

5 apps to take 'must-have' selfie photos on Android phones

Selfie photography is a strong trend for young people today and it is the driving force for the need for selfie applications to develop features that help users take better photos. Let's TipsMake.com refer to 5 selfie photography applications must be available on Android phones in this article!

1. This is a portrait shot that removes fonts (Portrait Mode) on Pixel 2 without Pixel 2
2. Entertainment with 20+ funny photos due to the need to blink without mind
3. How to take Portrait Mode selfie photos on iPhone X

Selfie photography is a strong trend of young people today and it is the driving force for the need for selfie applications to develop features that help users take better photos such as beauty features, gesture shooting, the voice or the ability to change the color of the photo. The quality of images is increasing, giving natural colors and smooth corrections to the eyes of the most viewers.

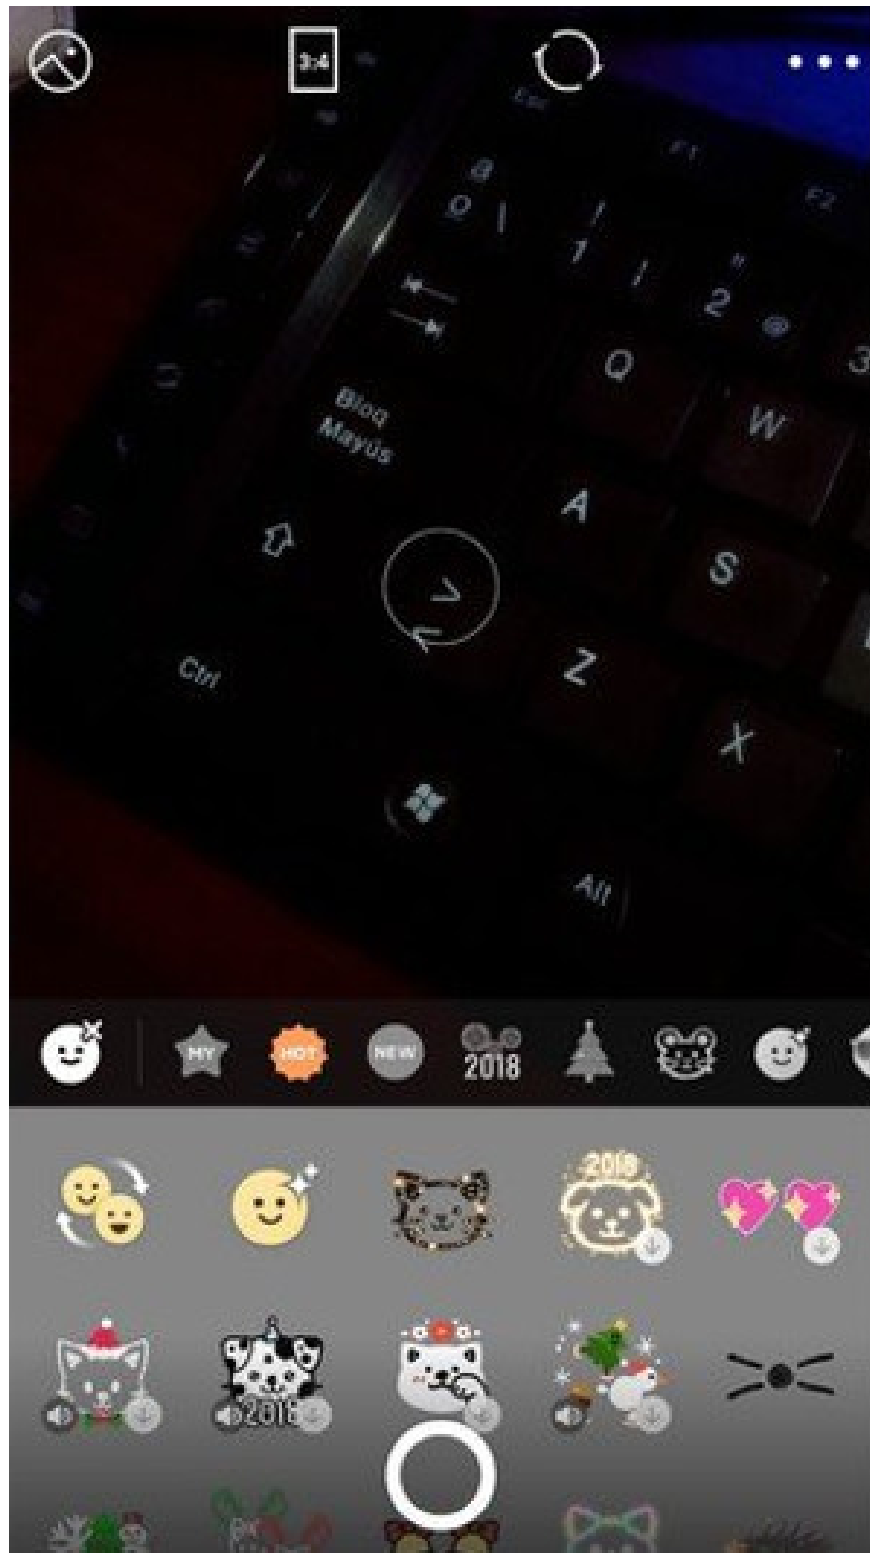

