

How to recover messages on iPhone

guide you 4 ways to recover deleted messages on iPhone such as: Using iCloud, iTunes, PhoneRescue software or contact your carrier.

You fall into the case of accidentally deleting all messages on iPhone and want to restore these messages. Please follow the article below for some ways to recover messages quickly and effectively.

1. Recover messages through iCloud

Restoring messages through iCloud means you have to reset your iPhone back to its default factory settings and then use iCloud to sync the data again.

- Step 1: Check the time of data backup

Before attempting to restore messages, you need to check when the last iPhone data backup was made. If the time of backup happens before you delete the message, the message will be restored.

You open Settings> Choose Apple ID account> Choose **Device Information** .

Erase all content and settings

Once your iPhone has been reset to factory settings, start restoring the backed up data including messages.

2. Recover messages through iTunes

If you don't use iCloud to store but have synced data with iTunes, you can restore messages via iTunes.

- Step 1: Connect iPhone to iTunes

You use a cable to connect your iPhone to a computer that has iTunes installed. Once connected, select **the iPhone icon** to go to the recovery interface.

- Step 2: Recover messages

You choose **Backups** > Select **Restore Backup** .
