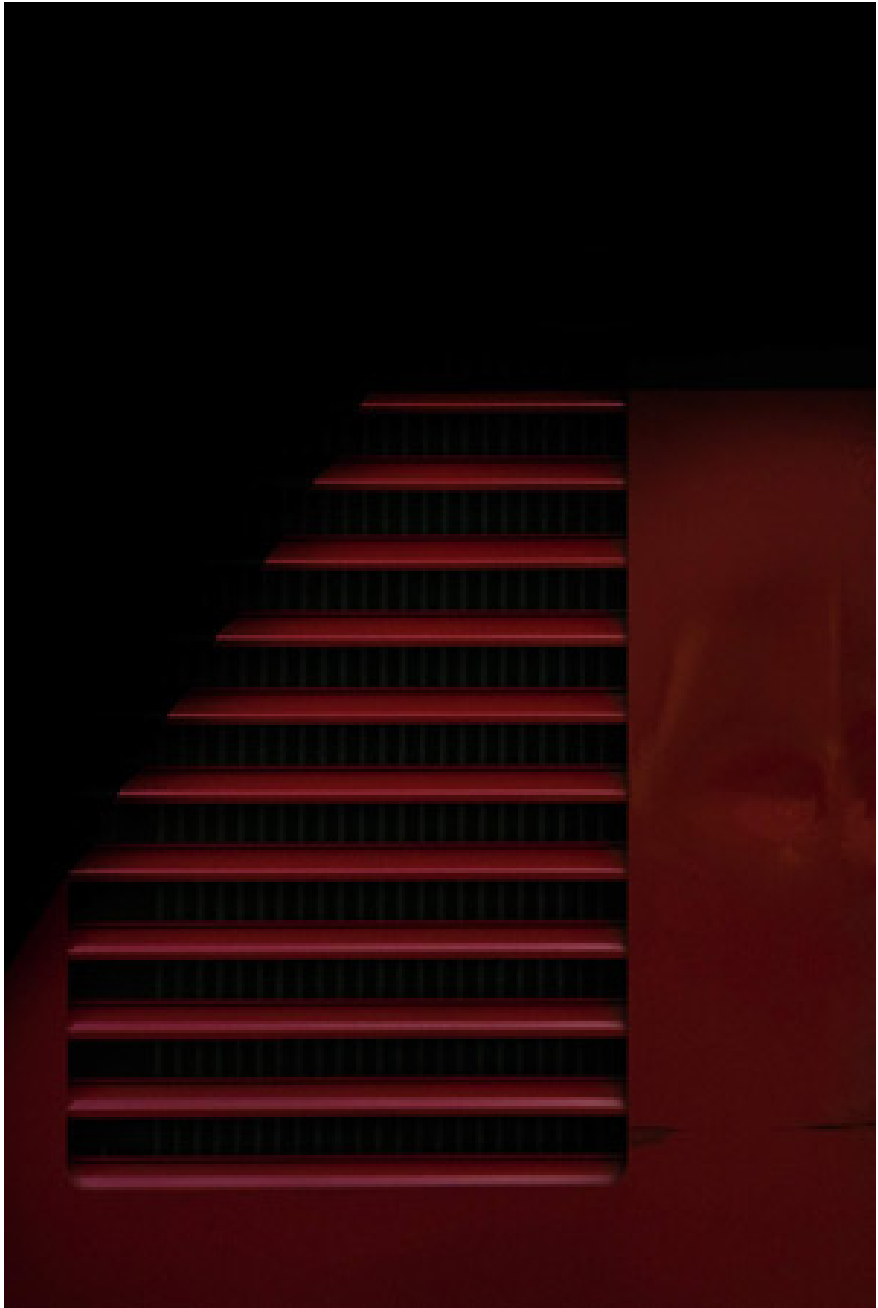

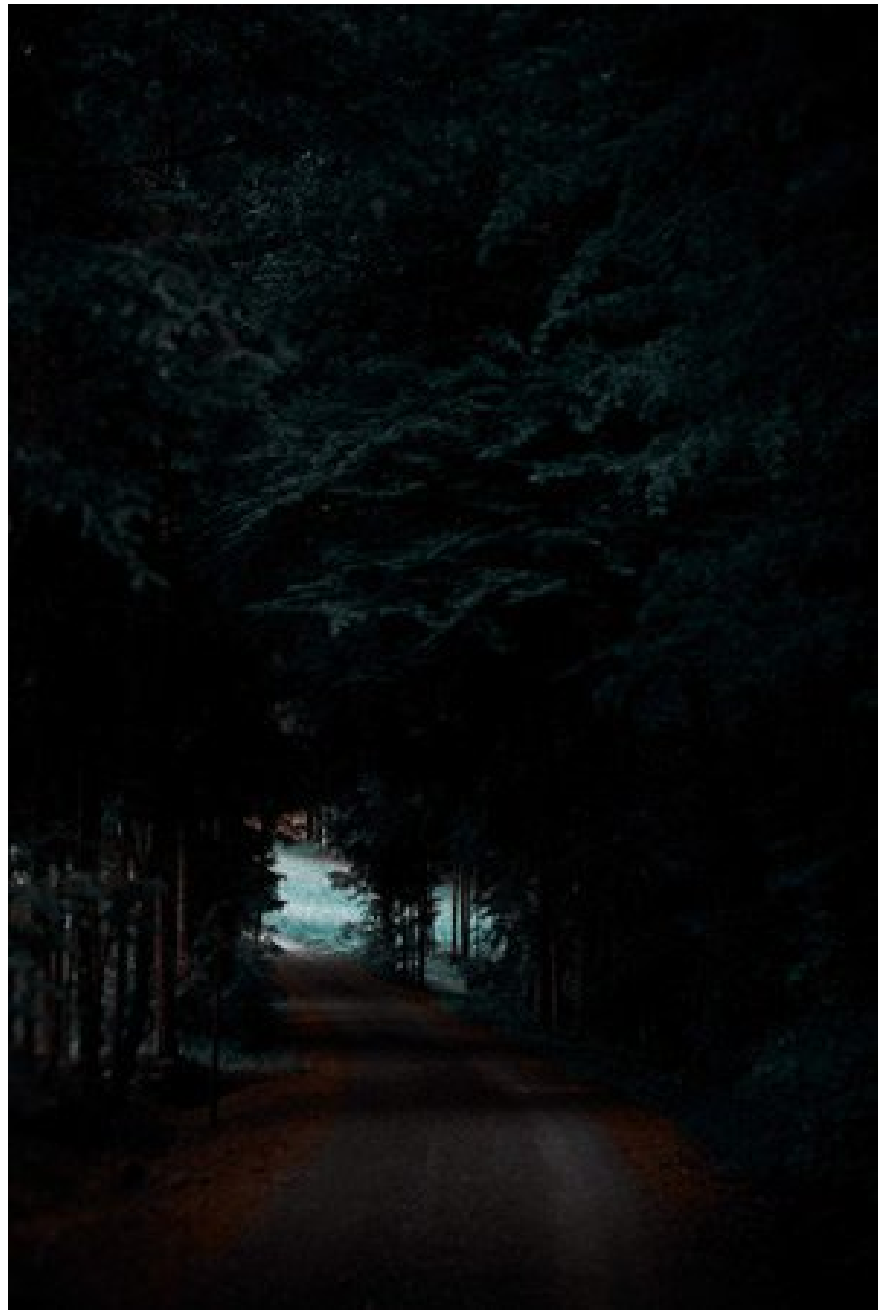

