2. Instructions to change iOS interface without jailbreak
3. How to customize the main screen interface on Galaxy S6 / S7 / Note 5 does not need to root the device

## 1. Change wallpaper

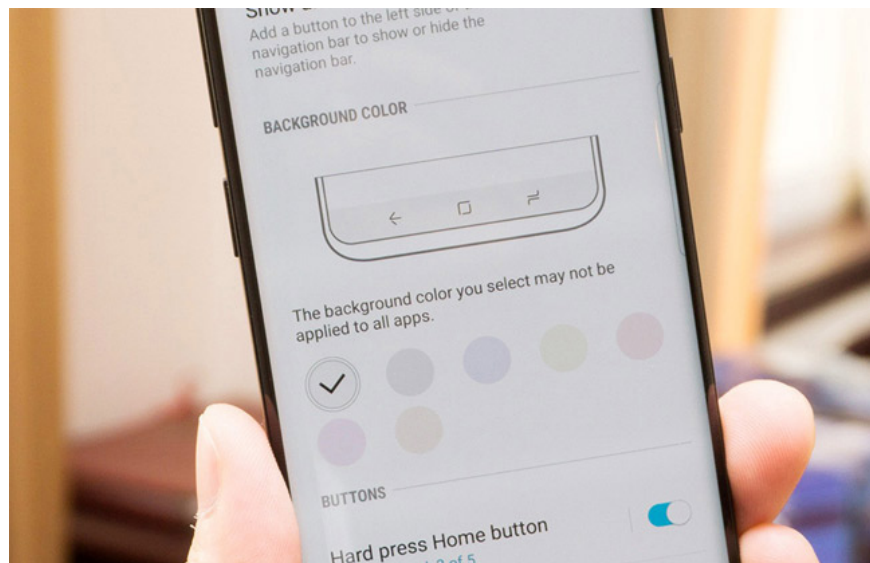

The phone wallpaper is like a way to stand out in front of friends and relatives, when you look at an interface with a beautiful wallpaper you will definitely feel excited about each time you use and play. Currently, there are many apps that provide users with beautiful, high quality wallpapers like ackdrops and Wallz. In it, Backdrops has a wallpaper background with extremely high quality and beautiful resolution. Wallz also offers a wide range of wallpapers from fun, serious or natural photos, to computer pictures to real-life photos.

1. Download the Backdrops app for Android.
2. Download the Wallz app for Android.

## 2. Color the navigation bar

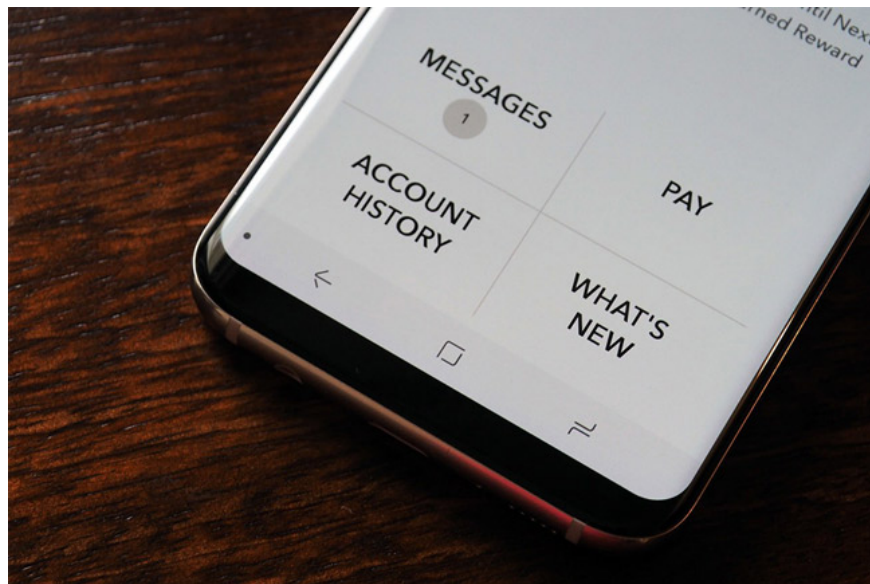

As you know, the navigation bar is at the bottom of the phone screen where the Home, Back and Recent apps keys are located, which will always be transparent on the lock screen and turned white when running other applications. However, if you want to change this color to make a difference, then customize it by going to *Settings > Navigation bar > Selecting color as you like*. There are many colors like pink, blue, green, . these colors are all pale colors and do not feel like the screen is cut off.

## 3. Hide the navigation bar completely

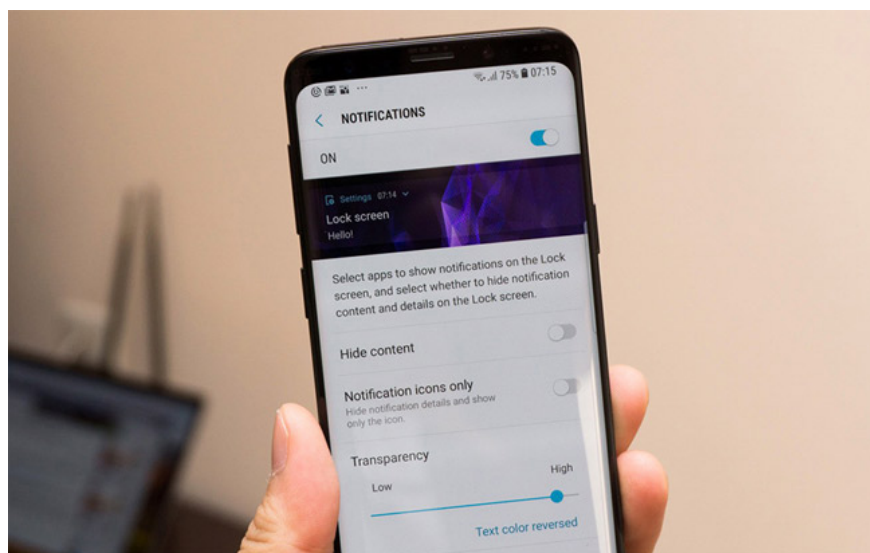

If you don't like the navigation bar or simply want to enjoy the full screen feel, hide it. Click twice on the small dot on the left side of the navigation bar, then the navigation bar will be hidden by default, only when you need it will you need to drag from bottom to top. But also warn that implementing this custom will sometimes be annoying because you always have to swipe up the navigation bar every time you need it. Therefore, it is best to use when you need to read the news, surf Facebook to experience reading on the whole screen. When you use it

normally, leave the navigation bar back to its original state.

#### **4. Adjust the transparency for the Notification lock screen**

The lock screen of your device has a beautiful wallpaper, which is impressive but by default it is covered by notifications that appear to make the experience incomplete. Fortunately, Samsung has a built-in transparency adjustment tool for the background of these notifications. Please set up in *Settings*> *Lock screen & security*> *Notifications*> *Transparency* . Drag this bar until you see the transparency you like.

So, no need to use Launcher, just need 4 simple custom above you can customize the Samsung Galaxy S8, S9, A8 or Note 8 becomes more exclusive and strange. When you have free time, please adjust your device according to the instructions above and don't forget to share with your friends.

Good luck!
