

5 best gaming keypads in 2024

One-handed gaming keyboards are a great choice for PC and console gamers who want to customize their gaming setup to enable smoother and more responsive gameplay.

Not only do gaming keyboards take up much less space than regular keyboards, but many of these options also offer a higher level of customization with macro configuration functions and custom key mapping.

Razer Tartarus Pro gaming keypad

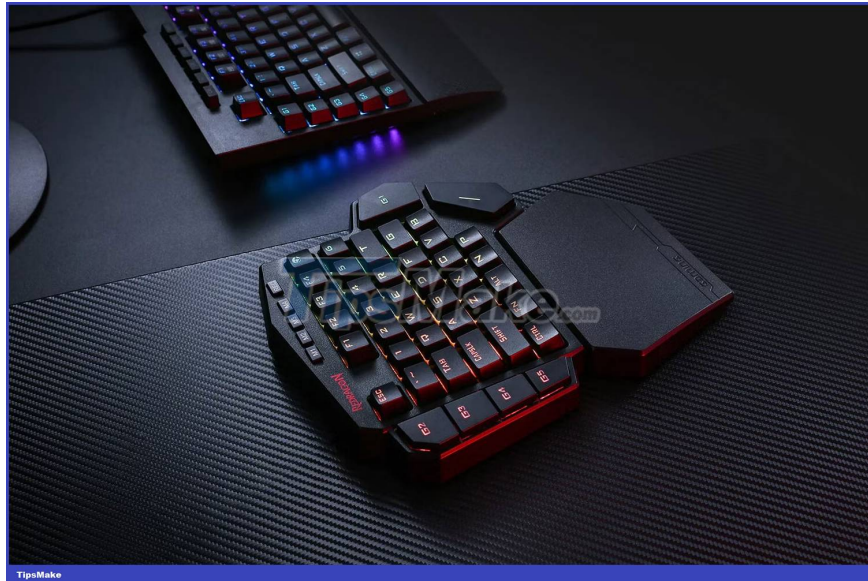

Equipped with 32 fully programmable Razer Analog optical switches, the Razer Tartarus Pro Gaming Keypad is the ideal gaming companion for setting up time-saving hotkey actions and macros to help your game smoother and more responsive.

It has an eight-way directional touchpad for precise movement and a built-in wrist rest for comfortable play over long periods of time. There's a quick-switch button on the side that lets you quickly switch between up to eight user profiles, and dual function keys let you bind two commands with each keystroke.

Plus, as you'd expect, it comes with a suite of Razer Chroma customization options, a 16.8 million color palette, and lighting sync capabilities compatible with popular titles and Philips Hue, making it a the perfect companion for immersive gaming experiences.

Redragon K585 DITI one-handed RGB mechanical gaming keyboard

A great gaming keypad at a budget price, the Redragon K585 DITI one-handed RGB gaming keyboard is for gamers looking to add more precision to their gameplay without spending a fortune.

With 42 interchangeable mechanical keys plus 7 dedicated macro keys, there are plenty of options to play with here, with the opportunity to assign up to 28 macro settings in total. The 5 different RGB backlighting options are a nice touch, although these options are somewhat limited compared to other gaming keypads.

You'll find a USB passthrough port to allow easy connection to other peripherals and a removable magnetic wrist rest for added comfort. Everything feels pleasant to use, with a solid construction.

Koolertron one-handed mechanical gaming keyboard

The Koolertron One-Handed Mechanical Gaming Keyboard features 45 fully programmable keys with 24 macro buttons. This mini USB macro keyboard is designed to make life easier, whether it's for gaming or for managing your workload.

For designers and creators, there's a 4-layer configuration and built-in MCU storage, so you can easily toggle custom settings to suit a variety of situations. There's a rotary knob function that lets you scroll through web pages, adjust lighting and volume modes or skip tracks with ease, and a blue LED light for an eye-catching look.

This mini keyboard can be used in conjunction with a full-size keyboard and allows for almost endless customization. This is the ideal companion on the desk and when entertaining.

HORI Tactical Assault Commander (TAC) mechanical keyboard

If you find yourself having to respawn on the battlefield more than you'd like, it may be time to consider a more tactical approach, such as choosing a HORI Tactical Assault Commander (TAC) mechanical keyboard. Designed for PS5 and PS4, this handy helper aims to provide PC-style keyboard and mouse control for your console games.

This mechanical keyboard features an 8-way analog stick and adjustable palm rest to enable smooth, anti-slip control, and has space to store up to 6 user profiles per console, with additional customizations. Supplements are available through the companion app.

It lacks the touchpad from the DualSense gamepad, and the price may be a bit high, but for console gamers, this PC-style keyboard is perfect for running and shooting and climbing those rankings.

Keychron Q0 Plus wired all-aluminum custom numeric keypad

For MMO gamers, the Keychron Q0 Plus wired all-aluminum custom numeric keypad is an ideal toolkit for setting up those important hotkey commands to enjoy a smooth, effortless gaming experience. labor.

With full QMK/VIA support, Keychron Q0 offers countless customization possibilities. Dragging and dropping your favorite keys or macro commands is easy with the VIA software, and you can even program commands to the knob above the keyboard.

With double-sided PBT keycaps for a pleasant tactile feel and attractive RGB lighting to complete the package, this keyboard is the perfect way to customize your gameplay.
