

## 33 thoughts make Elon Musk a great person

You should not do things differently because they are different. They need to be better.

There are many people who imagine the future but only a few can turn things into their heads into reality. Here's why Elon Musk is among those few.

In South Africa, Elon Musk became a millionaire when he was less than 30 years old. In the role of PayPal founder, he created a new solution for people to transfer money to each other more easily. Next, at Tesla, Elon Musk turned electric vehicles into mainstream products with the goal of eliminating gasoline and other contaminant fuels. And now, with the release of SpaceX, he aspires to someday bring life to Mars.

Elon Musk is considered a "Thrillionaire" - the high-tech business class always seeks to use their assets to make dreams of "science fiction" a reality. If anyone can do it, Musk is one of them!

Here are 33 "Insight" that make Elon Musk a great person to admire the world!

1. When something is important enough, do it even if you are at a disadvantage.
2. If you're trying to create a company, it's like you're baking a cake. You must have all the ingredients with the right content.
3. I think this is the best advice: constantly think about how you can do things better and always doubt yourself.
4. The way to CEO's office should not go through CFO's office and it should not go through the Marketing department. It needs to go through the engineering and design department.

- 5.** A company is a group that is organized to create products or services and it is almost about how people and how they are excited about creativity. I really want to recognize people with outstanding talents. I just happened to be the face of companies.
- 6.** No problem when you put the number of eggs you have in a basket as long as you can control what happens to that basket.
- 7.** People work better when they know what their goals are and why. It is very important that employees always look forward to coming to the office every morning and like to work.
- 8.** Trademarks are just about awareness and awareness that need to match reality over time. Occasionally, it will move forward, sometimes it goes backwards. However, the brand is simply the collective impression of some people about a product.

- 9.** The problem is that in many large businesses, the process becomes an alternative to thinking. You are encouraged to work as a small part of a complex machine. It is clear that it only surrounds you with people who are not intelligent and not creative.
- 10.** I don't think there will be much potential if you have an attractive product and people are willing to pay more for that. I think that's what Apple has shown. You can buy a cheaper mobile phone or laptop but Apple products are much better than it is and people are willing to pay for that extra value.
- 11.** Great companies are always built on great products.
- 12.** I don't create companies just to create companies but to accomplish everything.
- 13.** Everyone should pursue what they are passionate about. This will make them much happier than other things.
- 14.** Failure here is an option. If something fails, you still haven't improved enough.
- 15.** It is important to like people who work with you or your life [and] your work will become miserable.

- 16.** Do not deceive yourself into thinking about something that is working when it is not, otherwise, you will be tied to a wrong solution.
- 17.** I am interested in things that change the world or have an impact on the future and new technology - where you see it and you are like *"Wow, how can this happen? How could it be?"*
- 18.** What makes thinking about innovation possible? I think that is really thinking settings. You have to decide ".
- 19.** The talent is extremely important. Like a team in sports, when every player is an excellent player, they will often win. However, the achievement will be doubled if all members cooperate with each other and apply good tactics.
- 20.** Be really mindful of negative feedback and try to gather a lot, especially from friends. Almost no one can do this but it is extremely useful.
- 21.** Work is like hell. I mean, you have to give it 80 to 100 hours a week. [This] will help increase the advantage for success. If other people work 40 hours a week and you work 100 hours a week, then, even if you do the same thing, you know that you will get something for 4 months while another person takes 1 New year can be done.
- 22.** The first step is to think that it can and then it will happen.
- 23.** Formation and development of a business career need to think more about the improvement, motivation and determination of all people who make it because they are all related to the products they sell. .
- 24.** My biggest mistake may be over-esteeming one's talent without paying attention to their personality. I think the important thing is whether they have a kind heart.
- 25.** Persistence is very important. You should not give up until you have to give up.

- 26.** When Henry Ford made cheap and sure cars, people said, *"Oh, what happened to the horse?"* It was a huge bet Ford had made and it became a reality.

27. When a person has a breakthrough innovation it is rarely something small. Extremely rare. Usually it will be a series of things that are gathered in large numbers to become a huge improvement.
28. You should not do things differently because they are different. They need to be better.
29. **The** mistake is to hire too many people to complete something complicated. The amount never compensates for the talent in finding the right answer (2 people who don't know something are never better than a person). This will slow progress and make the project very expensive.
30. In college, I wanted to participate in something that could change the world. And now I'm doing that.
31. Life is too short to hate for so long.
32. Don't be afraid of new arenas.
33. Become an entrepreneur like eating glass and start going to hell.