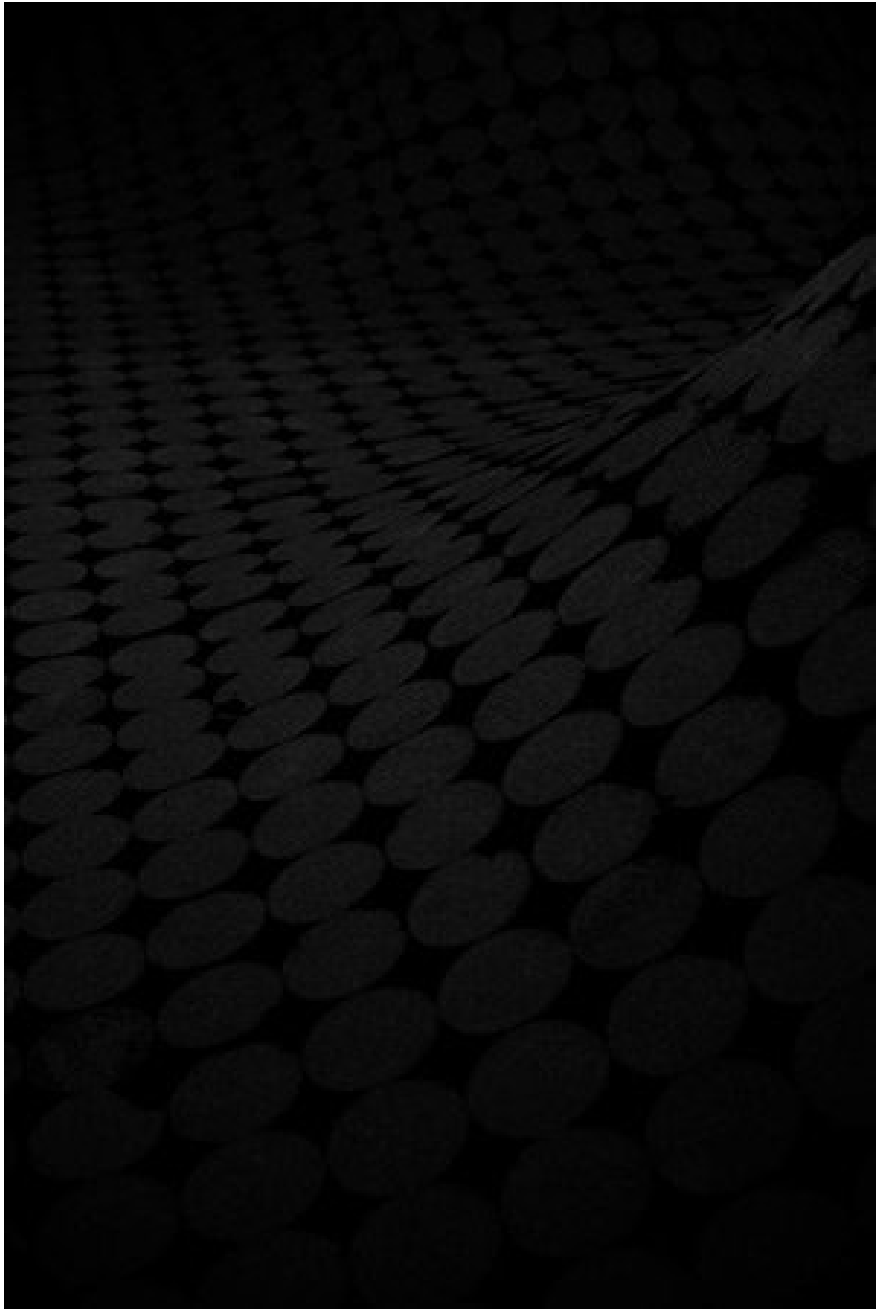

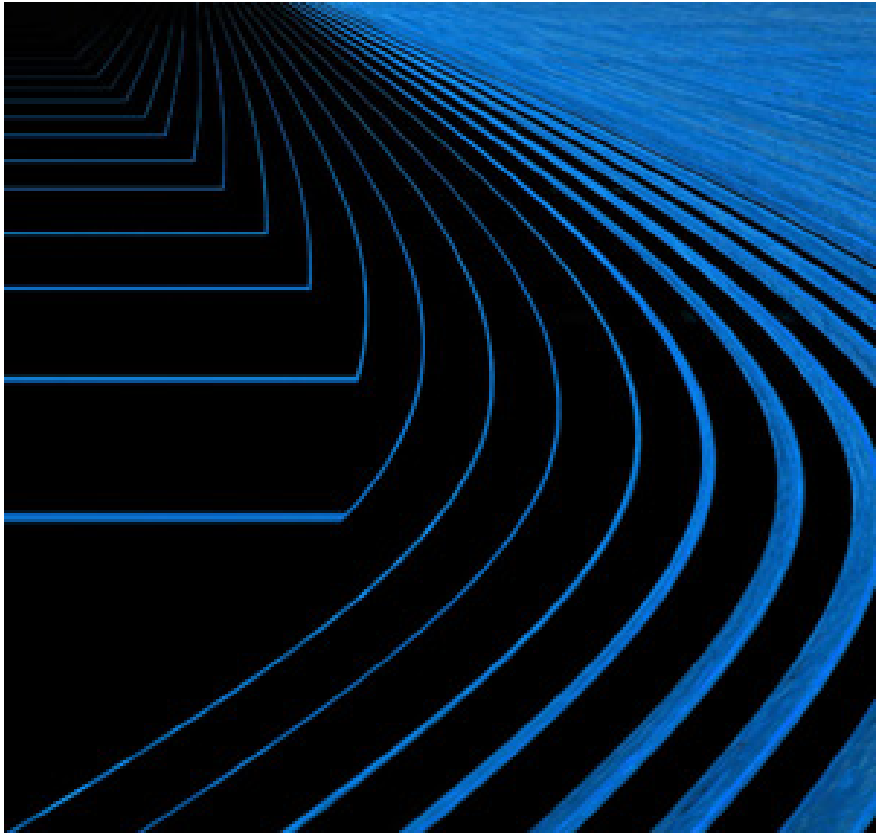

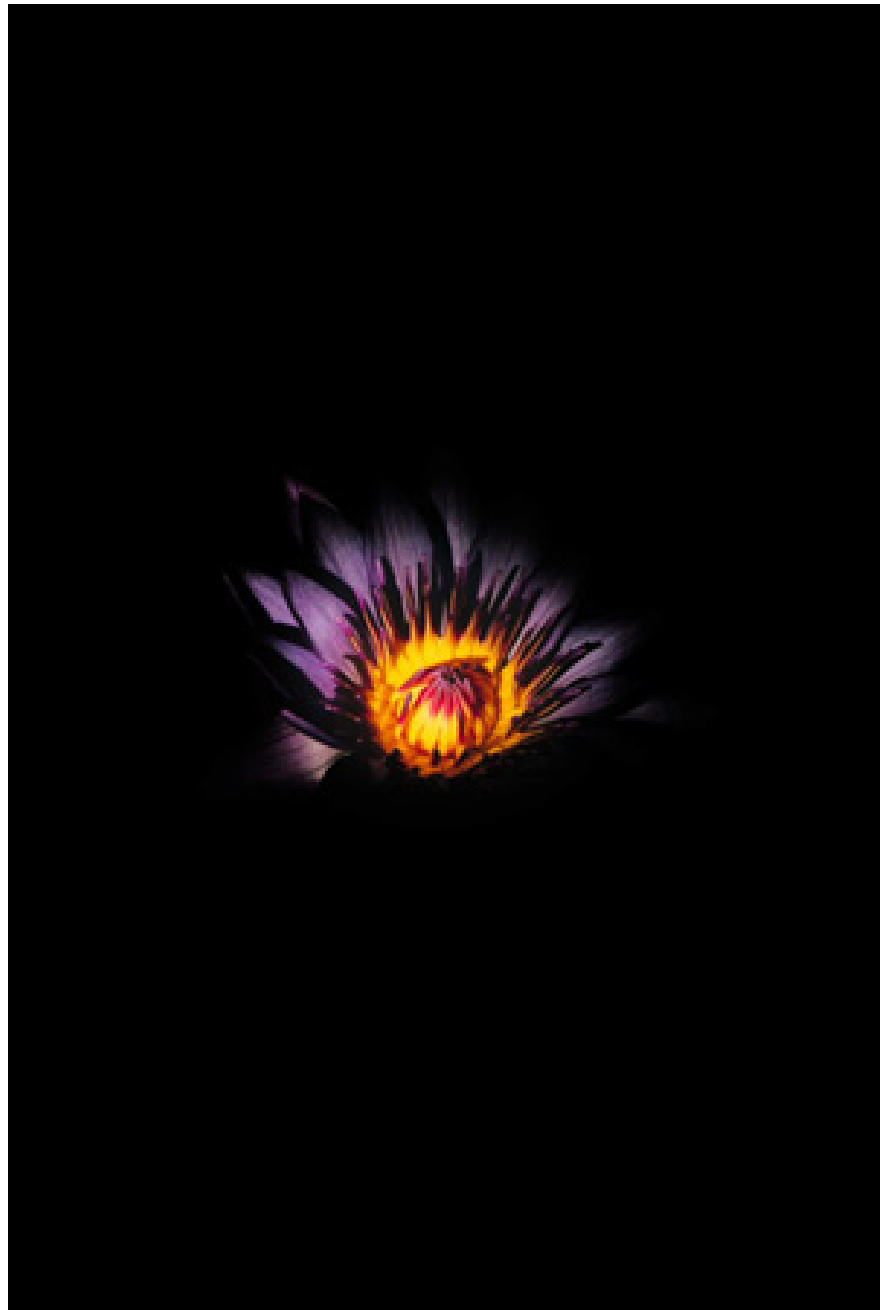