Every selfie app tries to attract users with features called 'must-have' but some apps fail. The selfie photography apps below allow you to add real-time effects such as animal ears (animal ears) and even users can record video if you want.

Let's TipsMake.com refer to **5 apps "must have" selfie photos on Android phones** in this article offline!

1. B612 - Selfiegenic Camera

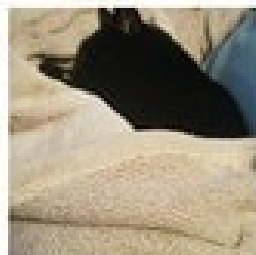

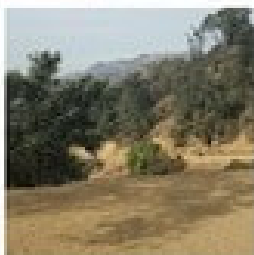

Clearly, the B612 has unique features that can keep the "addict" taking a selfie happy when watching what you download. The application has essential selfie features such as filter filters and beauty options; it also offers more. The B612 application has real-time effects that you can add to your selfies like animal ears, Christmas-related decorations, funny hats, accessories, jewelry and all faces. humor.

It even has the same features as Snapchat, the app that changes the voice and gives you a "funny bee" body (for example). However, you need to connect to the Internet to be able to use these features and it also works when using mobile data. You cannot add sticker stickers to photos from your phone library, but you can add them as filter filters.

