### **What are new 2019 iPhone models?**

iPhone 2018 models iPhone XR, iPhone XS and iPhone XS Max all have an "upgraded version" this year, with a host of exciting new features and names.

iPhone 11 is the basic model with 6 colors: Black, white, purple, green, yellow and red (Product Red). The iPhone 11 is about the same size and weight as the iPhone XR, but at a slightly lower price, starting at \$ 699 (VND 16,225,000). iPhone 11 also comes with some improvements that the article will mention in the following.

iPhone 11 Pro and iPhone 11 Pro Max, as the name suggests, are 'pro' models designed specifically for people who take photos and videos on iPhones, as well as loyal Apple fans who always want to Own the new and greatest product.

iPhone 11 Pro models come with advanced screen and camera technology. In addition, the iPhone 11 Pro Max is also bigger and a bit heavier than the previous iPhone XS Max model. The iPhone 11 Pro is also a bit more bulky than the iPhone XS.

With Pro models, the color options are more 'reserved' than the iPhone 11 models. The iPhone 11 Pro and iPhone 11 Pro Max are only available in gray, silver, gold, and the new midnight green. be liked.

In terms of pricing, the iPhone 11 Pro starts at \$ 999 (VND 23,188,000), while the iPhone 11 Pro Max will cost from \$ 1,099 (VND 25,500,000) or more.

4. Front camera: 12MP camera
5. Storage capacity: 64GB, 256GB, 512GB

## 5 best new features in iPhone 11

The new iPhones traditionally come with tweaks and performance improvements, along with new features that make the upgrade worthwhile. Here are 5 most interesting features that can convince you to own a new iPhone 11.

### 1. Super wide angle camera

The second camera on iPhone 11 (and the third on iPhone 11 Pro as well as iPhone 11 Pro Max) is the new Ultra Wide (ultra-wide angle) camera that lets you capture more in frame.

For photos, the Ultra Wide camera is extremely useful for 'scanning' the entire landscape, shooting in cramped spaces and group photos that can't capture everyone in one frame. And with video, wider frames will help you capture more action.

## 2. Better front camera with Slo-Mo

The Selfies and FaceTime features are still maintained, so as expected, Apple has upgraded the front camera in iPhone 11. Now, iPhone 11 can take 12MP photos (the front camera in iPhone XS is only 7MP) and record videos 4K. This upgrade will take selfies, video calls and live streaming to a whole new level of quality.

But the slow-motion feature in the front camera of the iPhone has yet to appear. Whether this feature is worth upgrading is still to be considered, but a more powerful front camera is definitely welcome.

## 3. Night Mode

The iPhone 11 is much better at taking photos in low light. With the new Night Mode activated automatically when needed, you will be able to take natural, well-lit photos in dark conditions without having to use the flash.

To do this, the camera takes many photos with optical stabilization. The iPhone's software then merges the best lighting parts of those photos, while correcting the contrast, reducing noise and fine-tuning colors.

## 4. Spatial Audio (Spatial Audio) with Dolby Atmos

Nearly every iPhone user likes to play games and watch videos on their devices. And the new Spatial Audio (spatial audio) playback feature that supports Dolby Atmos will make those activities much more interesting. The sound in the new iPhone 11 makes you truly immersed. Sounds impressive even without an external speaker.

## 5. QuickTake

The video received quite a bit of attention in this iPhone version, with a seamless transition between cameras and 4K video for the front camera. QuickTake is a video feature not really impressive, but still super convenient. QuickTake allows you to quickly record videos just by touching and holding the shutter button.

If you've ever used Instagram Stories to record videos, the way QuickTake works will make you instantly feel familiar.

Whether or not you should buy a new iPhone this year depends on the model you own now and how often you use the iPhone.

If taking photos, videos, playing games and watching content on your phone are all your top priorities, the iPhone 11 has a lot to offer.

Wish you find yourself a suitable choice!
