

5 beautiful laptops

Laptops are being seen as jewelry. Possesses a standard 'appearance' but the following laptops also do not have the 'side' of features compared to other computers.

Laptops are being seen as jewelry. Possesses a standard 'appearance' but the following laptops also do not have the "side" of features compared to other computers.

Apple MacBook Air

Apple pioneered the ultra-thin laptop market with MacBook Air. Since its launch, Apple's 'supermodel' MacBook Air has made the world 'crazy' technology with incredible 'rings': the thinnest spot is the thickest 4mm with only 19mm. The sleek aluminum chassis of the laptop offers a luxurious, glamorous look for Apple 'pride'.

The device's touchpad can be controlled by gestures. However, in exchange for this incredible slenderness, Air had to sacrifice some important features, such as integrated optical drive, FireWire port and Ethernet port.

Apple MacBook Air is priced at 2,250 USD.

HP Pavilion dv2633XT 'Verve' version

The special dv2633XT of the 'Verve' version of the Pavilion dv2633 makes a difference to other laptops on the market. The lines still curl around the body of the user vacuum at first sight.

'Verve' is equipped with a Core 2 Duo T5550 processor, GeForce 8400M GS graphics card, 2GB RAM, a DVD + -RW drive, 802.11A / B / G / N, Bluetooth and a 160GB hard drive.

'Verve' supports Ethernet, HDMI, Firewire connections, SD / MS / MMC / xD card reader and 54 Express Card slot. Unfortunately, the laptop does not support high-speed HSDPA connection.

Sony Vaio TT

The Vaio TT ultraportable laptop is the world's smallest computer using Blu-ray drive. With a very economical noise reduction technology, Vaio TT is especially for business users who want to watch movies after hours of hard work, especially being able to watch on international flights for many hours.

The Vaio TT has an 11.1-inch screen with a resolution of 1366x768 pixels, weighing about 1.2kg. It has built-in Blu-ray player, HDMI output. In addition, this new Vaio line also has a MOTION EYE camera to identify the face and built-in microphone.

Sony Vaio TT is not available in the market.

Dell Studio 1535

A desktop replacement laptop - a crossover product between the mid-range Inspiron and the high-end XPS line.

Studio 1535 owns a 15.4-inch screen, equipped with Intel Core 2 Duo processor, 4GB RAM and 320 GB hard drive. In addition, the device is also equipped with Wi-Fi connectivity, including webcam, 8-in-1 memory card reader.

Price: 1,500 USD.

ASUS U2E

The stylish Asus U2E is leather-covered on this surface that will definitely add options for those who need to buy a laptop as a jewelry. Machine weighs only 1.27kg; 11 inch wide screen with a resolution of 1366 x 768 pixels; Support HDMI port to connect to TV and FireWire port. The most outstanding feature of Asus U2E is that it has a stylish and beautiful design and has 2 colors for you to choose (black, brown).

Unfortunately, the keyboard of the device is quite difficult to use.

U2E is the most expensive laptop of Asus today. Selling price in Vietnam is about 42 million dong.