2. Sweet Selfie

Multi-Grid

Funny

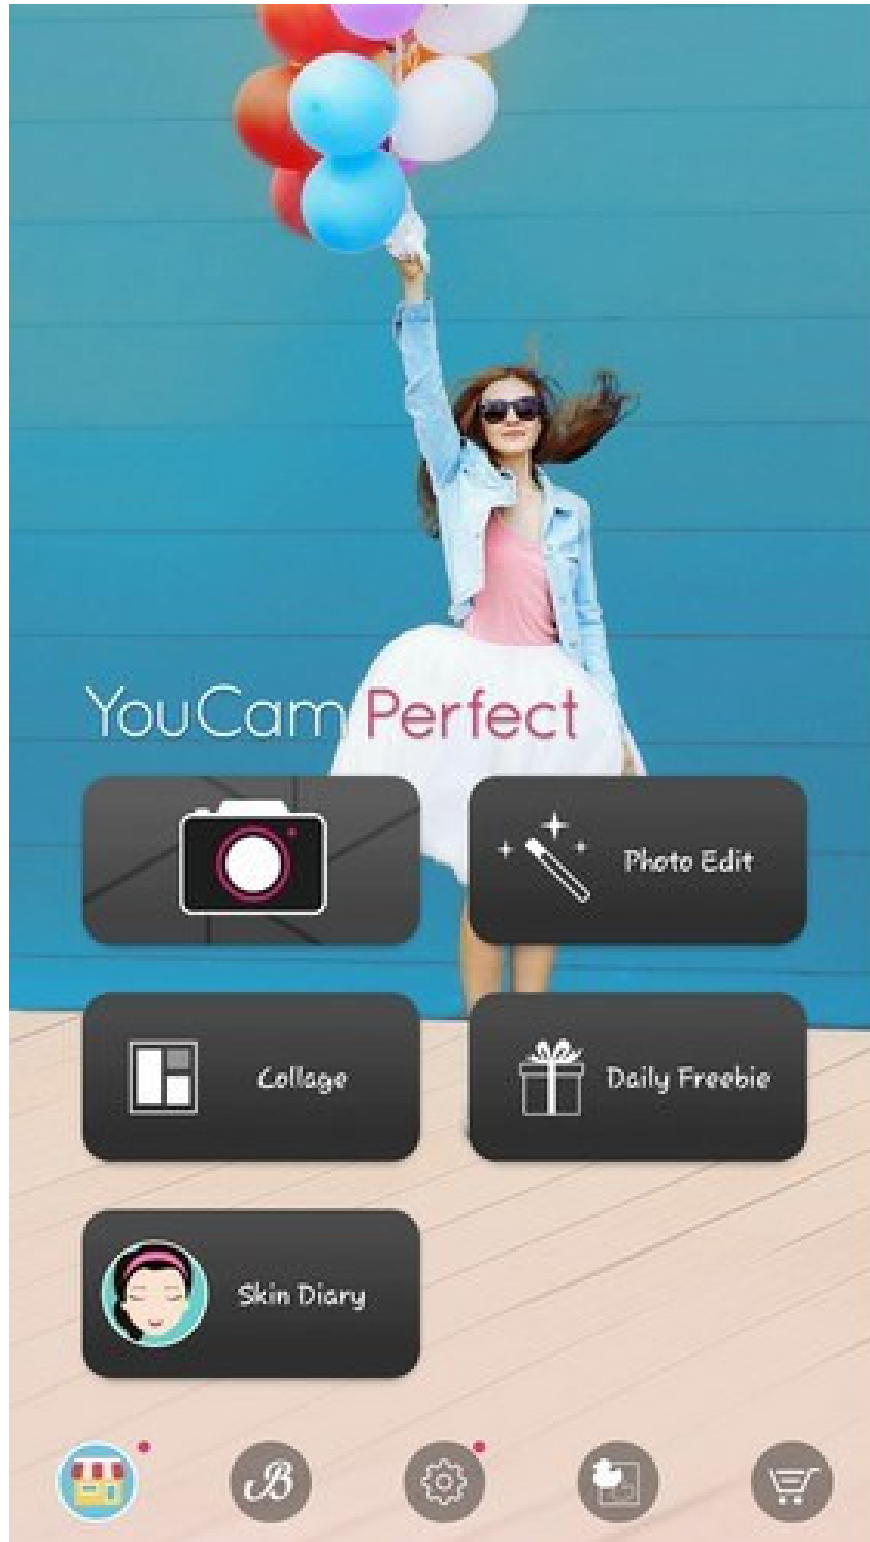

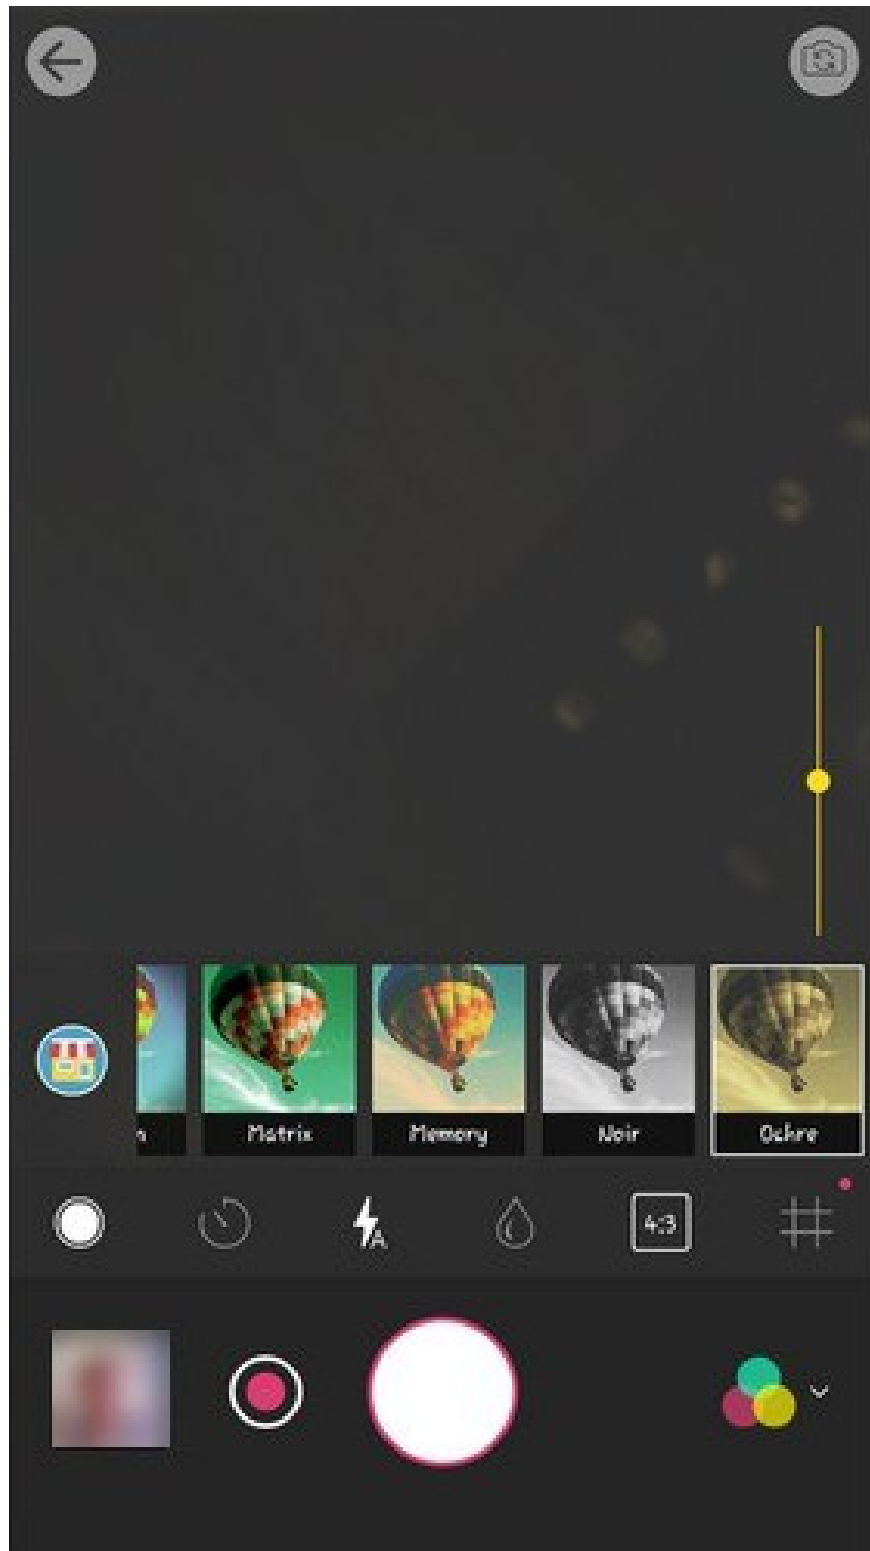

With **Sweetie Selfie** , you can create collages with your selfie photos, choose from various collage options, about two to six photos. This application also has different filter filters. For example, you can add traditional filter filters or custom filter filters.

It also has a photo booth where you can add Christmas hats, New Year costumes, animal ears, magazine covers, seasonal frames and more! If your capture button is too far away, you can take the capture application by touching anywhere on the screen.