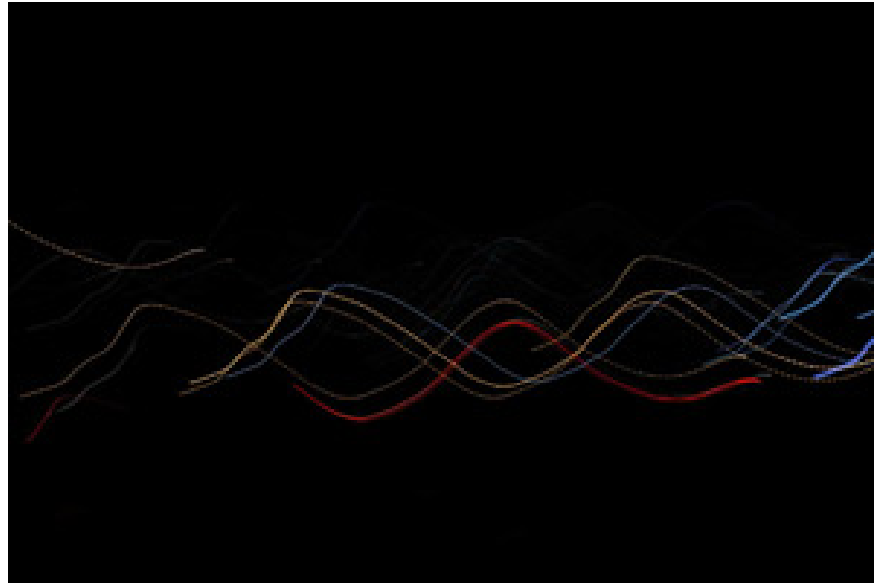

Note: The original wallpaper is quite heavy, ranging from 5MB to 8MB per photo, you should connect to WiFi or download it on your computer and then give it to your phone.

Download the wallpaper set

Hope you find your favorite wallpaper for your device.