3. YouCam Perfect

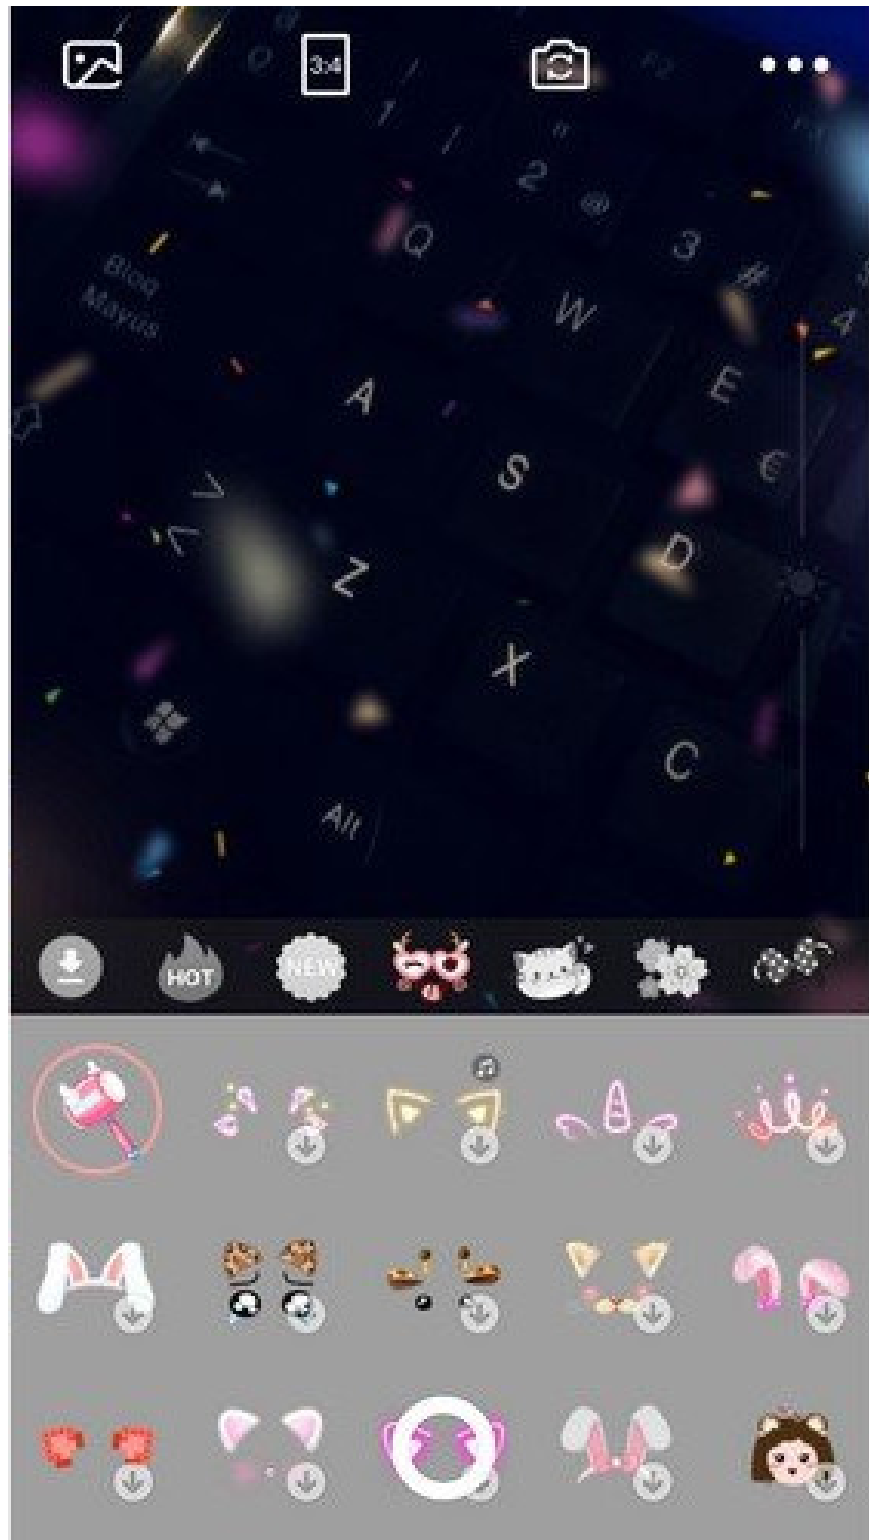

YouCam Perfect is a feature-rich application that provides filter filters once touch, rotate and crop photos. You can also add blurred backgrounds or add your photos to a fun setting like a funny cooking chef. (You will need to install an additional application for that.)

The beauty feature on this app is more detailed because you can smooth skin, change skin tone, create face blocks, change eye color, enhance the nose, etc. In addition, you can also use layers cover overlay, stickers,

frames, HDR and effects like imagination, memories and more. Some are free, but others cost \$ 0.99 to use.

YouCam Perfect application also has the ability to detect **Face detection** feature so you can fix all faces in selfie, not just yourself. Moreover, you can also add a selfie to your photos by creating a short video.

4. Bestie Selfie Camera

Bestie Selfie Camera also has a lot of features that provide its real-time beauty effects. For example, you can remove acne, add more than 100 filter filters for selfie portraits, remove blemishes or whiten teeth and even re-create faces.

Real-time stickers are also available and they include from accessories to interesting faces like ducks and chickens; Your friends can see active real-time stickers. Moreover, you can also record a short video with the selected items.

Thanks to Night camera - night photography software, you can shoot yourself at night without worrying about low light and suitable for group photography using wide-angle lenses. Add Firefly, feathering and other designs to give your selfie a more personal feel. This application will provide effective options that other applications cannot do.

5. Fotor Editor: Perfect Selfie
